Vegetable Printing

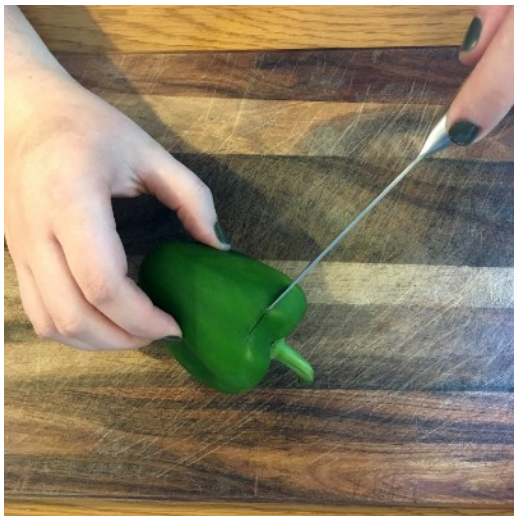

This is a fun way to explore what shapes vegetables can create naturally or being cut into certain shapes to print!

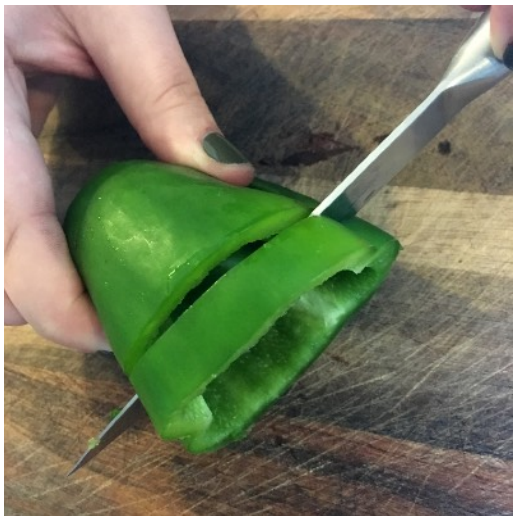

Tools and Materials:

- Mixed Vegetables
- Paper
- Kitchen Knife (maybe get a parent to help cutting!)
- Paintbrush
- Paint (poster or acrylic)
- Chopping Board

First of all you need to get your vegetables and cut them up - some have natural shapes hidden in them - some you can transfer into shapes like so

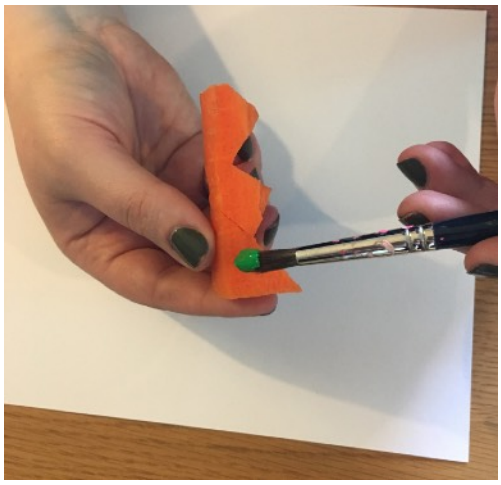

Once you have all your vegetables cut into the shapes you want have a think what you might want to create!

Once you've decided start painting them and printing them on to your paper like so

And there you have it your very own “Vegetable Print”

Here’s another we created to inspire you!
