Twisted Tissue Paper Rainbow

In this teaching pack you can learn to make your own twisted tissue paper rainbow!

Tools and Materials:

- Tissue Paper (Red, Orange, Yellow, Green, Blue, Pink, Purple)
- Scissors
- Prittstick
- A3 White Paper

- Our tissue paper is roughly A3 size, don’t worry if yours is smaller or larger - you might just need to use more or less of it. Take your sheet and fold it in half long ways

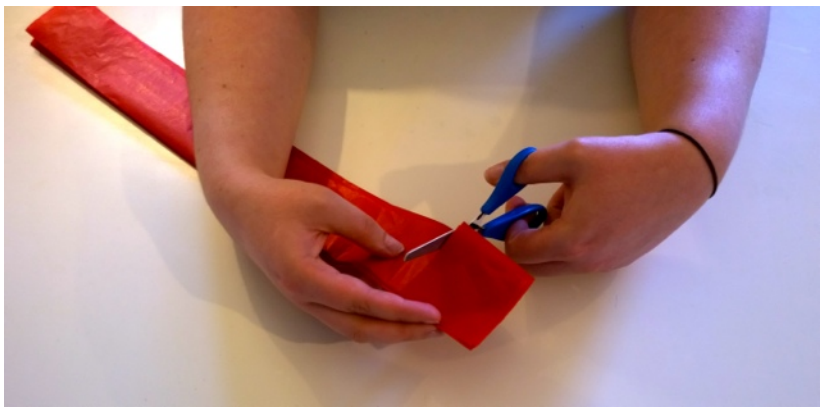

Then fold it over into thirds like so

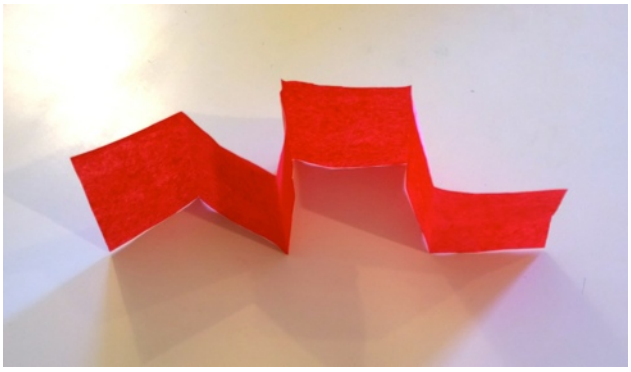

Once you have finished folding start cutting the tissue paper, you want to try and cut it into equal squares, don't worry too much about size though they don't have to be precisely measured!

