Sun Catchers

This is a fun way to enjoy the sunshine even when you are indoors, Sun Catchers can turn your room into a rainbow paradise!

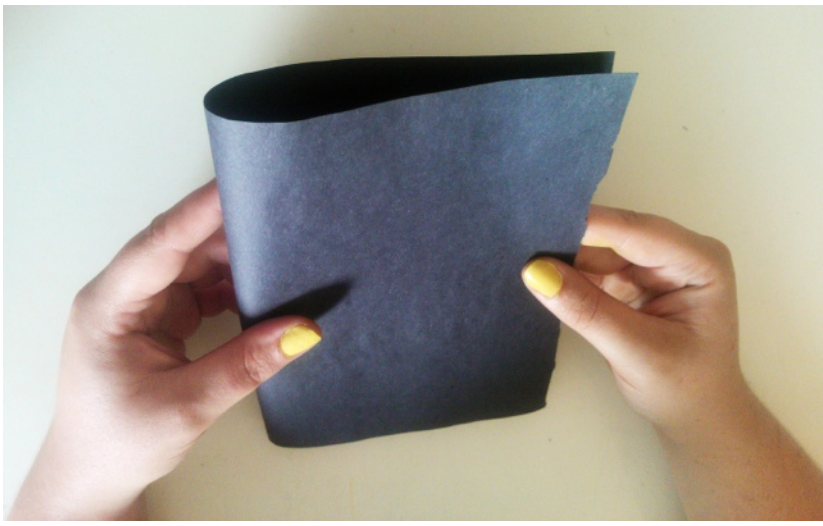

Tools and Materials:

- Prittstick
- Pencil
- Tissue Paper
- Black Paper or Card (we are using Paper as that is what we had in)
- Scissors

You don’t have to do this but a really easy way to do a Sun Catcher is to fold it in half so you only have to draw half, this works really well with patterns, flowers, butterflies or anything else you can think of that is symmetrical (a lot!!)

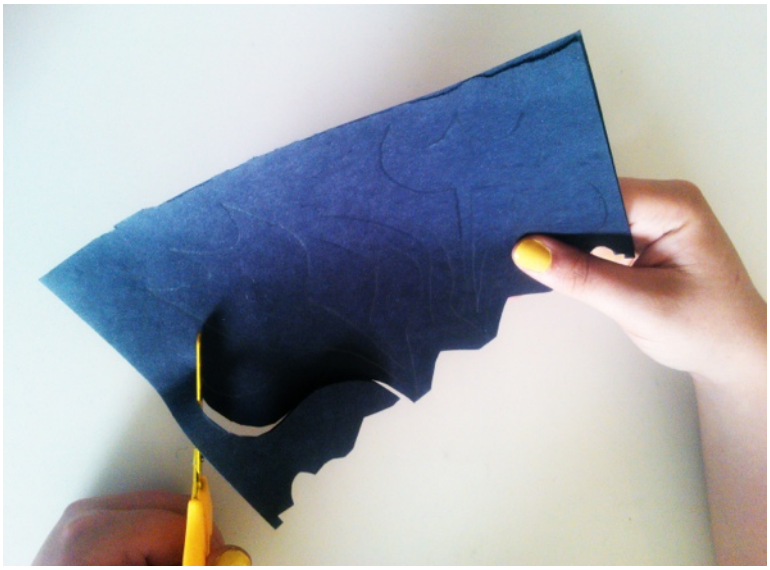

Once it is folded in half think about what you would like to draw, we opted for a floral pattern but you can do anything you would like! Even a two-headed dragon could be done!

