Summer Snapshots

Paying homage to the “Polaroid Photo” why not create your own collaged version of your favourite Summer memory!

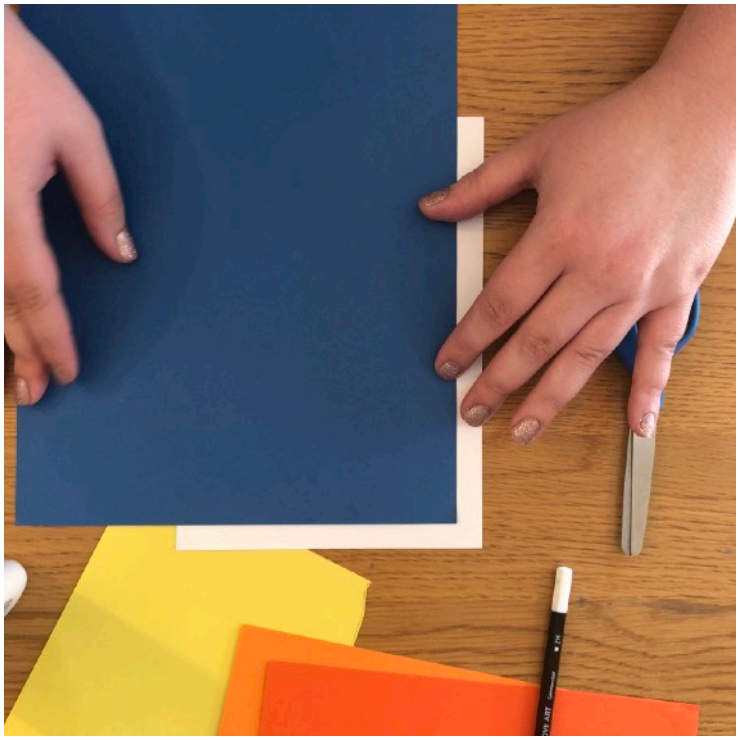

Tools and Materials:

