Cool it Art

Lambeth

String Art

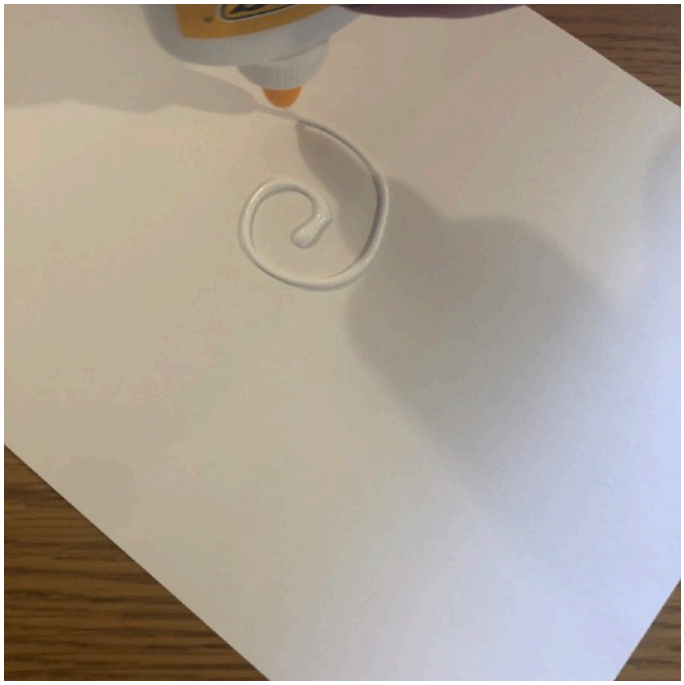

Using simple string you can create tactile linear works of art

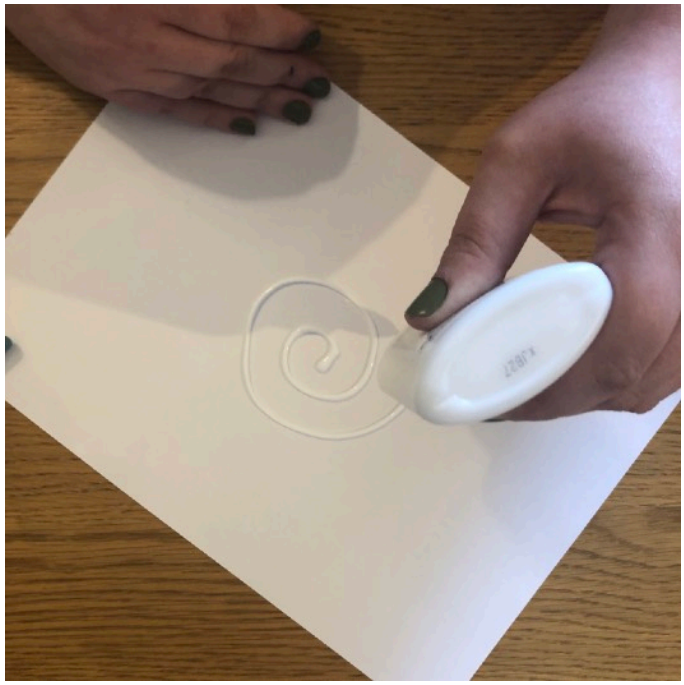

Tools and Materials:

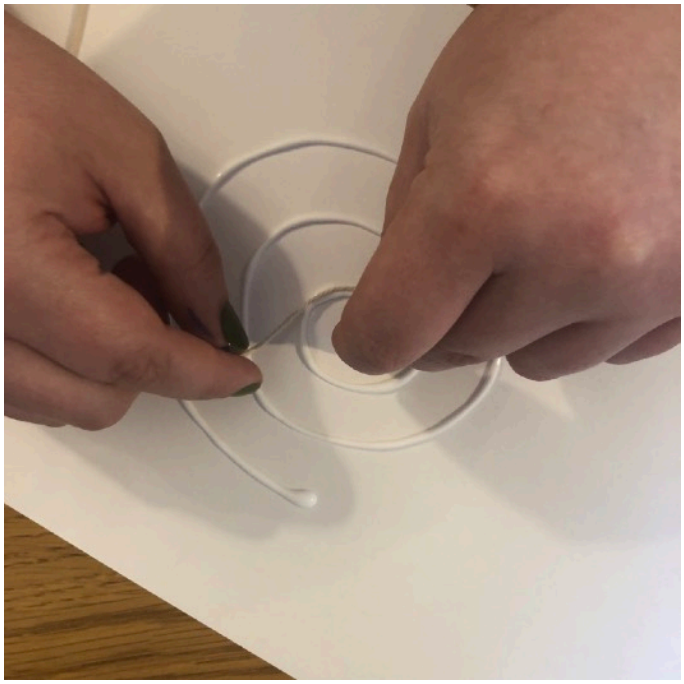

- Paper or canvas if your prefer
- PVA glue
- Paintbrush
- Scissors
- String
- Paint

Think about what it is you would like to create - draw your image out with the glue. You might need to cut the string into smaller bits so it stick - see how you get on!