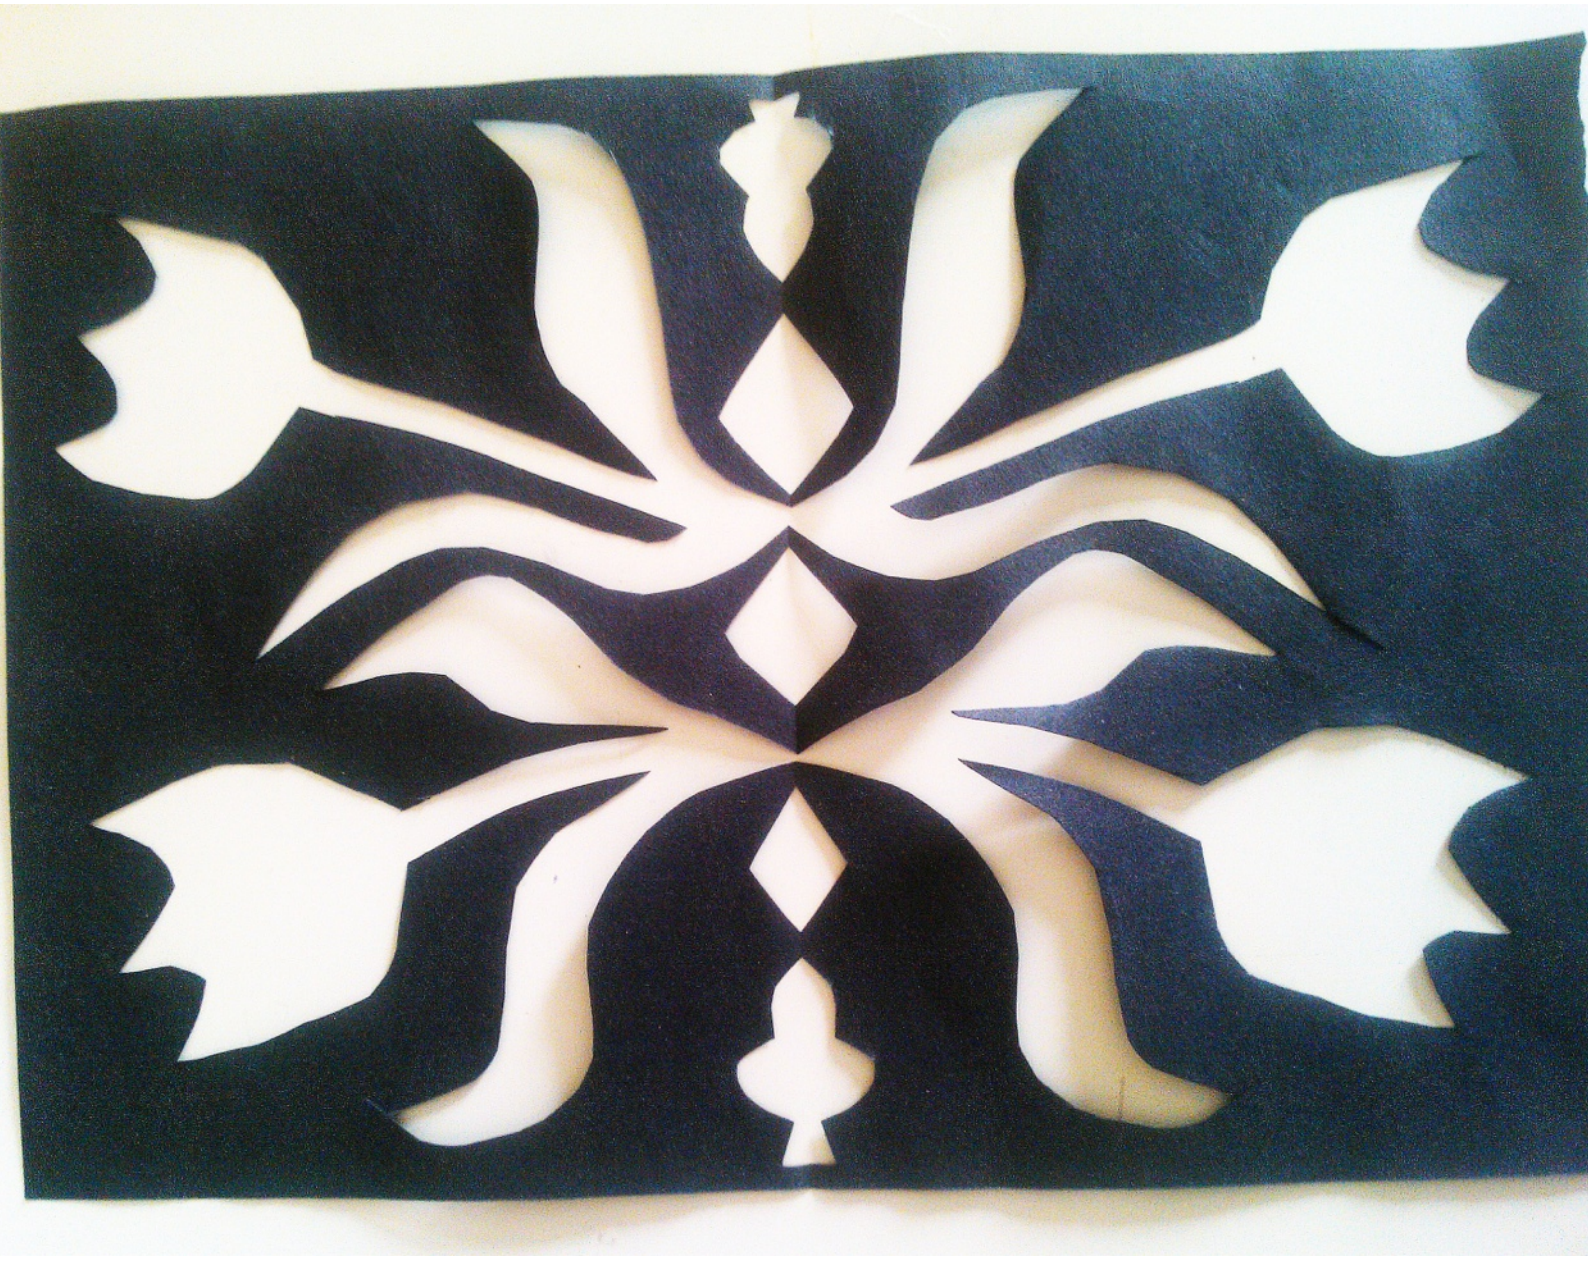

Once you are happy with your drawing start to cut it out

Then unfold it to see your design...ta-dah!!