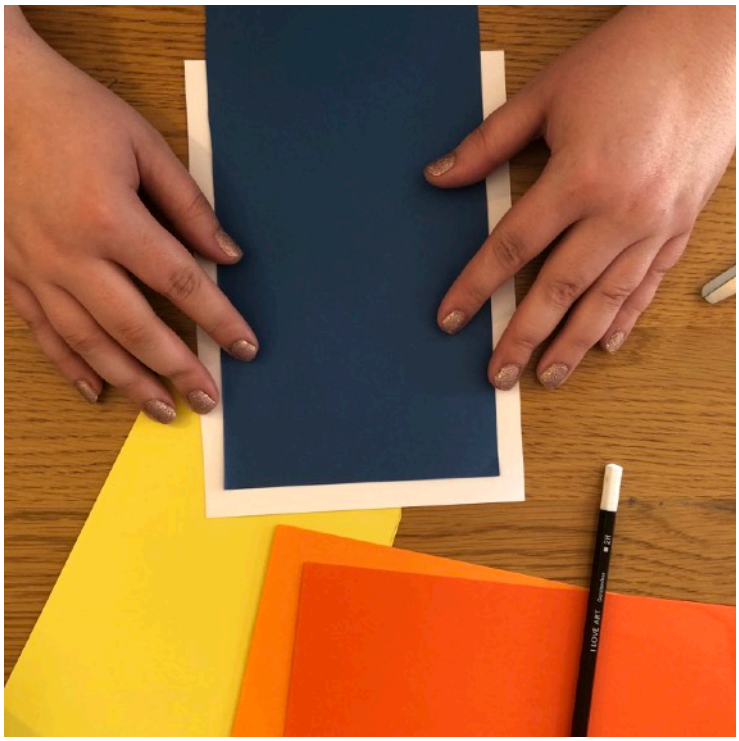

- Coloured Paper
- Pencil
- Glue
- Scissors

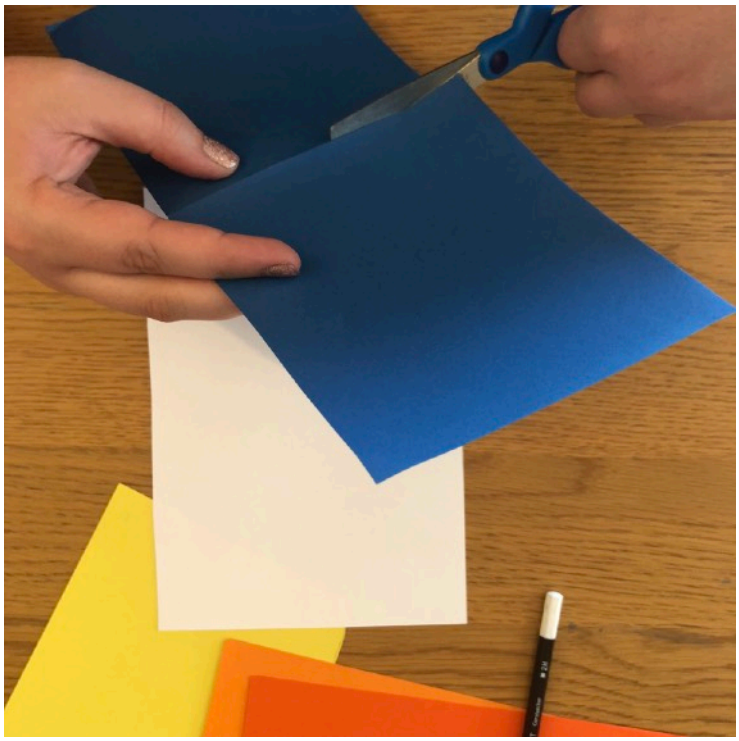

So Polaroids were the first instant photos and quite an iconic design with a white border and chunkier bit at bottom where the chemicals are to make the photo. We want to recreate that so first of all taking a piece of white paper fold it in half and measure out your background of the photo on it