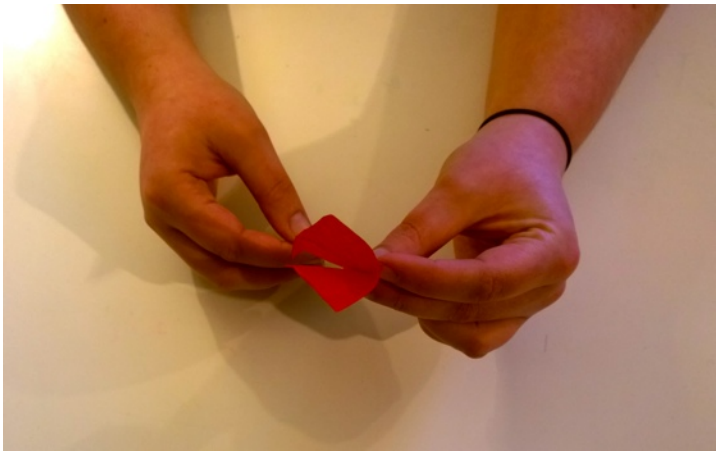

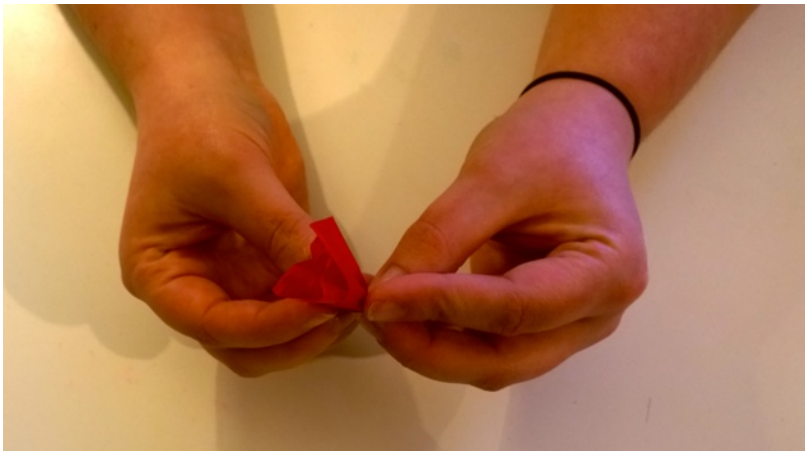

Once you have all your squares unfold the tissue paper - where it has been folded there should be lines, cut down these lines to create single layer squares. Repeat for the other 6 colours. You should end up with piles of tissue paper squares like so

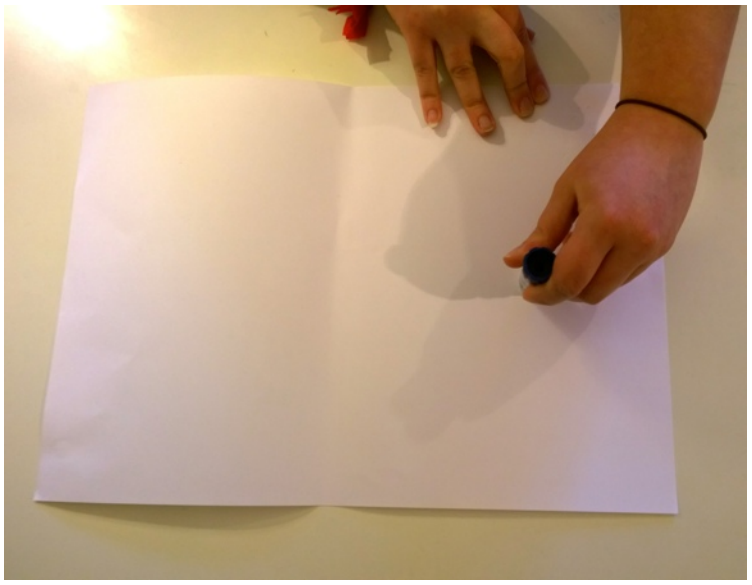

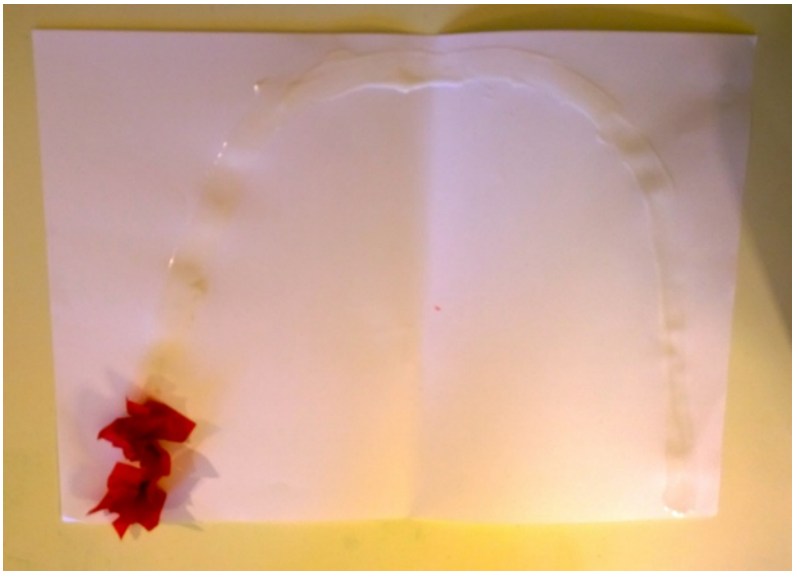

To make the tissue paper into the shape to stick on the paper you want to pinch it in the middle and pull up the sides so it almost looks like a flower

Now you can start sticking, use the prittstick and mark out a semicircle across the whole of the page press your tissue paper on to it

Do it colour by colour repeating the gluing and sticking

And there you have it your finished Twisted Tissue Paper Rainbow - now you have mastered this technique you can create other twisted tissue paper pictures!