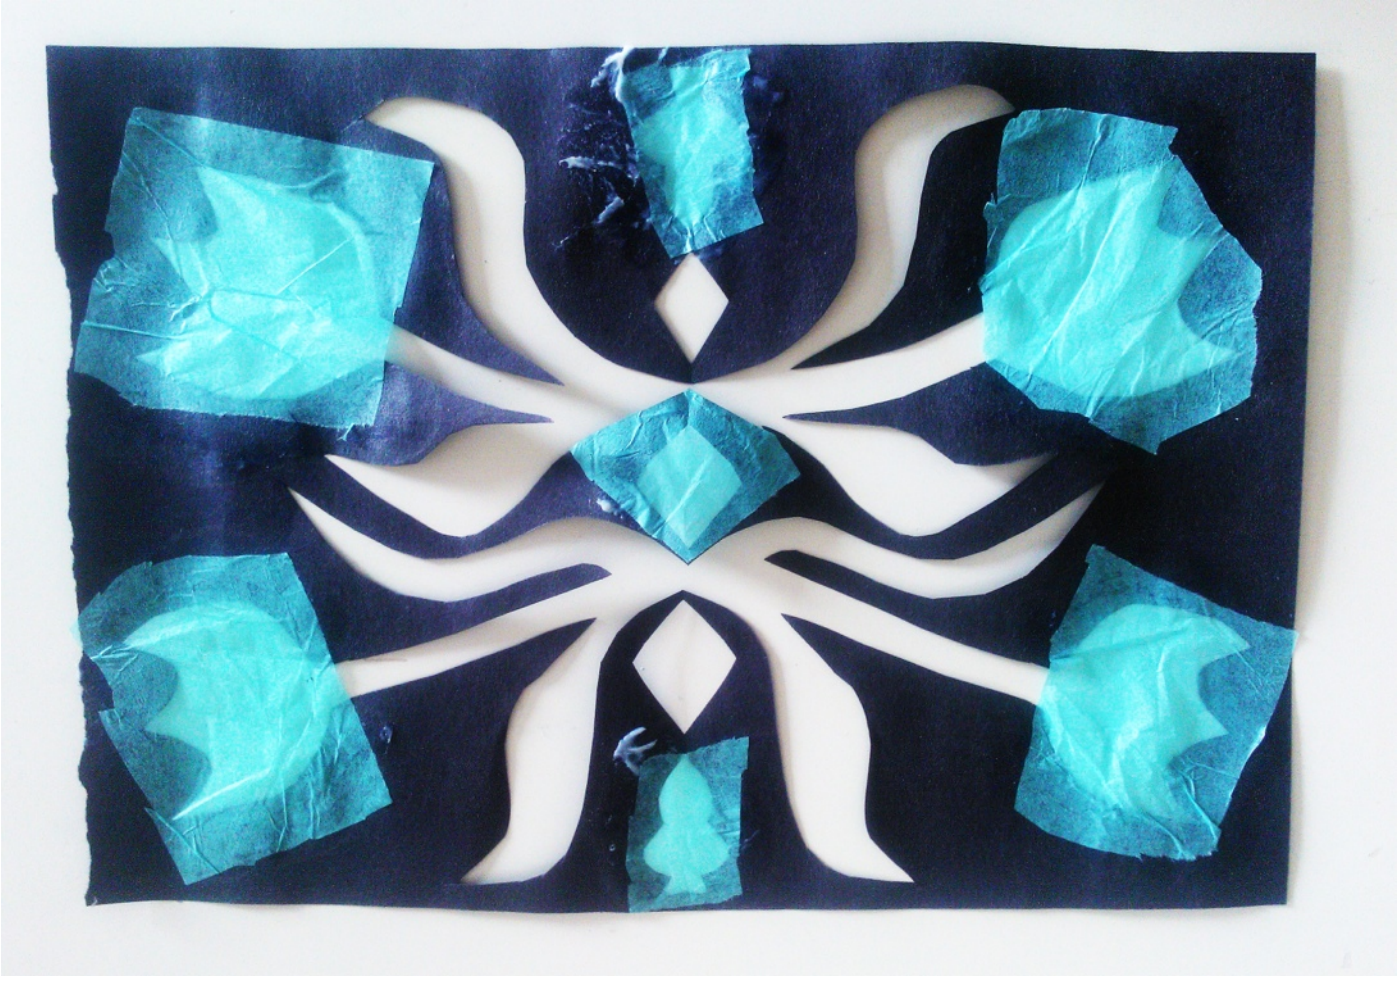

So now you can start to stick the tissue paper on, we started with the blue first trimming bits down to fit over the shapes of the flower heads and club shapes.

Don’t worry if it looks a bit messy, this is the back, no-one will see it and you can always trim it when you are finished!

