Summer Wreaths

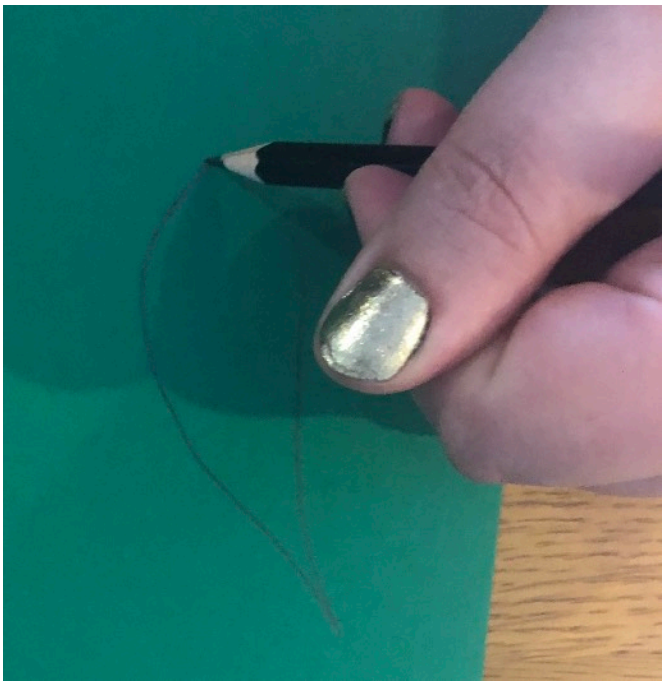

Come rain or shine you can still enjoy the beautiful colourful flowers of Summer indoors with these floral wreaths!

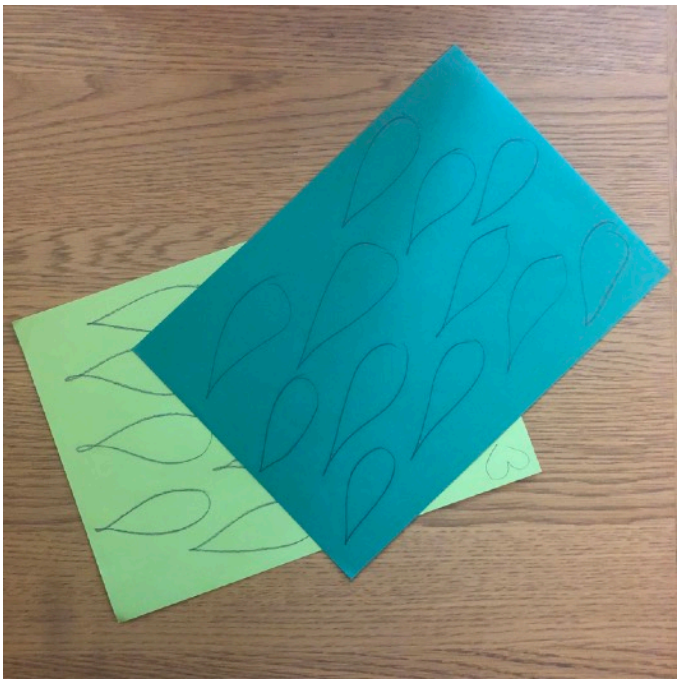

Tools and Materials:

- Coloured Paper
- Pencil
- Sellotape
- Scissors

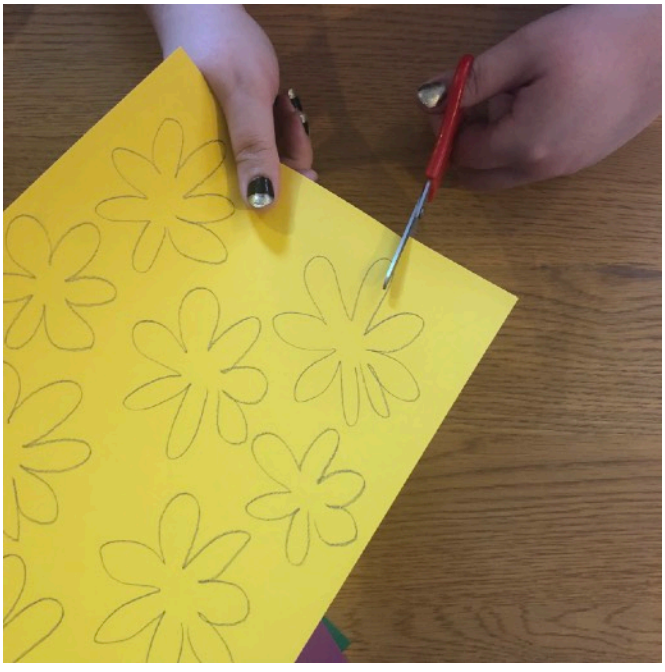

First you need to make the base of your wreath, we thought it would be fun to use the greens to make leaf shapes for flowers to go on top of but you could do all flowers or even add in some bugs! Once you are happy with them cut them out

Then using your other colours start thinking about what flowers you might like to create and cut them out too

Now take the pieces you have cut out and start arranging them in your wreath shape - we chose to do a circle but you could do a heart if you prefer. When you lay the paper out bear in mind this will be the back of your wreath!

When you’re happy with the positioning you can tape it

Now you can turn it over and add in extra details like the middles of the flowers or berries!