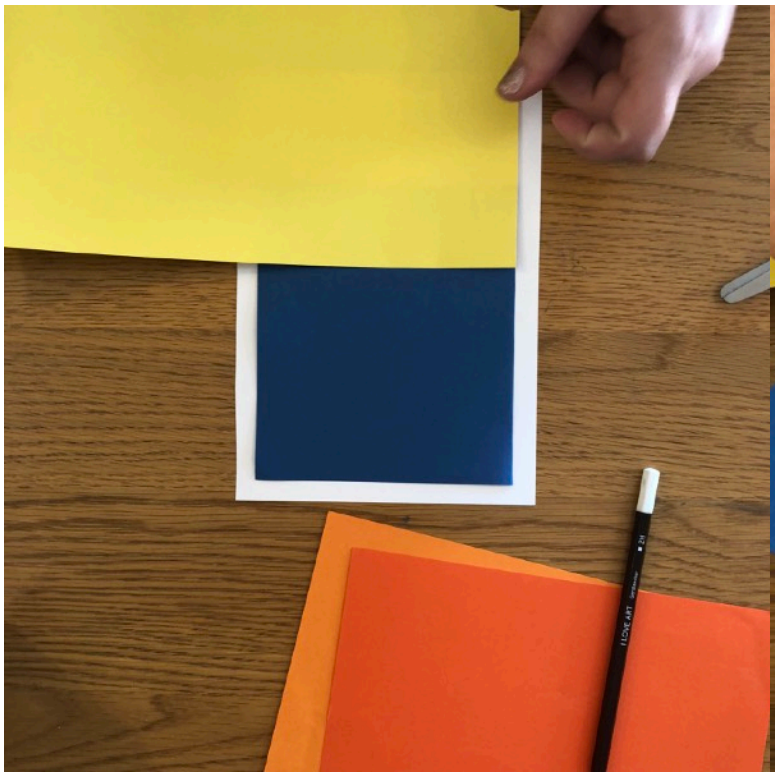

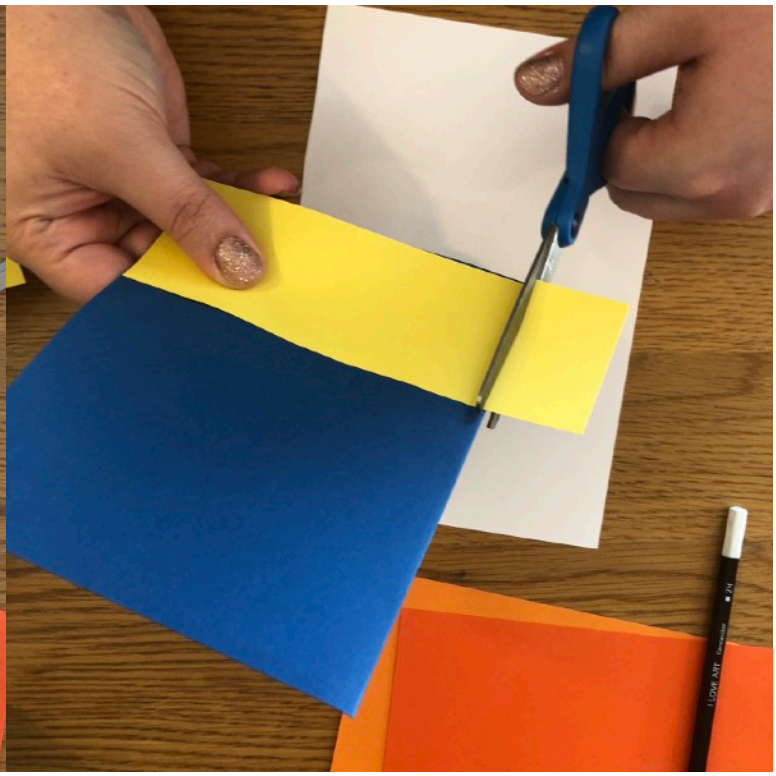

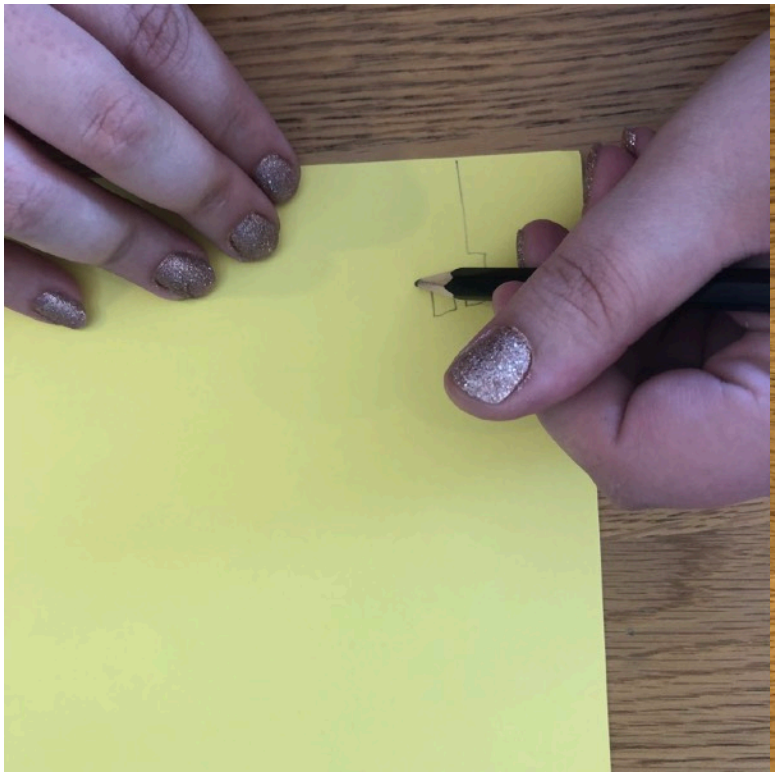

Once you have your background what do you need to add to it to create a “photo” of your favourite Summer memory - we chose a trip to the seaside complete with a sandcastle!

