Valentine's Coupons & Holder

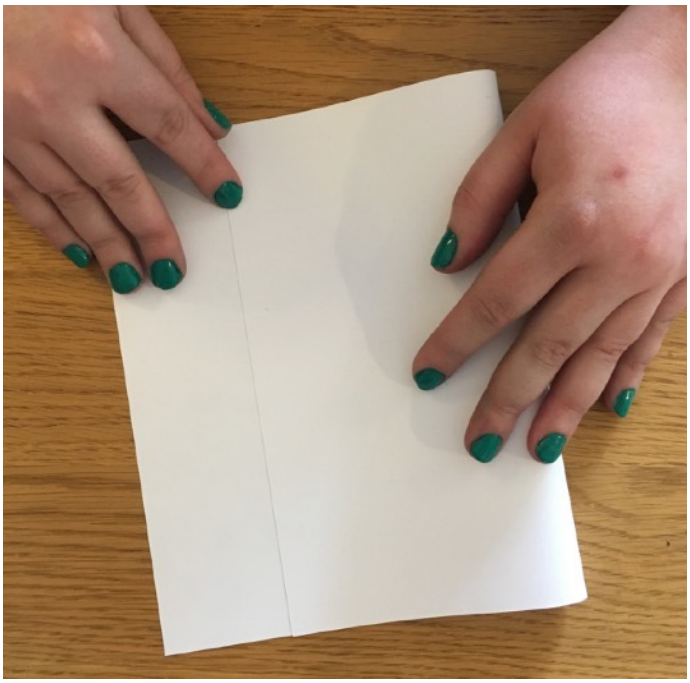

Thinking about Valentines day and all those who are important why not create coupons to show how much they mean to you!

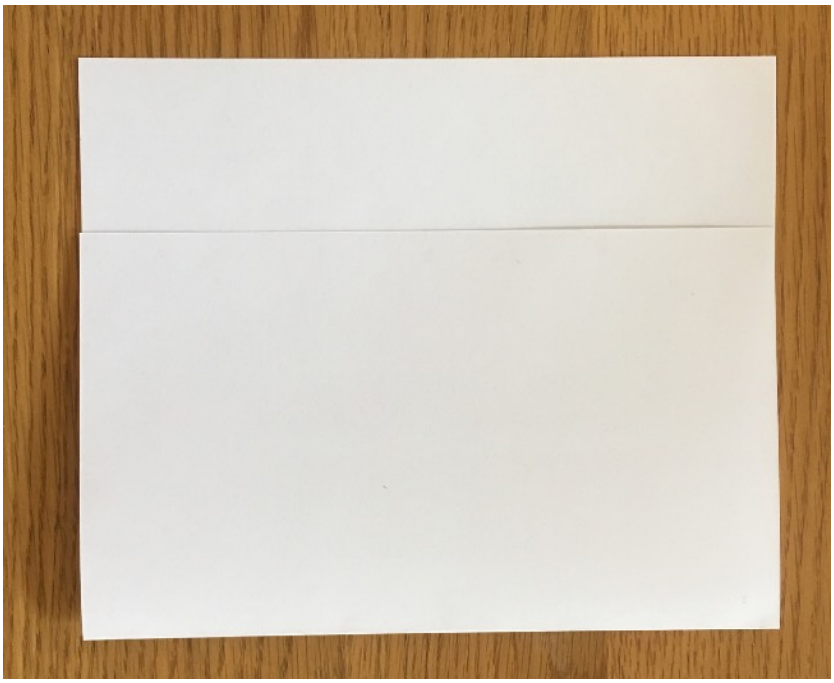

Tools and Materials:

- Paper
- Felt Tips
- Scissors
- Sellotape

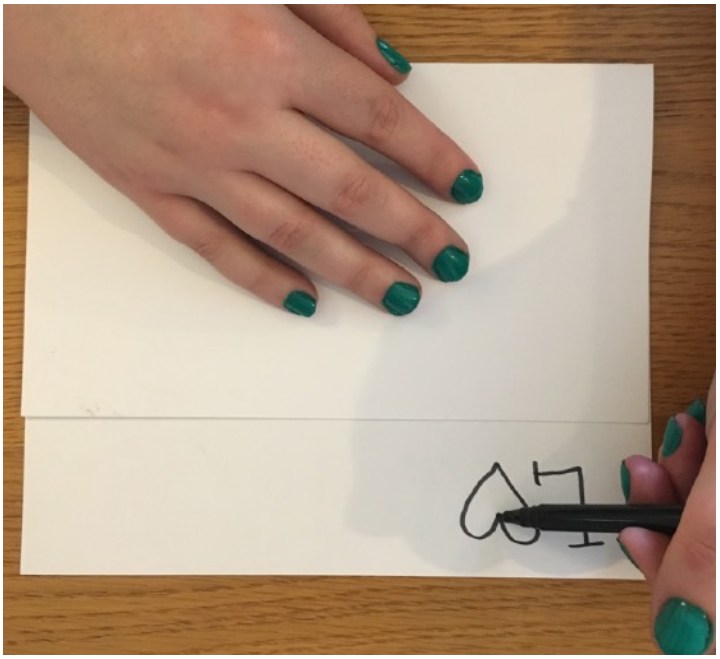

Take your paper and fold it in half - we used A3 but A4 would work too, we are going to fold it but not exactly in half - but so it has a sticking out edge large enough to write on like so

Then you can start decorating any design you like! Either a Valentine's Day message or "Love Coupons" and things you or whoever it is intended for likes. You could do one for your family to share!