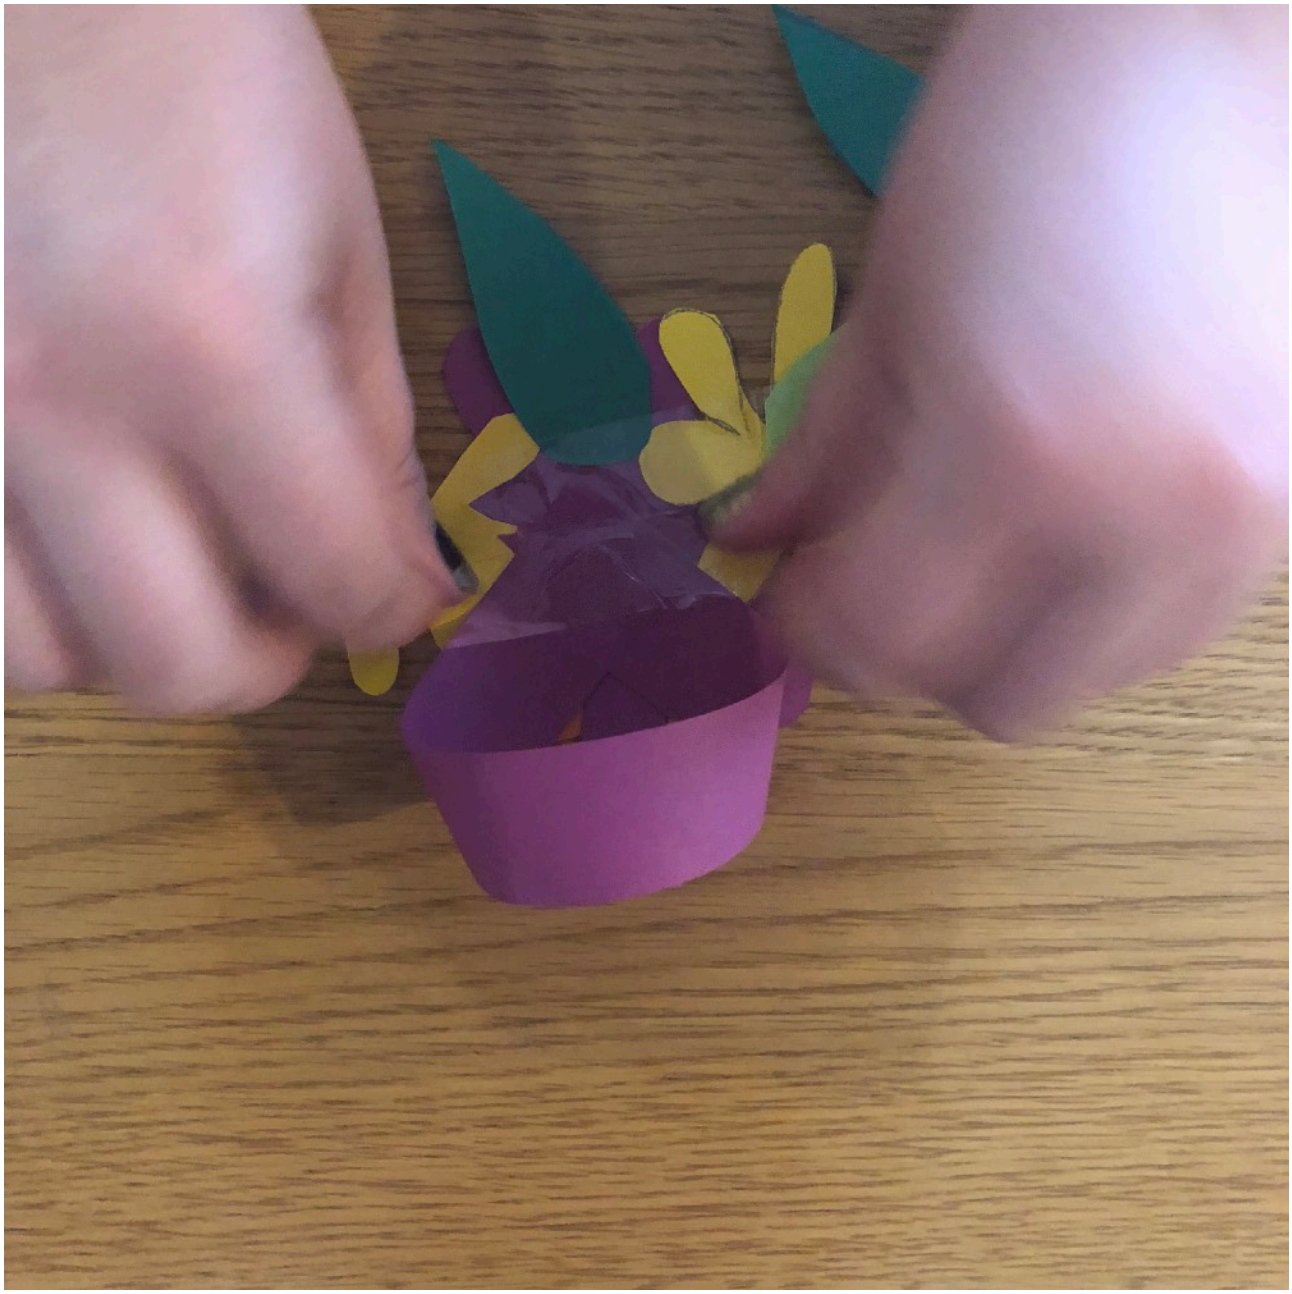

Fold the sellotape over on itself to make a sticky loop to attach smaller flowers and other details like so

Lastly you might want to make a loop to be able to hang the wreath up - cut a long strip of paper fold the ends together to create a loop like so

And there you have it your very own “Floral Wreath”
