

Chinese NY: Year of the Pig

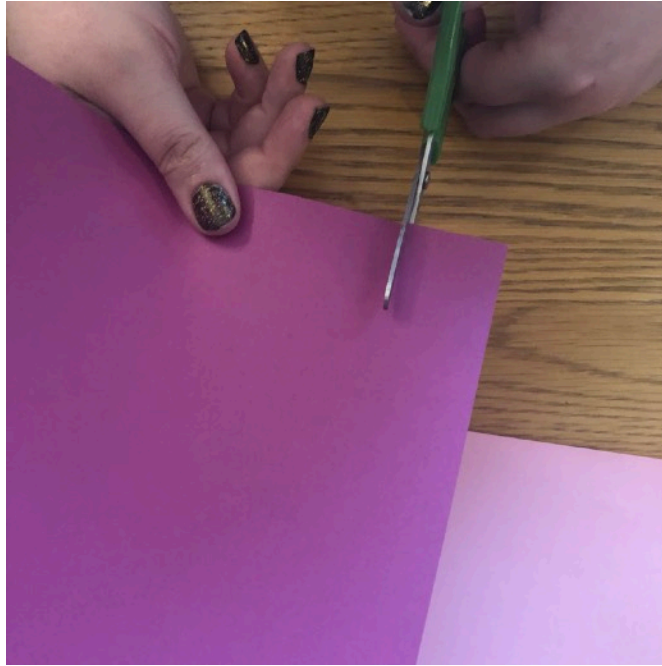

To celebrate Chinese New Year and the Year of the Pig why not create your own paper pig decoration!

Tools and Materials:

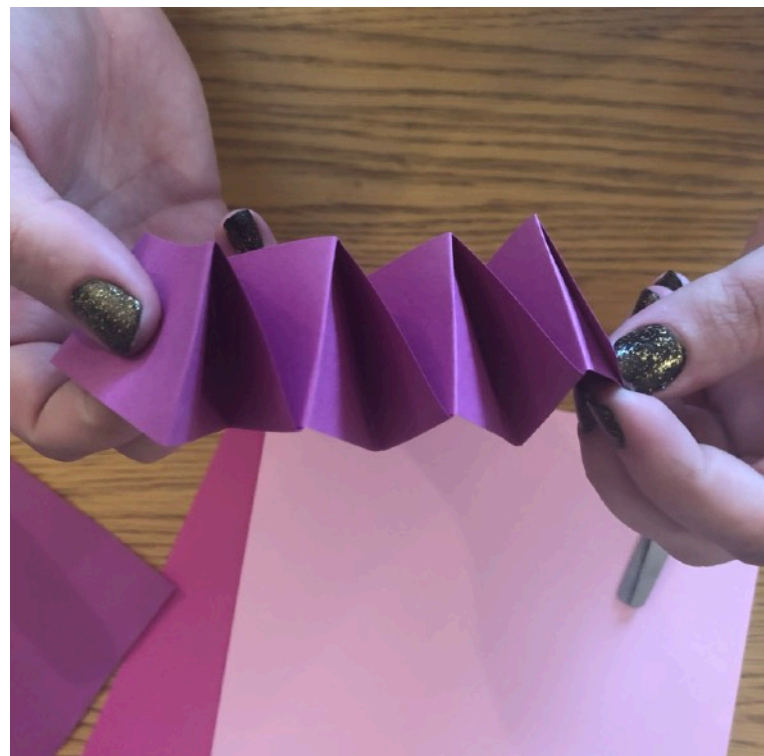

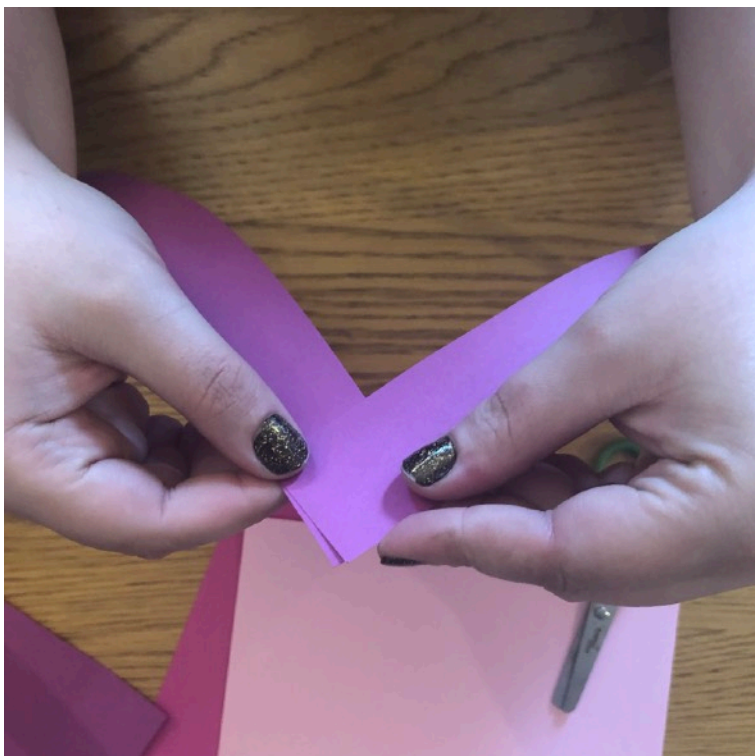

- Coloured Paper
- Gluestick
- Scissors
- Pencil

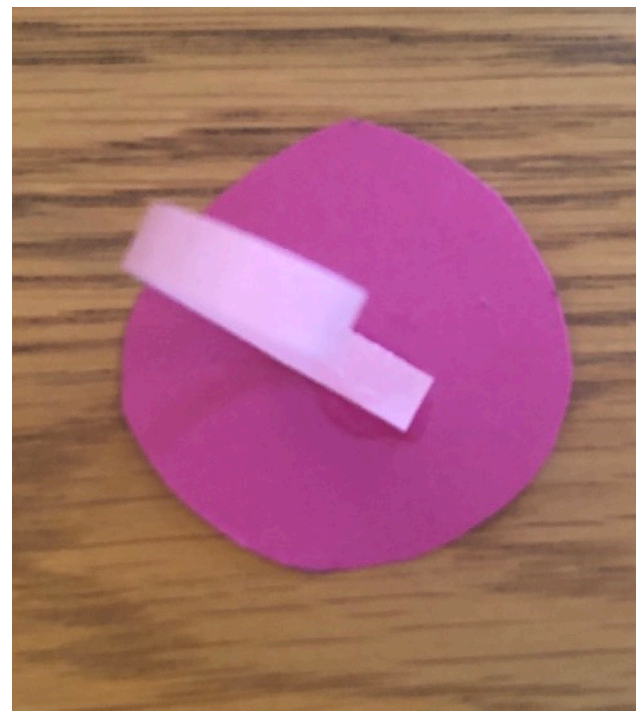

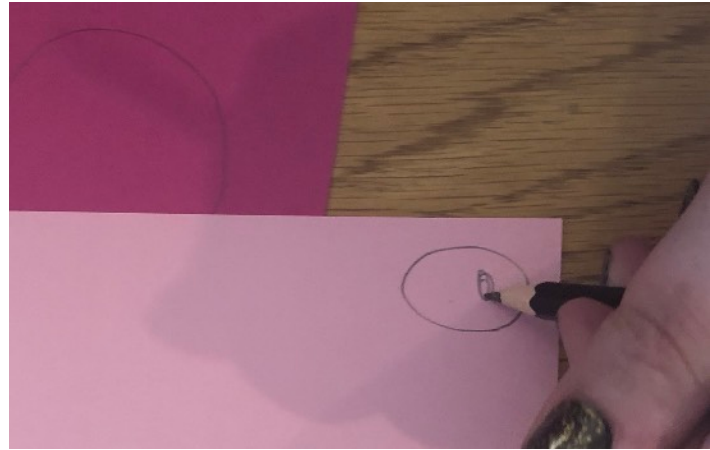

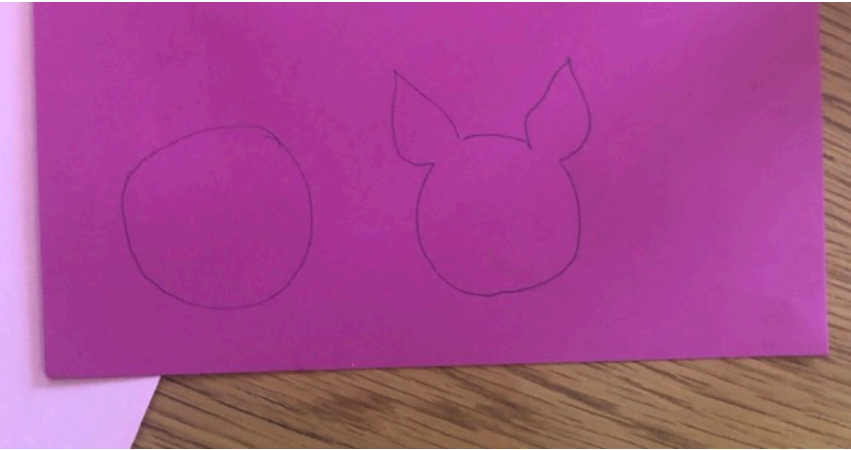

We chose shades of pink for our pig you can choose whichever colours you like! First thing to start with is the body which is a spring - chose the colour you want to use and cut two long strips of it using the whole length of the paper making them the same width.

