Summer Vibes Poster

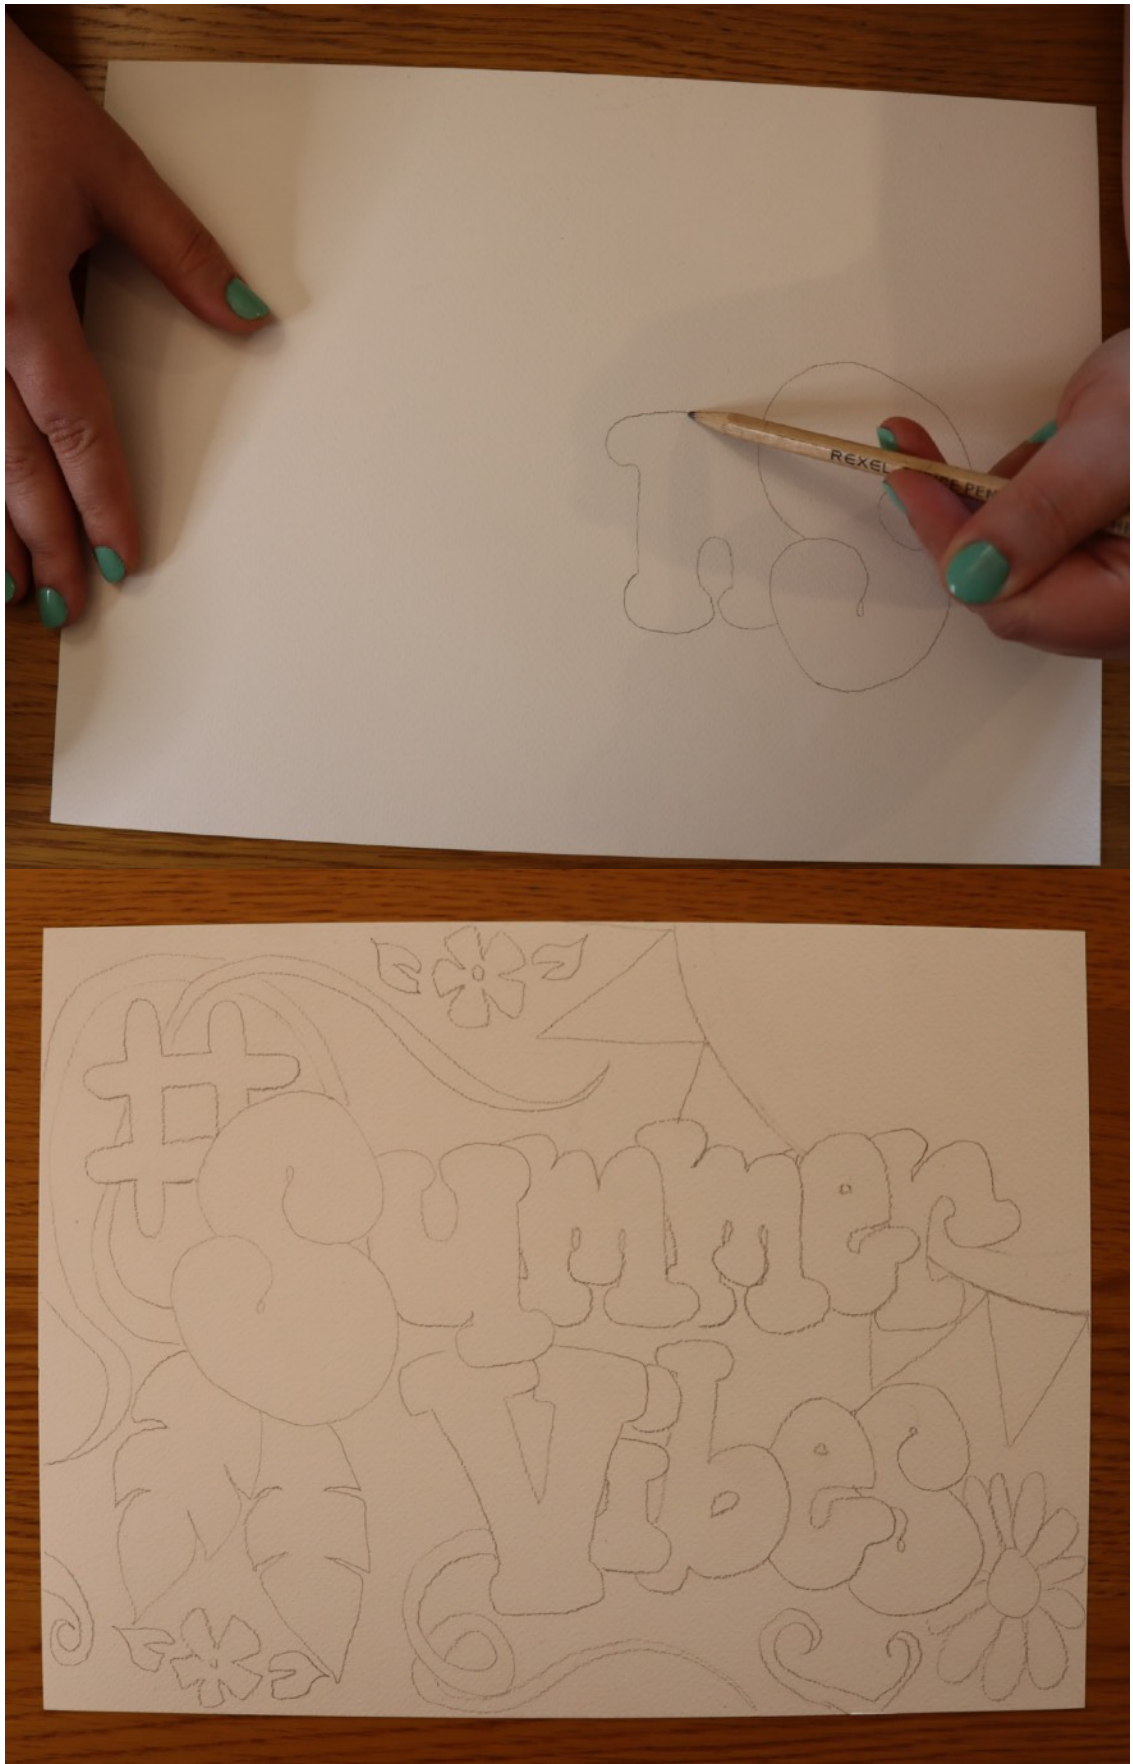

Celebrating Summer and bold bright colours why not create your own bold poster to celebrate the summer season!

Tools and Materials:

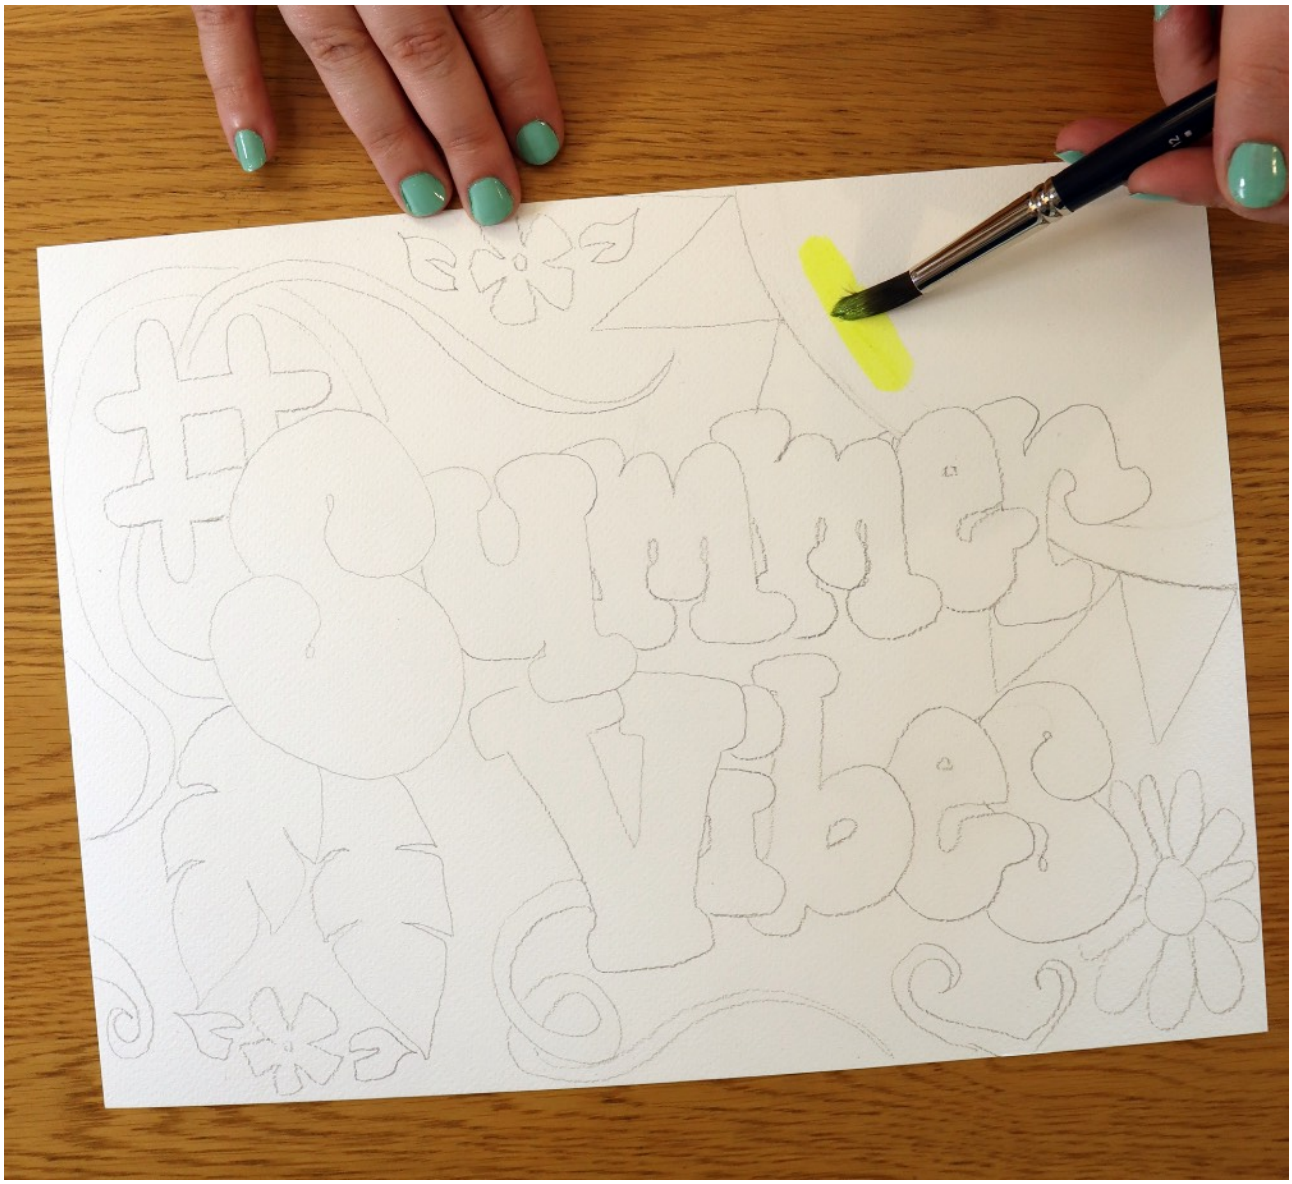

- Paper
- Pencil
- Paintbrushes (small for details, larger for broader cover)
- Watercolour
- Water

First of all sketch out what you want your poster to say - we went for “Summer Vibes” because it is short and snappy but you can choose whatever phrase you like! Think about what decoration you want around it too to represent the mood you want to capture

Once you are happy with your sketch you can start to paint it - we went for watercolour because it has some of the most vibrant colours we have - but you can use other materials if you like

For this piece of work we aren't outlining with black for once - to focus more on the colours - so think about which colours compliment or contrast to create your work. Choosing colour that really pop helps!

There you have it your very own “Summer Vibes Poster”!

Here is another we made to inspire you!