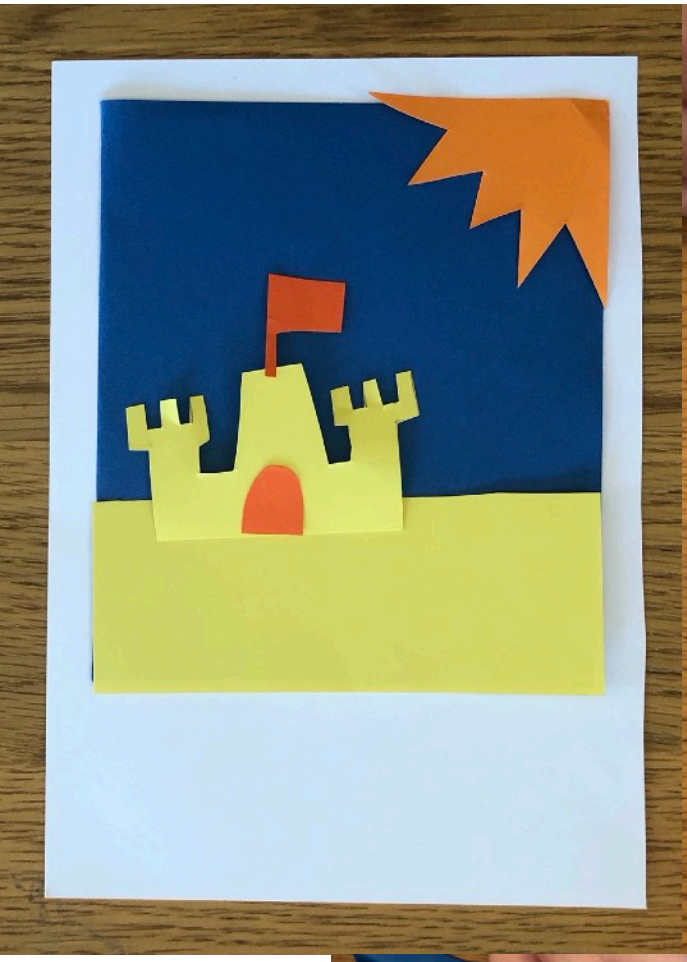

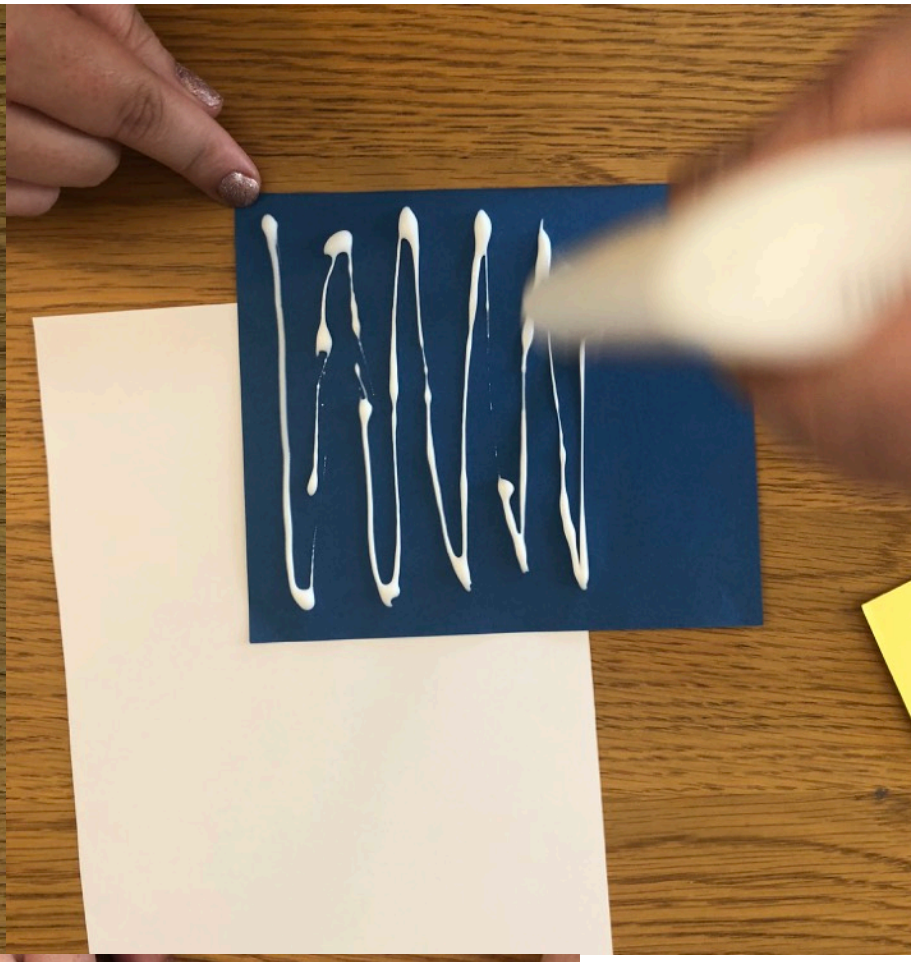

Carry on cutting out the elements you need to create your snapshot and when you are happy with it you can glue it down

There you have it your very own “Summer Snapshot”!
