Tree-mendous Wreaths

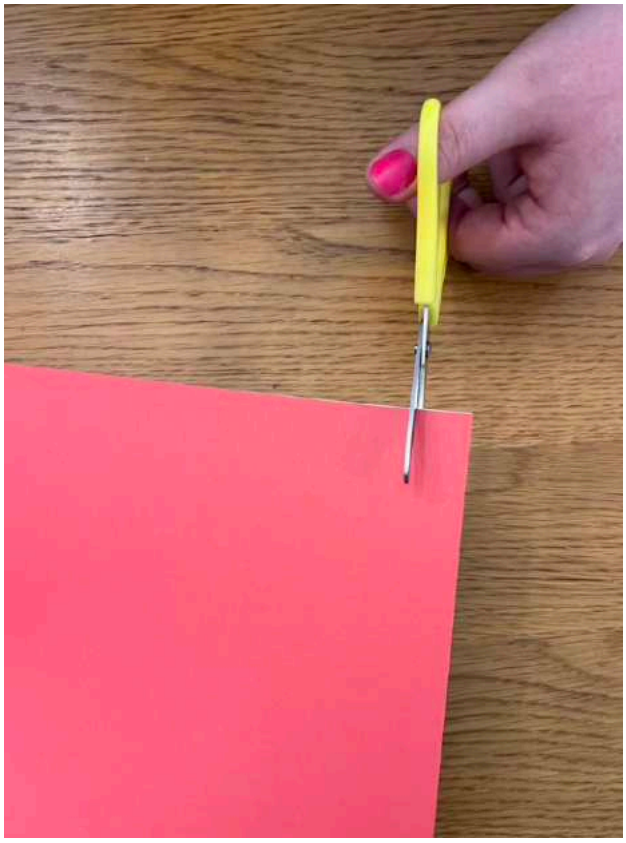

Using simple silhouettes why not create this festive Christmas Tree Paper Wreath to gift or adorn your home!

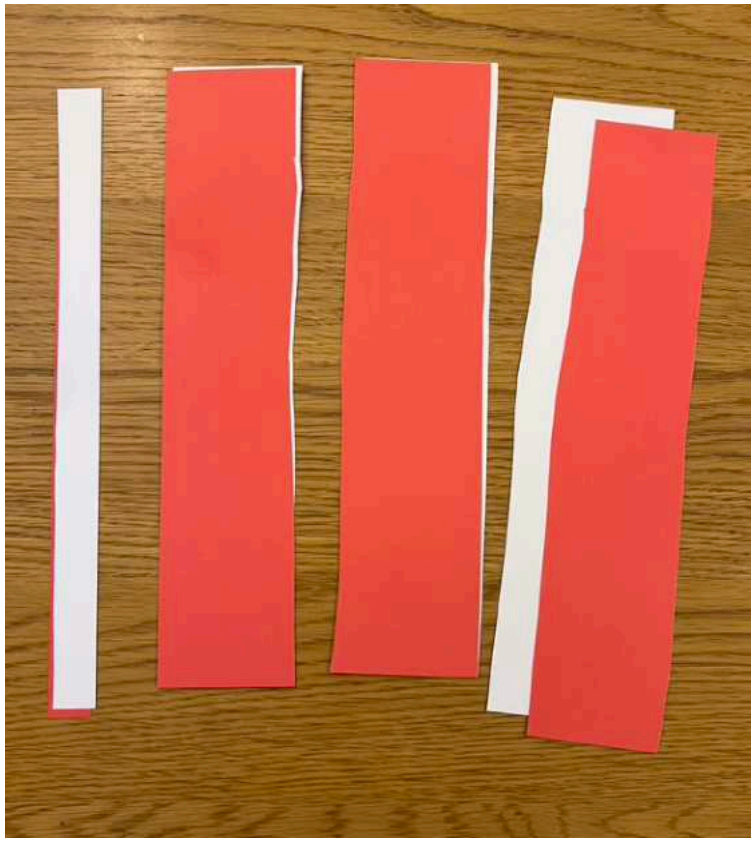

Tools and Materials:

- Coloured Paper
- Pencil
- Glue Stick
- Scissors

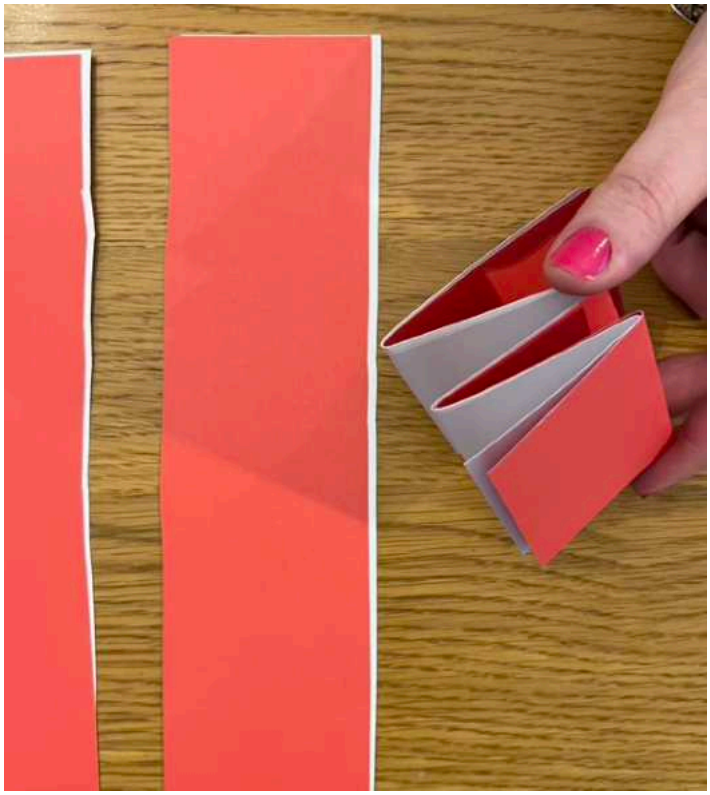

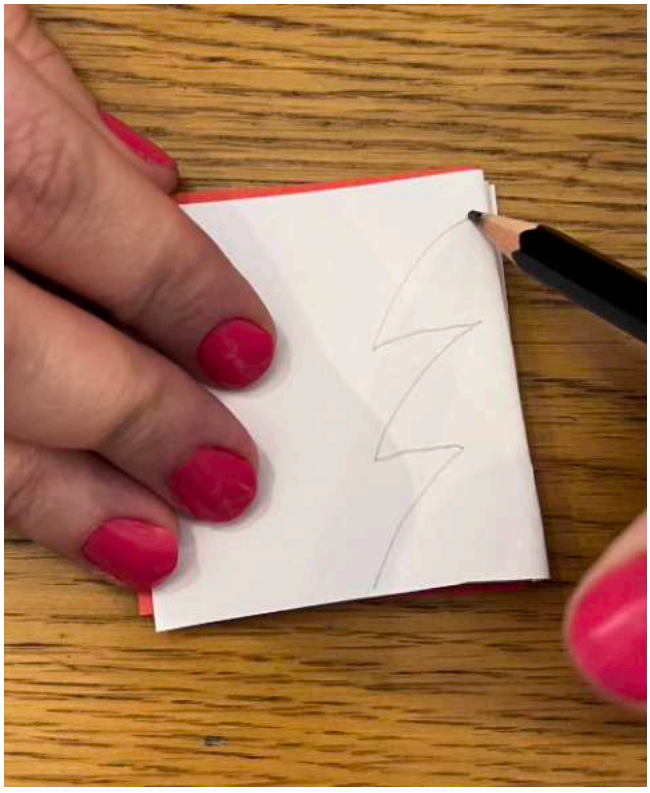

Taking the 2 sheets of paper you want to cut a slim strip off both and then equally divide the remainder into 3 pieces like so