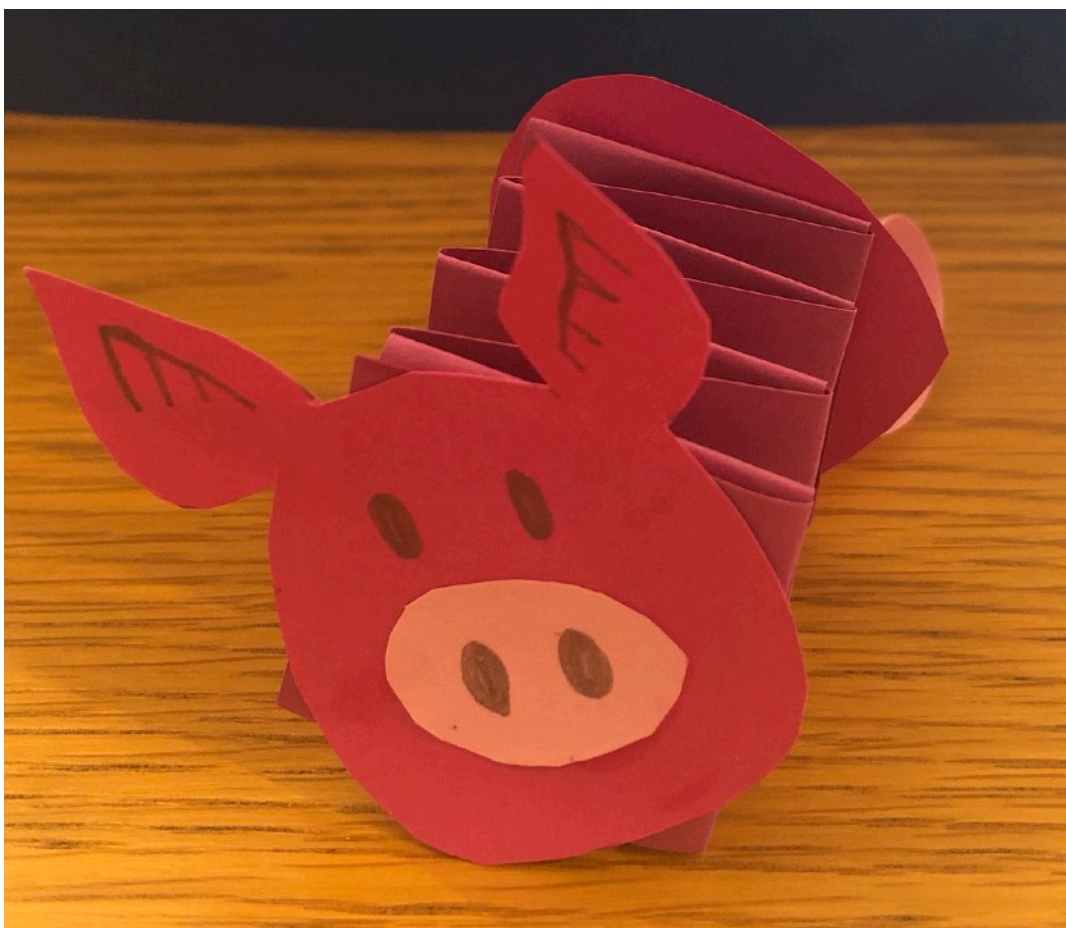

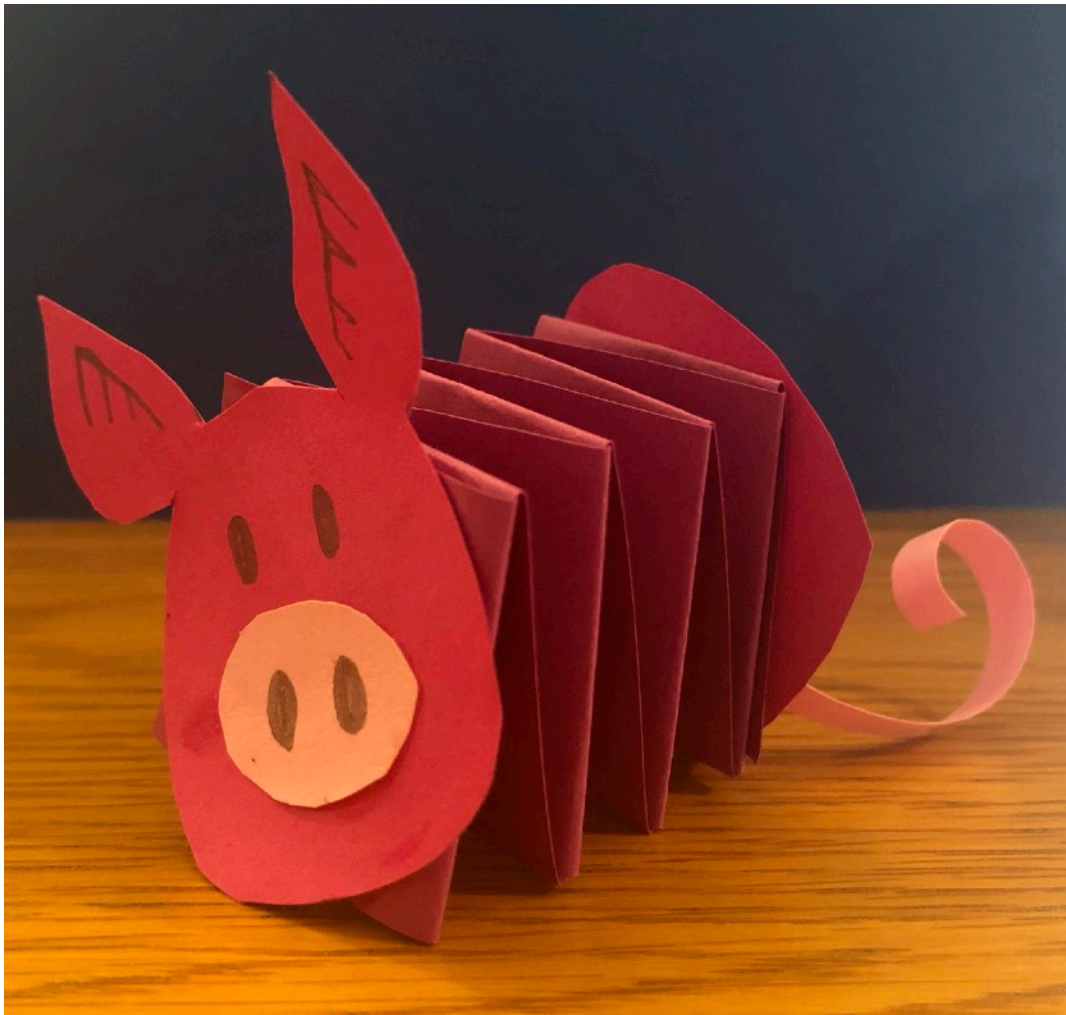

Take the two strips and lay them over each other to form a right angle (like half a square) then fold them over each other until you form a spring

Once you are happy with your spring glue the ends to secure it. Then onto the face and tail - cut out two ovals to create them and think what you need on them. The face needs a snout and the back needs a curly tail!

There you have it your own "Chinese NY Pig"

Here is another we made to inspire you!
