Under the Sea Collage

Celebrating the creatures that live under the sea why not create this mixed media collage of all your favourite sea life!

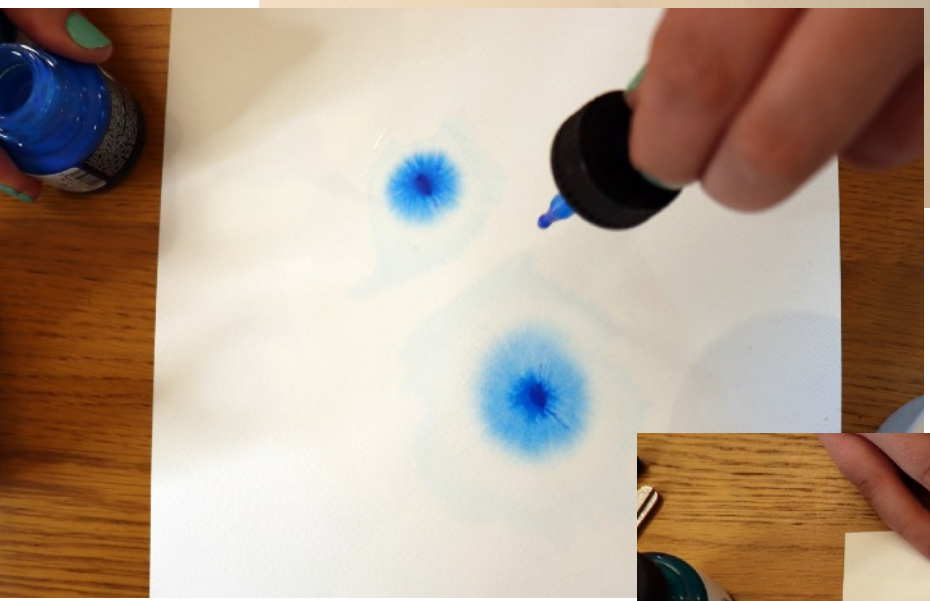

Tools and Materials:

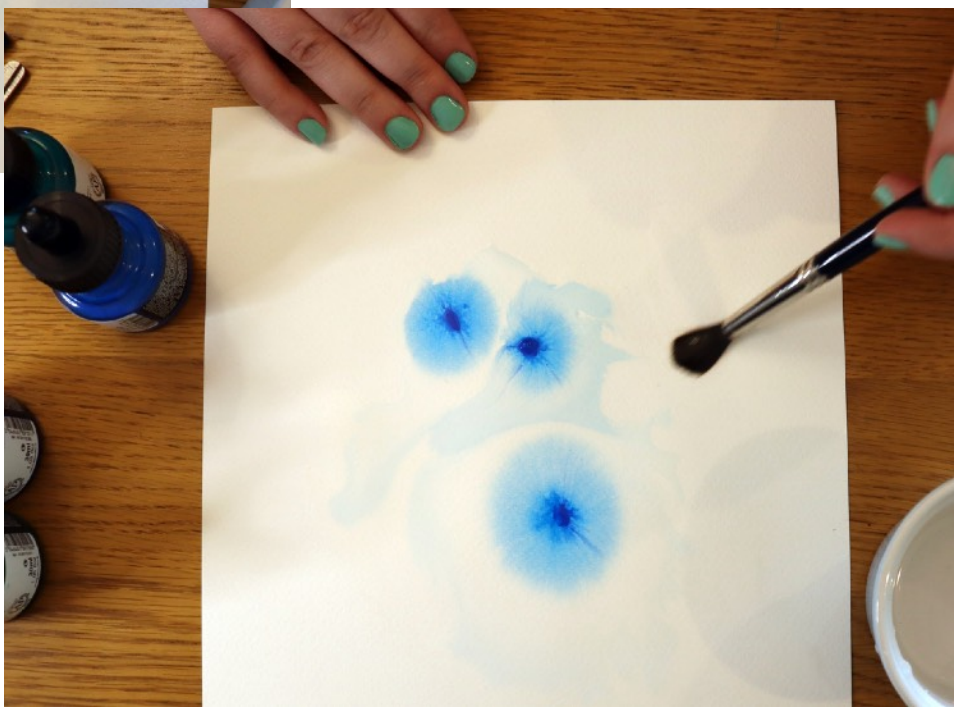

- White Paper
- Pencil
- Gluestick
- Scissors
- Ink
- Paintbrush
- Water
- Scraps of Coloured Paper

