Sliding Eyes Face

Change expression with this sliding eye face - what expressions can you think of? This can include as many as you want from happiness to surprise and everything in between!

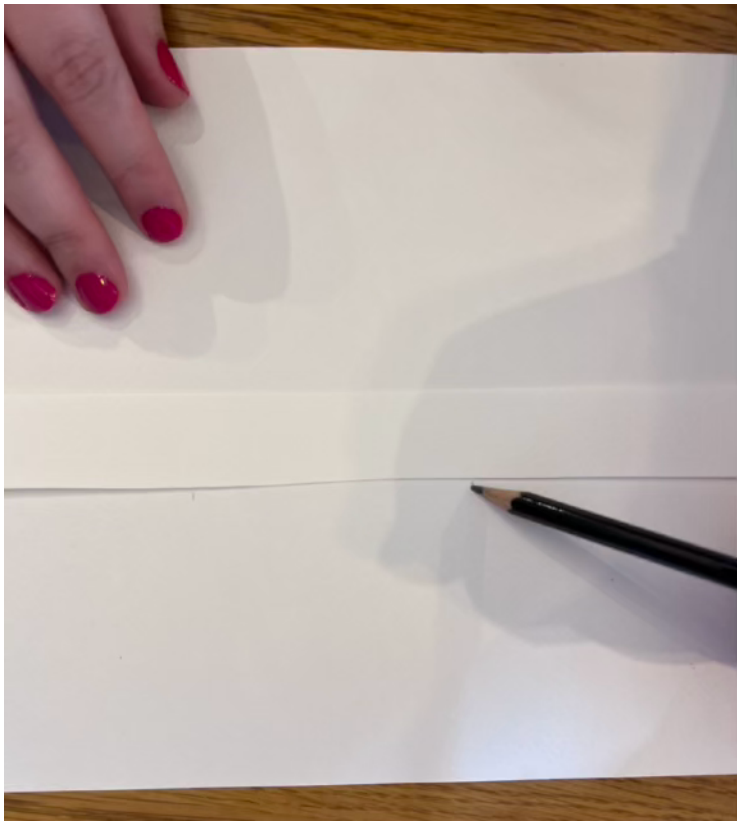

Tools and Materials:

- Paper
- Pencil
- Gluestick
- Scissors
- Colouring Pencils
- Felt Tips

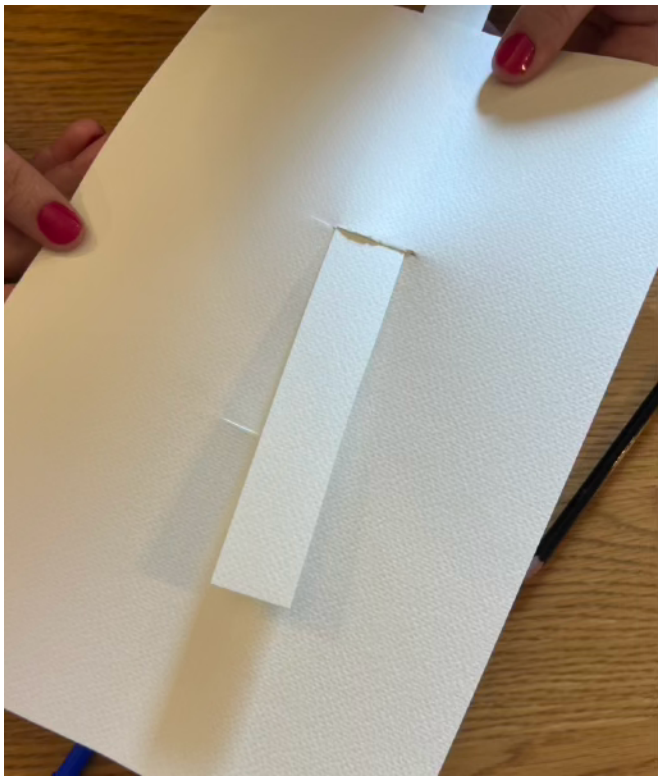

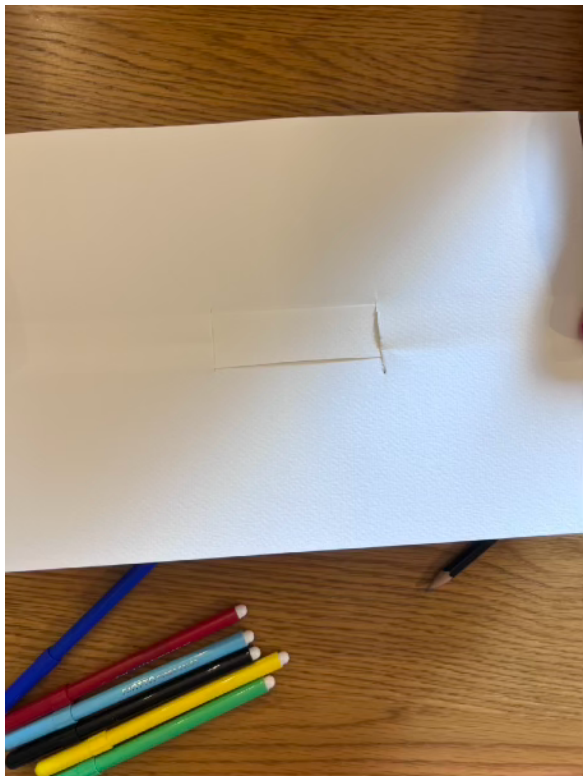

First cut a strip from the long side of paper, wide enough to draw eyes on - you don't want it to be too narrow! Then take the strip and measure/mark out where you think the eyes will fit on the face

