Still Life

Whilst most still life paintings are of fruit or more traditional scenes there is nothing to stop you creating one out of your favourite objects to give it a contemporary twist!

Tools and Materials:

- Pencil
- Water Colours
- Paintbrush
- Paper
- Water (to use with the paint)

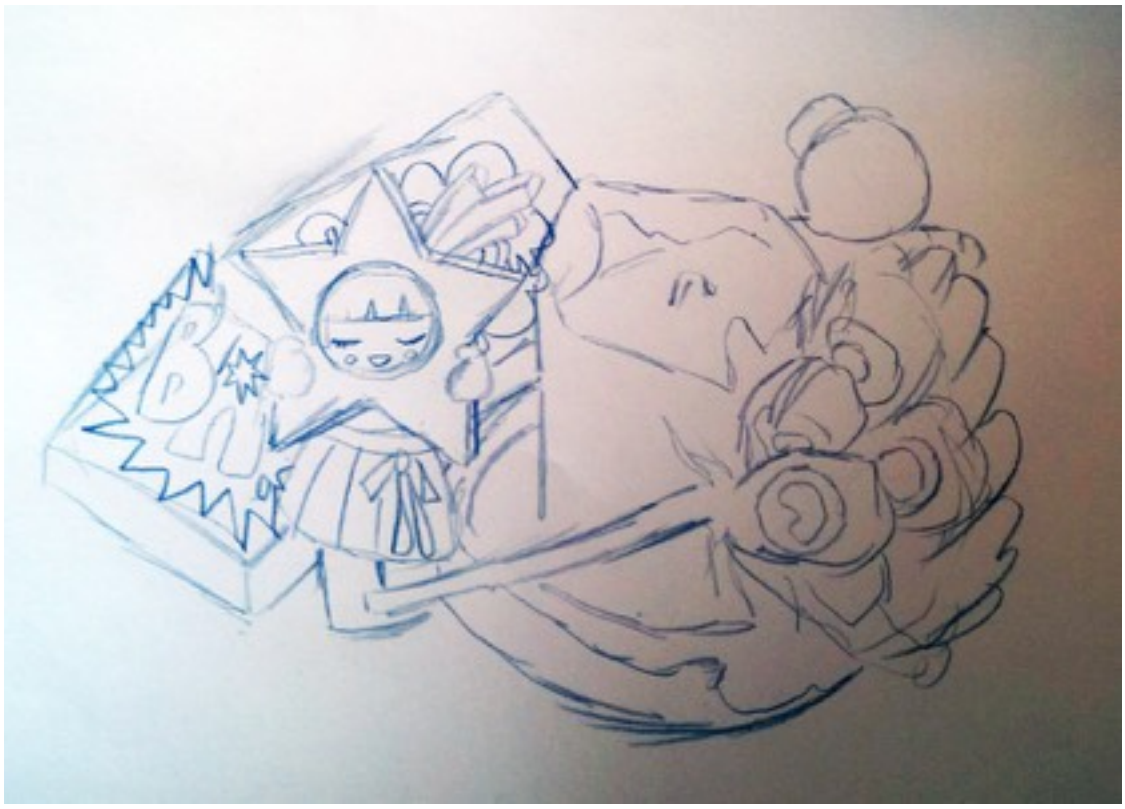

Firstly choose come objects from around the house that you find interesting, bear in mind if they don't belong to you you should ask permission from the owner first!

Once you have set them up in a way you think looks good then you can start sketching - the point of sketching is to break down the objects into easier shapes, you don't have to create a "picture perfect" version - so don't focus to much on that just try and have fun!

Don’t worry about the details too much as you can put add them in with the paint - the beauty of watercolour is it is fast and really fun to blend!

And there you have it your own Still Life

Here is the view from the other side we created to show you - everyone has a different style - so enjoying exploring what yours is!
