Watercolour & Pen Drawing

This simple technique gets you thinking about how different mediums work together, watercolour which can be loose and pen to define planes of colour

Tools and Materials:

- Paper
- Pen (an ink rollerball or fine liner style, though biro also works)
- Paintbrush
- Water
- Watercolours

This technique is great for a whole variety of subject matters from portraits to landscapes or more detailed patterns. You can put water over the paper before adding paint on to give a more diffused effect. We thought a coastal scene would be fun! Add in the different blocks of colour like so, thinking about shading and highlights

Once it is fully dry then you can add in the fine details that you didn’t with the paintbrush. You can think about different mark making to suit the shape or texture - like spiky movements for the grass etc

There you have it your very own
“Watercolour & Pen Drawing”!