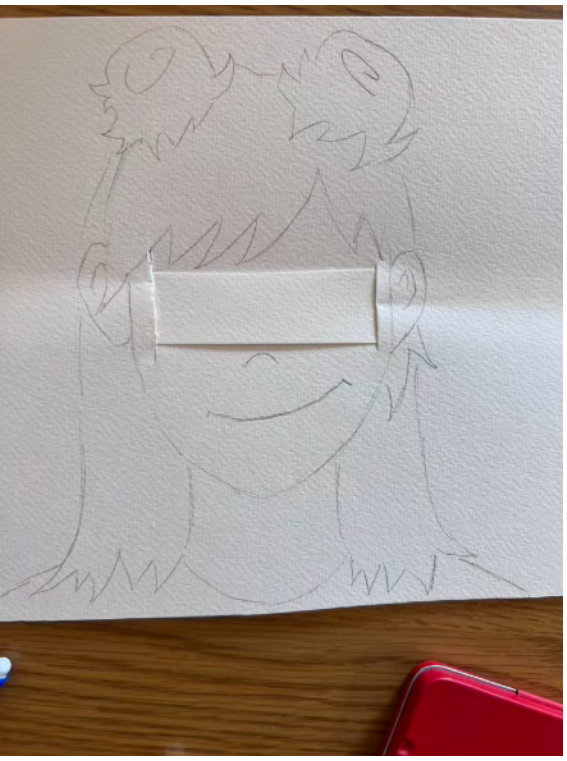

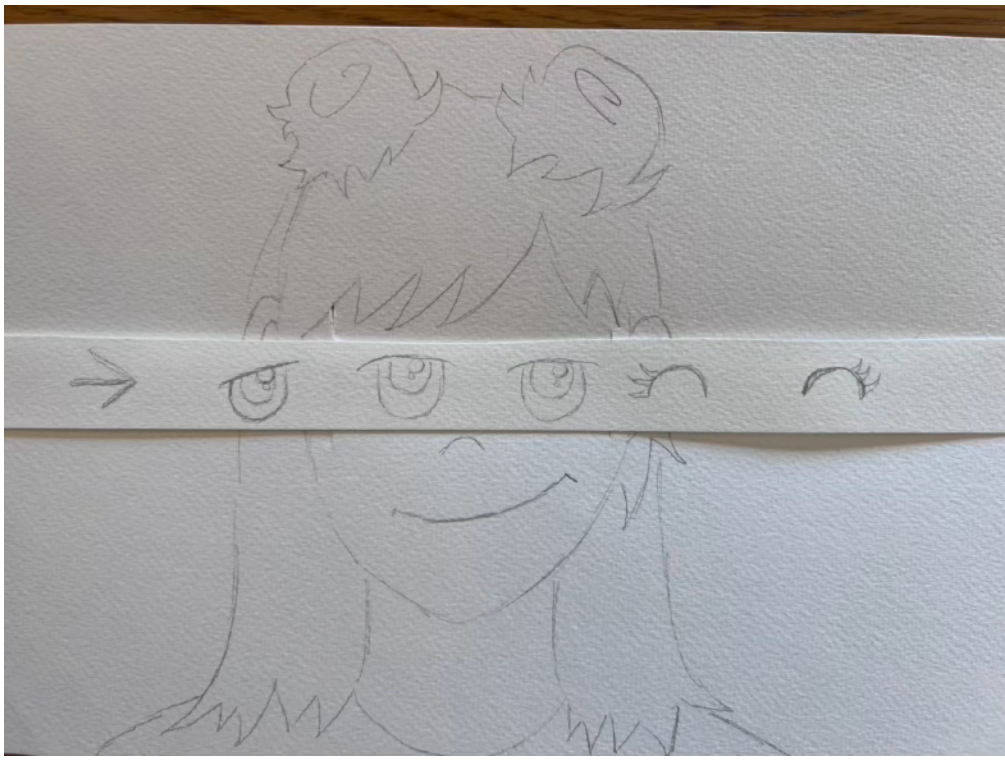

Once you are happy with where you have made the marks you can cut slits for the strip to fit through, you might find it easier to bend the paper slightly

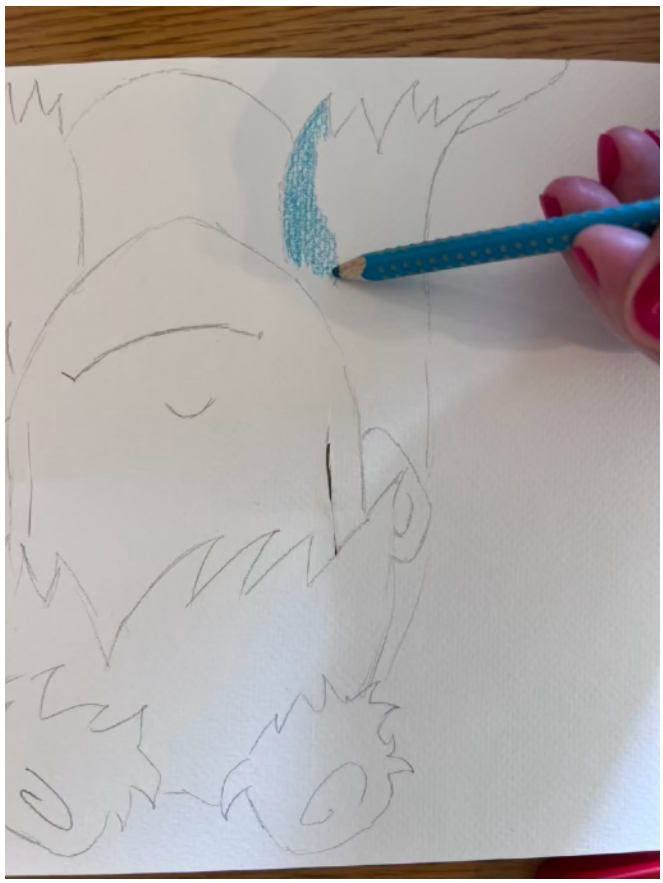

Draw the face around on the large bit of paper and then draw pairs of eyes on the strip - we went for 3 pairs of eyes to fit on our strip

Once happy with your character and the expressions you can colour it in

There you have it your very own “Sliding Eyes Face”!

Here is another we made to inspire you!