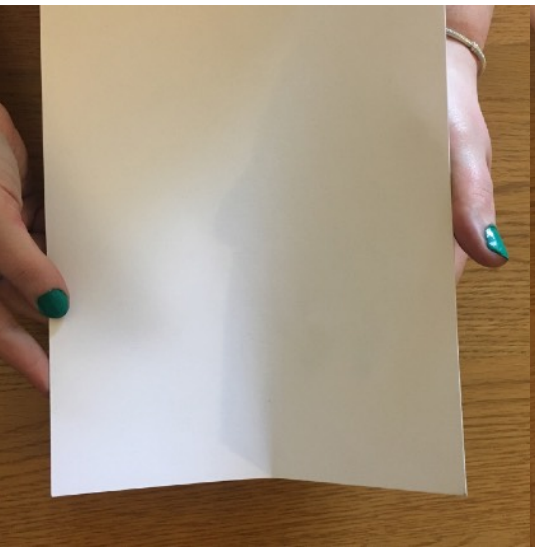

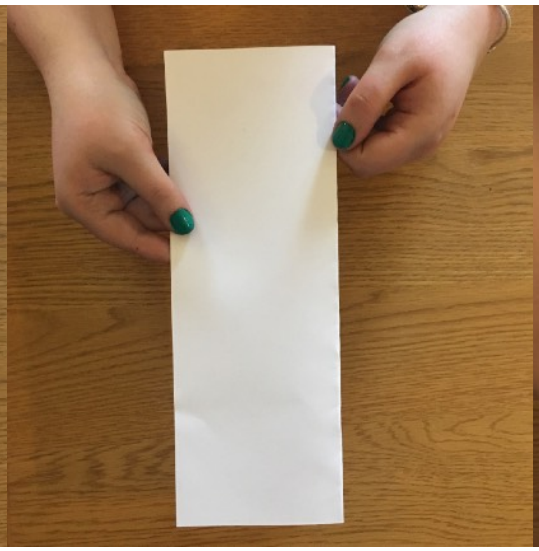

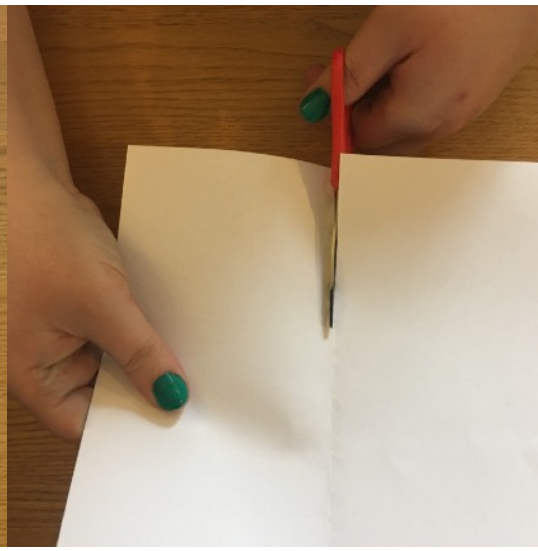

Once you are happy with your design you can colour it in

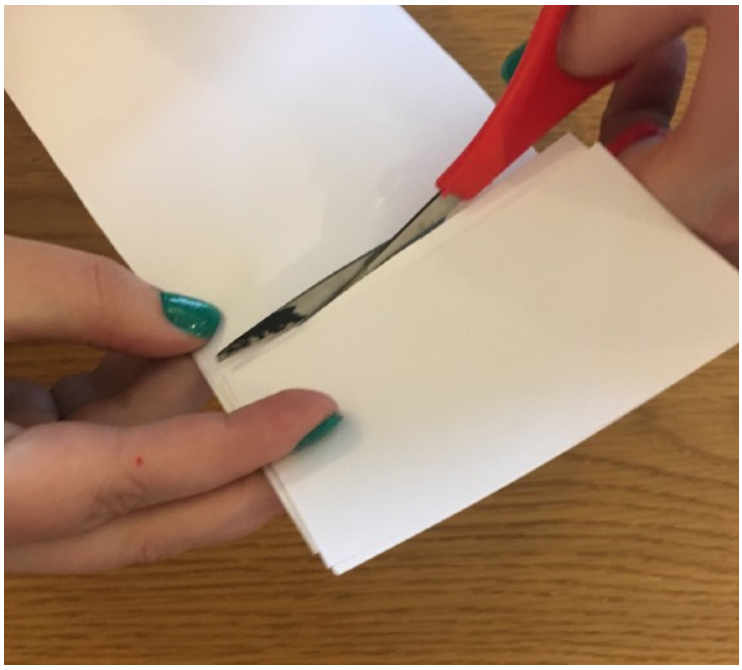

Now to create your coupons - taking your other piece of paper, fold it in half long ways and cut it down the fold