Take the 3 strips (of the 2 bits of paper) and fold them like a fan to create multiple rectangles and then draw your trees

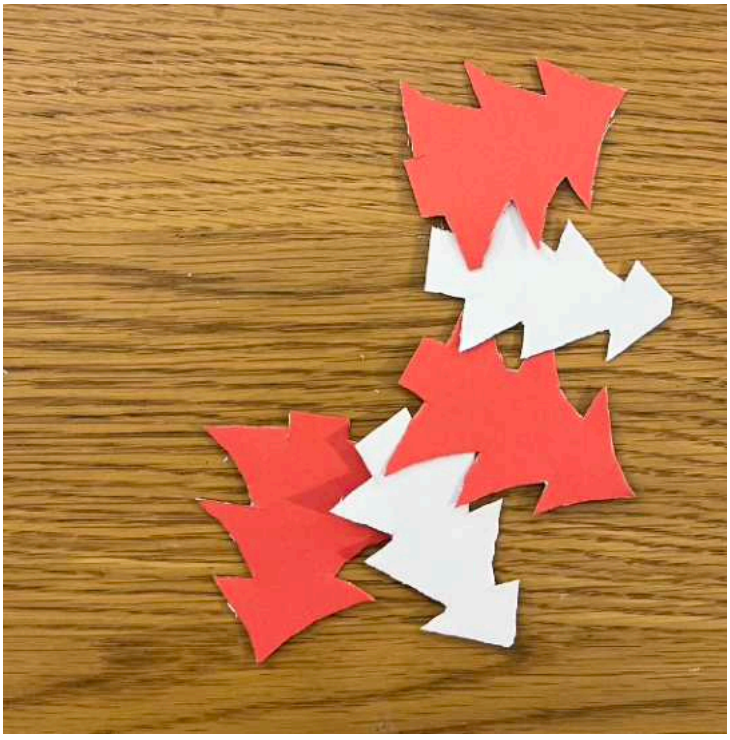

You should end up with your strips looking like this, once done then you can cut them out. The paper should be thing enough to cut them all at once, if not put less in the scissors and draw round other cut out trees for a guide

Start laying your trees out how you like to form a circle - we do this before gluing to work out the spacing

Once you are happy with the layout then you can start carefully gluing them together, gently so as not to knock them out of place!

