CoolitArt

Upcycled Homework Tidies

Tools and Materials:

- Scissors
- Prittstick
- Sellotape (not pictured)
- Pencil
- Cereal Box (one cereal box makes 2 homework tidies)
- Paper to collage

To start this project you need to cut your cereal box carefully into a triangle shape, straight lines horizontally across the smallest sides, diagonal lines on the largest sides like so. Cut the straight line across the small side first, one third up from the bottom of the box

Then cut diagonally up to one third down the top of the box

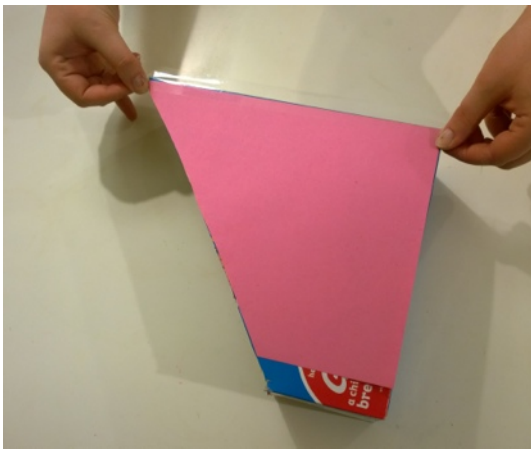

Repeat on both sides you should end up with two boxes like below

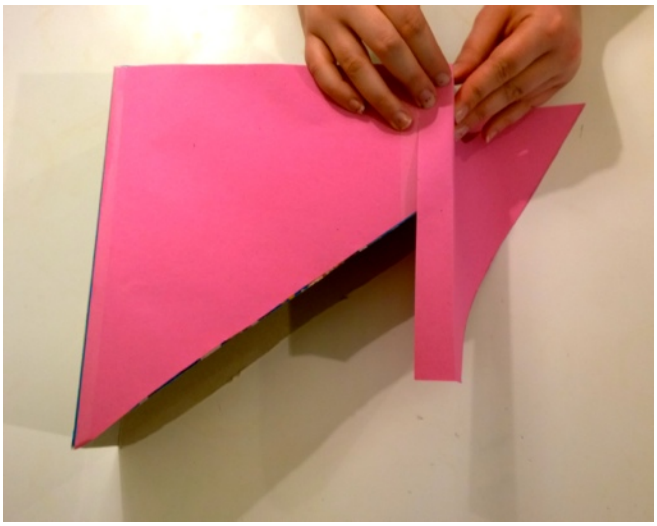

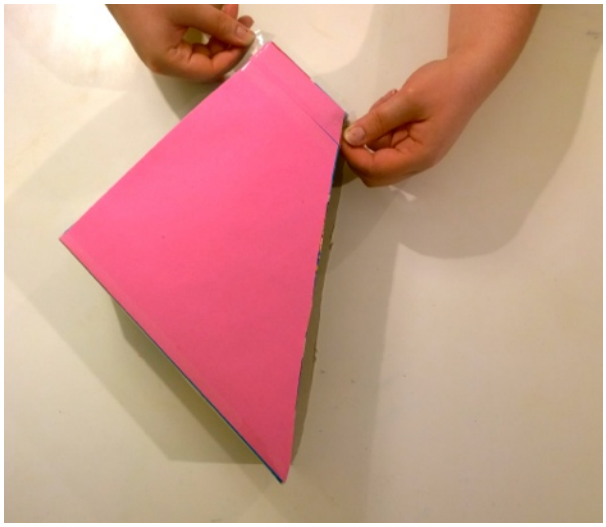

Measure out the paper to cover your box and stick it on

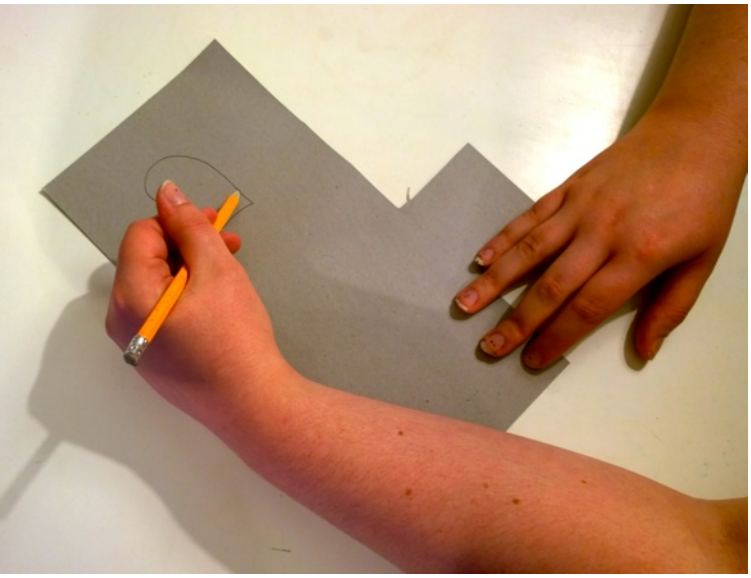

Don’t worry that there is a bit missing you can use another bit of paper to fill it in like so

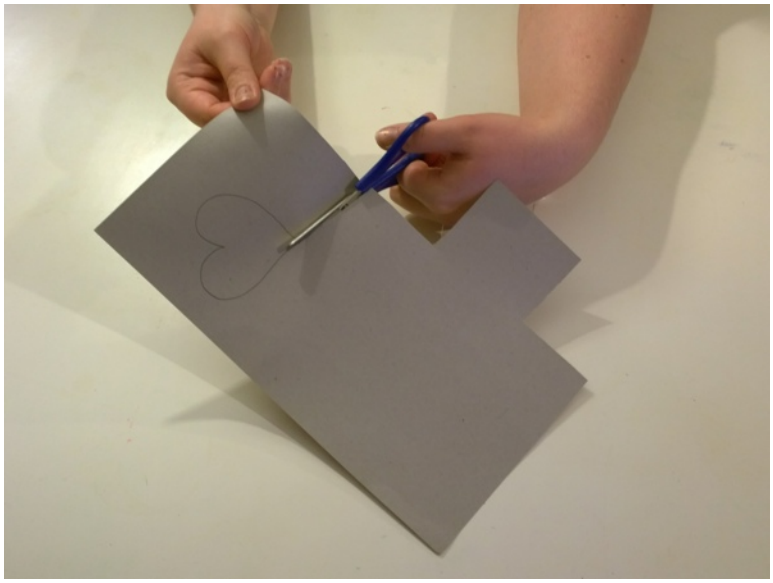

Once you have done one side, do the other three in the same way, you can do the bottom of the box if you want but as no one is going to see it but we wouldn’t worry too much about it!

Now for the creative part, decorating your homework tidy! Draw out some shapes to stick on if you are using multiple colours you can be really adventurous in your design!

Then all you need to do is stick them on!

There you have your finished homework tidy!

Here is another one we made to give you some inspiration!