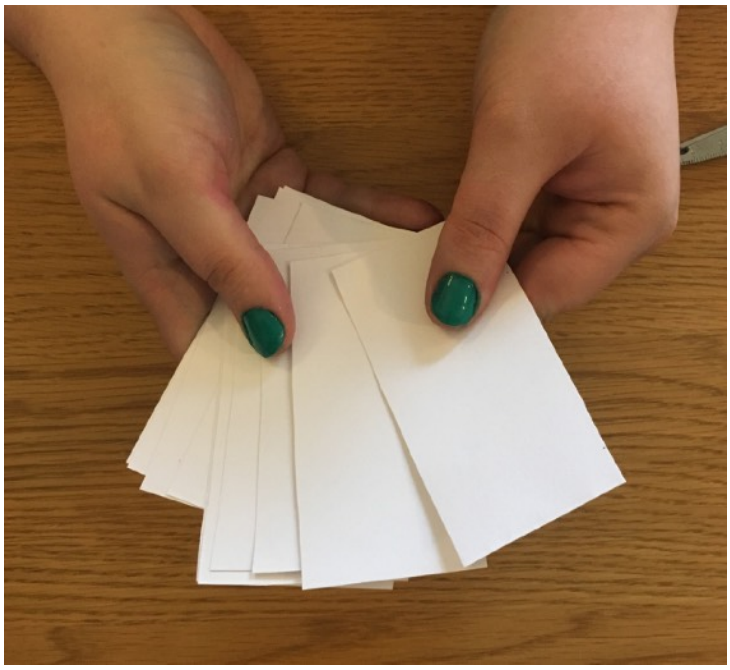

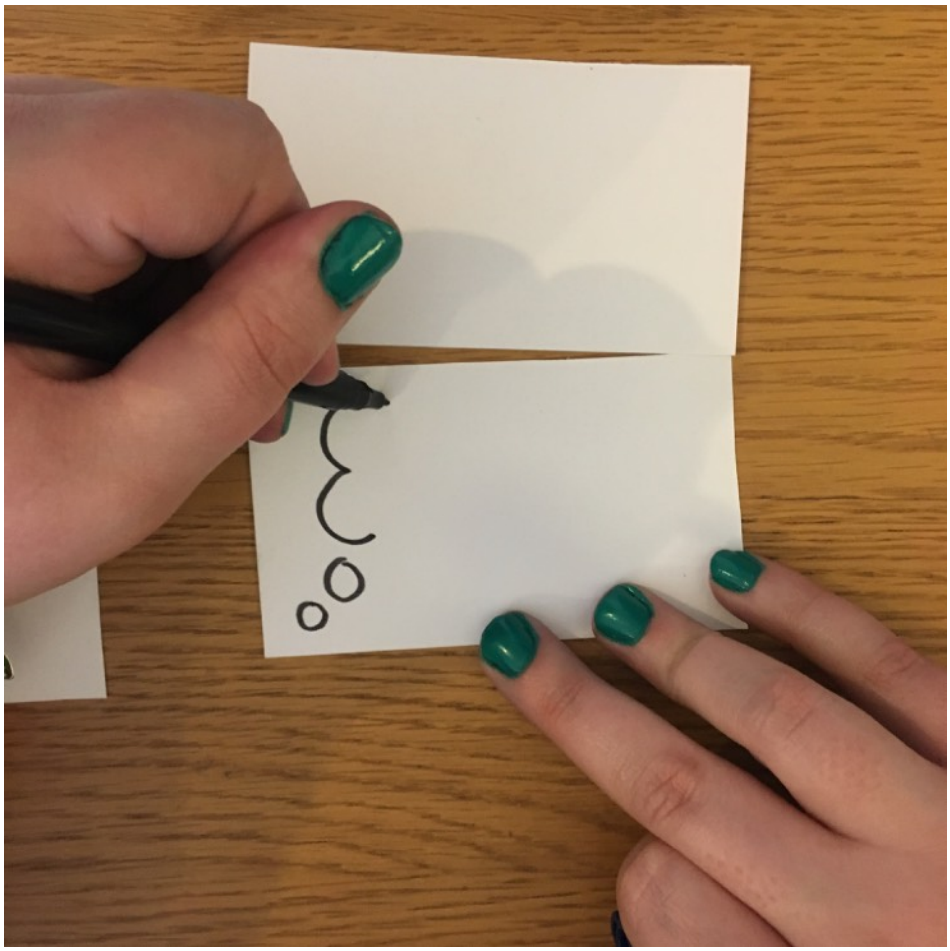

Put your 2 long pieces of paper on top of each other and cut into smaller rectangles to create your coupons

So what kind of kind things could you do for your family? Write out some things you could do so they can use them to give you when they want you to do it

Lastly we need to tape the sides of our holder so your coupons don’t fall out!

And there you have it your very own Valentine's Coupons & Holder!

Here are some others we made to inspire you!