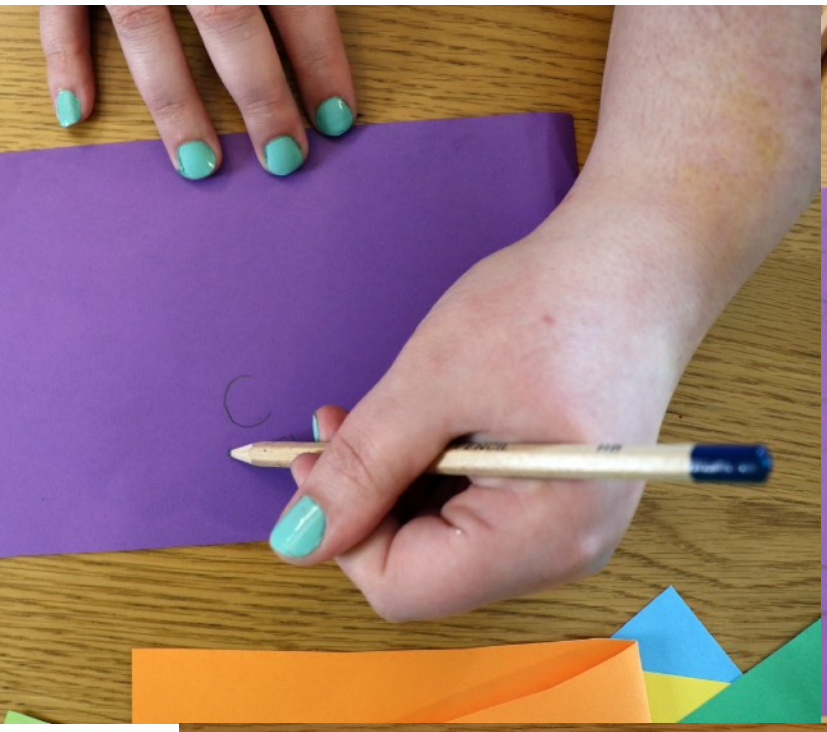

First of all to make your ocean background, if you don’t have inks you can use watercolour instead - wet the page all over so you can drop ink on it and it will diffuse across the paper and look a bit watery - then go back over it with a paintbrush to move the ink around