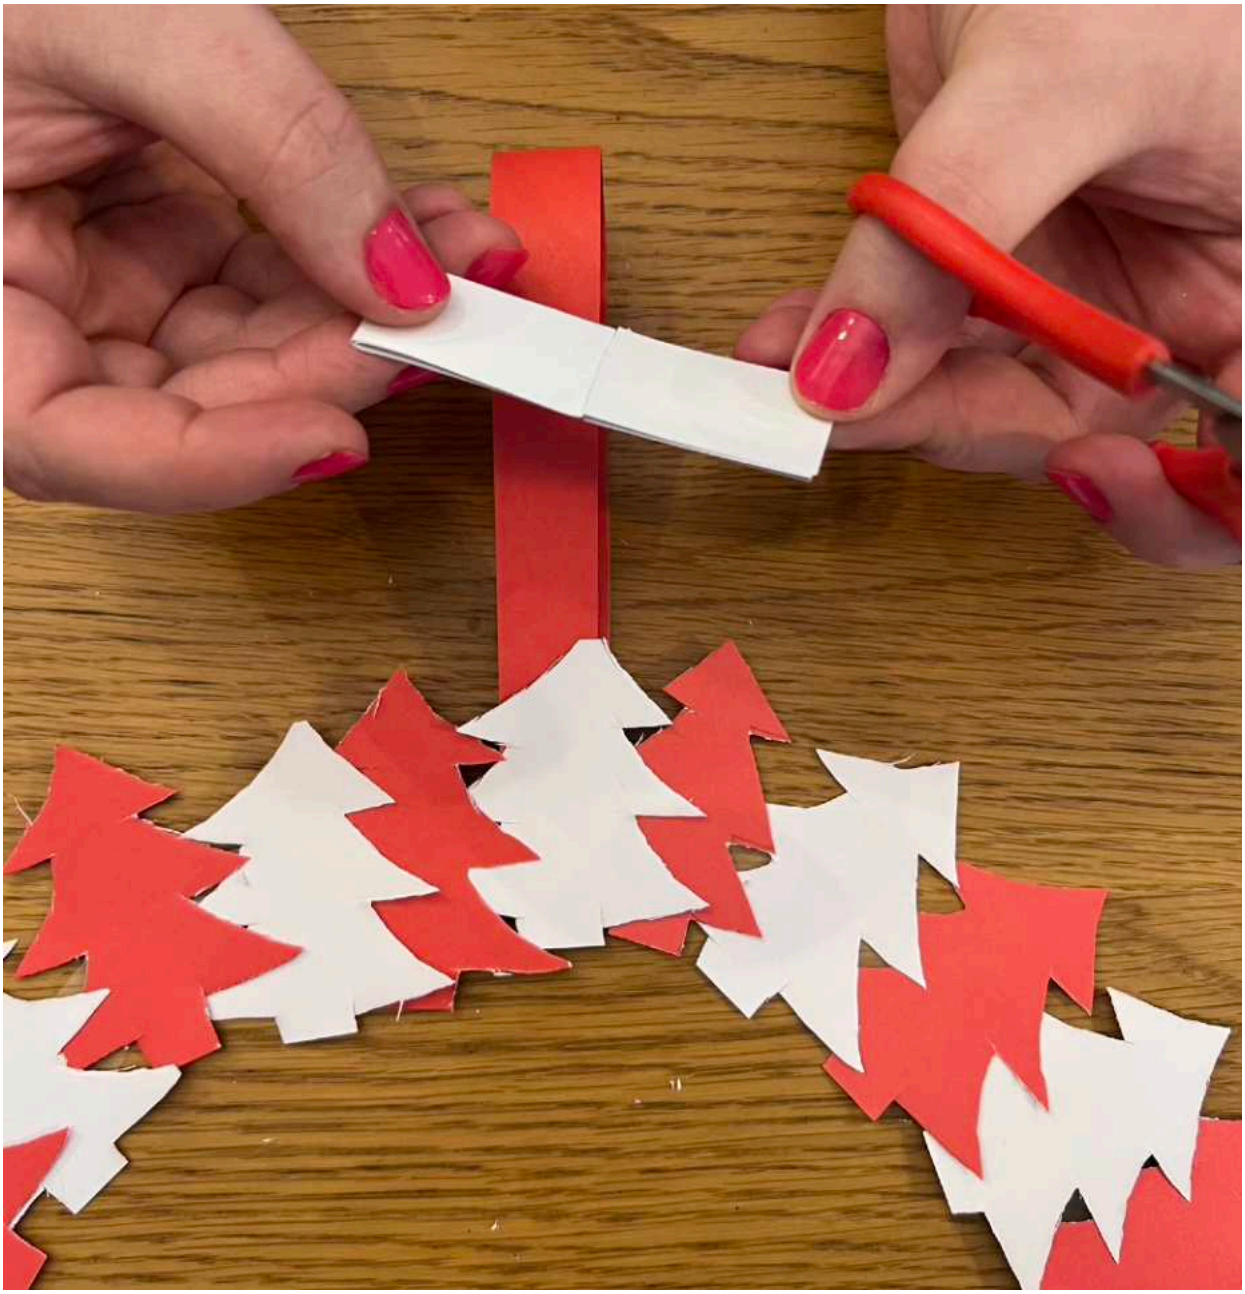

Take one of the slim strips you cut at the beginning and bend it to form a loop, glue the ends together and then glue it to the wreath. If you like you can also add sellotape to secure it

Using the other strip left we created spikes to dot around the wreath to break up the shape and add interest

There you have it your very own “Tree-mendous Wreath”!

Here are some others we made to inspire you!