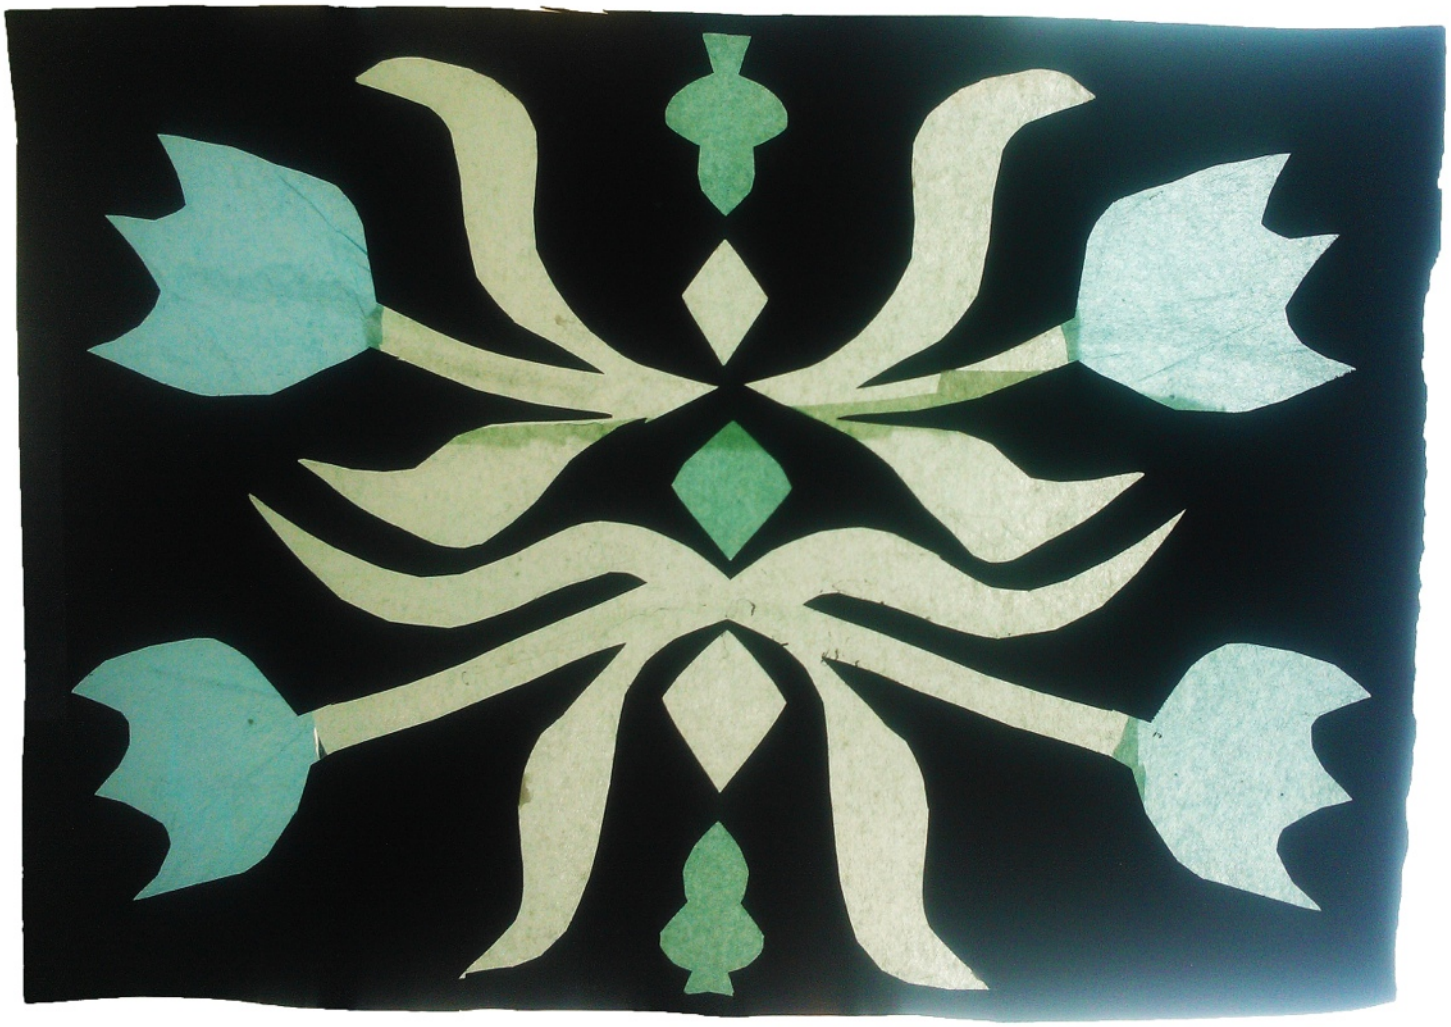

Now trim the green to fit in the spaces left over, you can have the colours overlapping if you would like as it can add to the intensity of colour but you don't have to! See what you think looks best

You can put your finished Sun Catcher up on the window to really make it shine!

Here are some other Sun Catchers we made to give you inspiration!