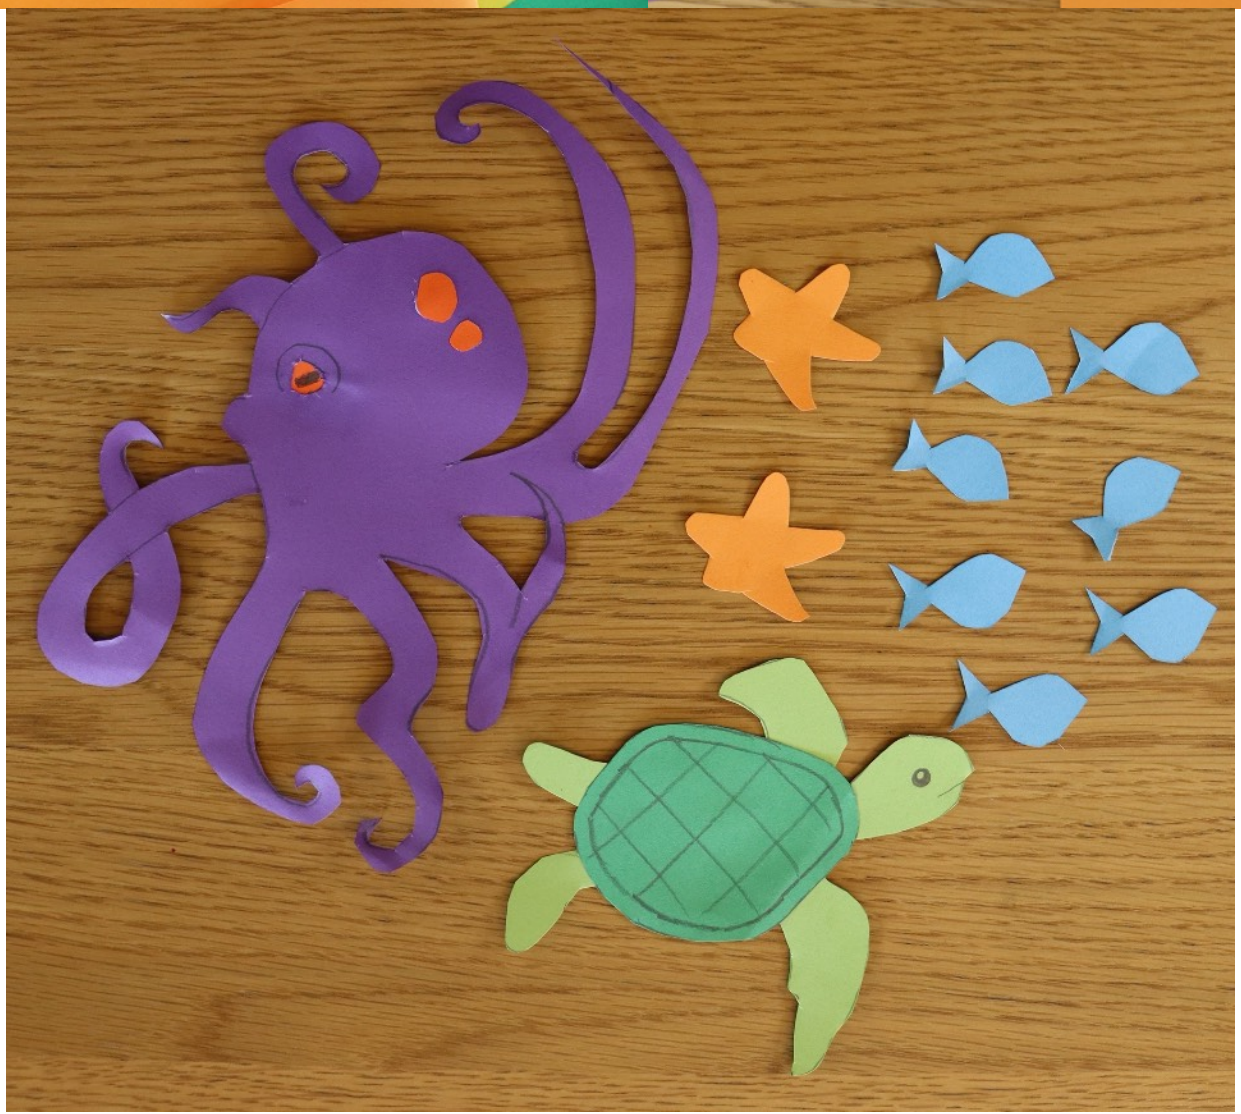

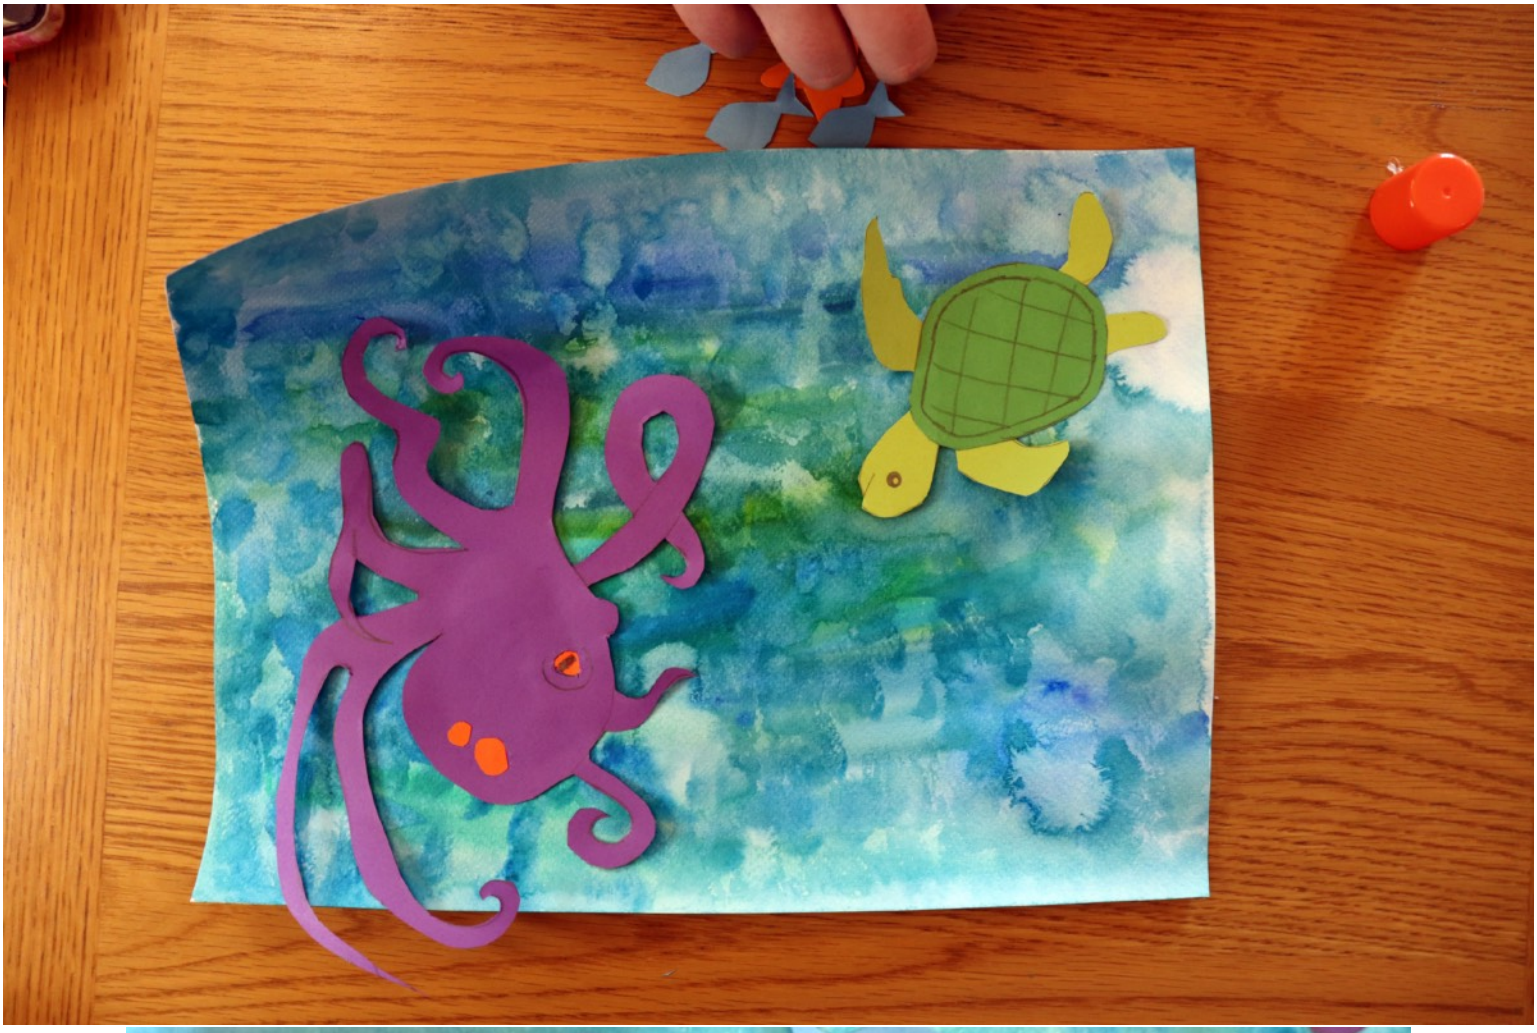

Keep layering the background up with different colours until you are happy with it and leave it to dry - taking your scrap bits of paper start creating your sea creatures or even plants if you like, sketch then cut them out

Start gluing the different elements on - once glue on sea if any need additional details added with pencil, we gave our small fish eyes, fins and lips

There you have it your very own “Under the Sea Collage”!

Here is another we made to inspire you!