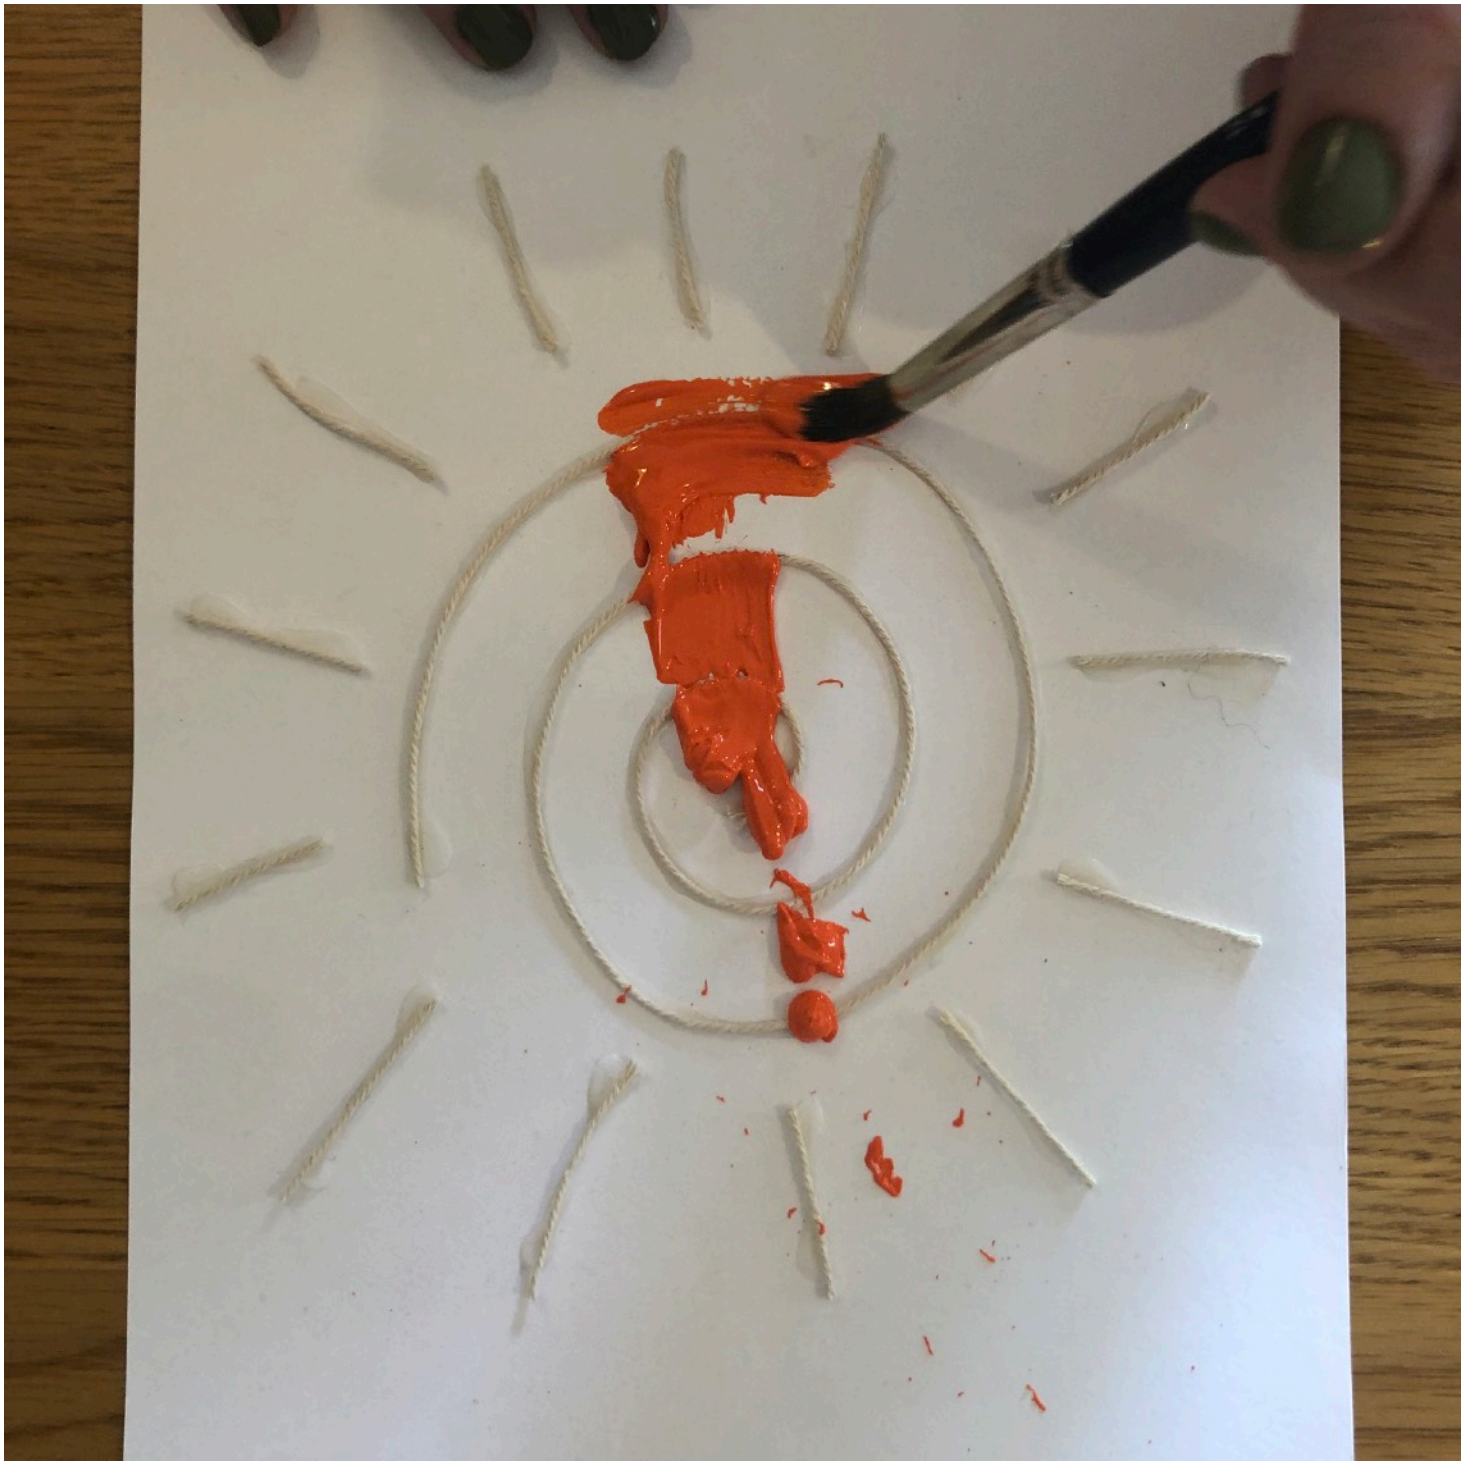

Then once you are happy with your image you need to wait for it to dry - this could take quite a few hours or even overnight depending how much glue you use

Once it is dry you can start to paint it!

There you have it your own “String Art”

Here are some more we created to inspire you!
