All About Neon

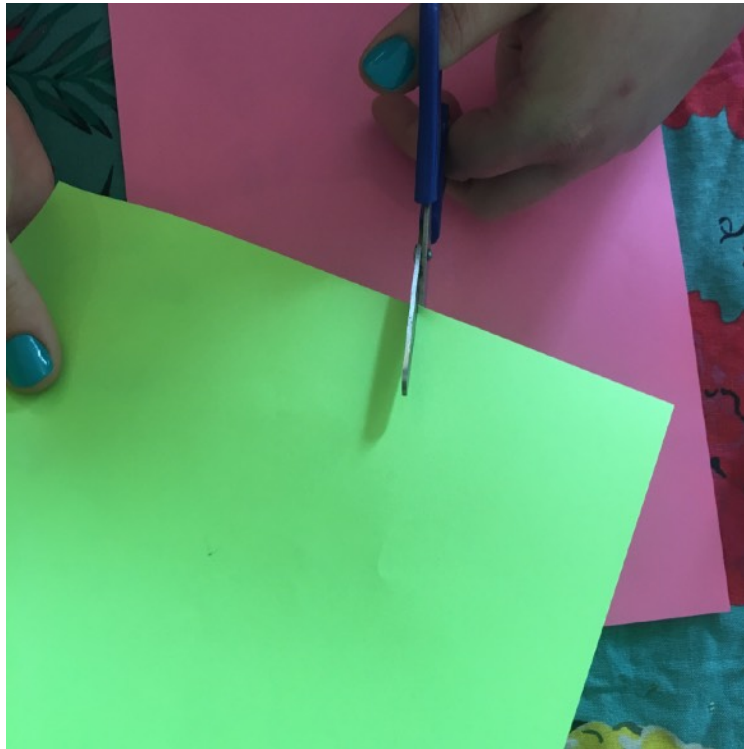

Why not take inspiration from a limited neon colour palette and create a neon collage! Thinking carefully about what colours you can use and where to place them to create your artwork!

Tools and Materials:

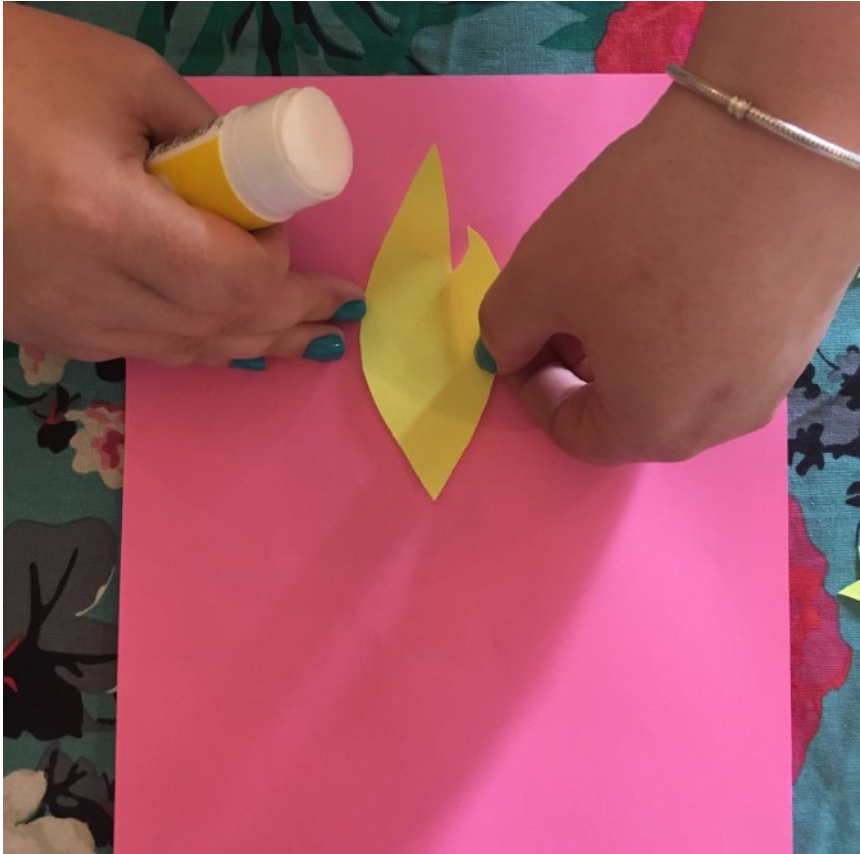

- Neon Paper
- Glue Stick
- Scissors

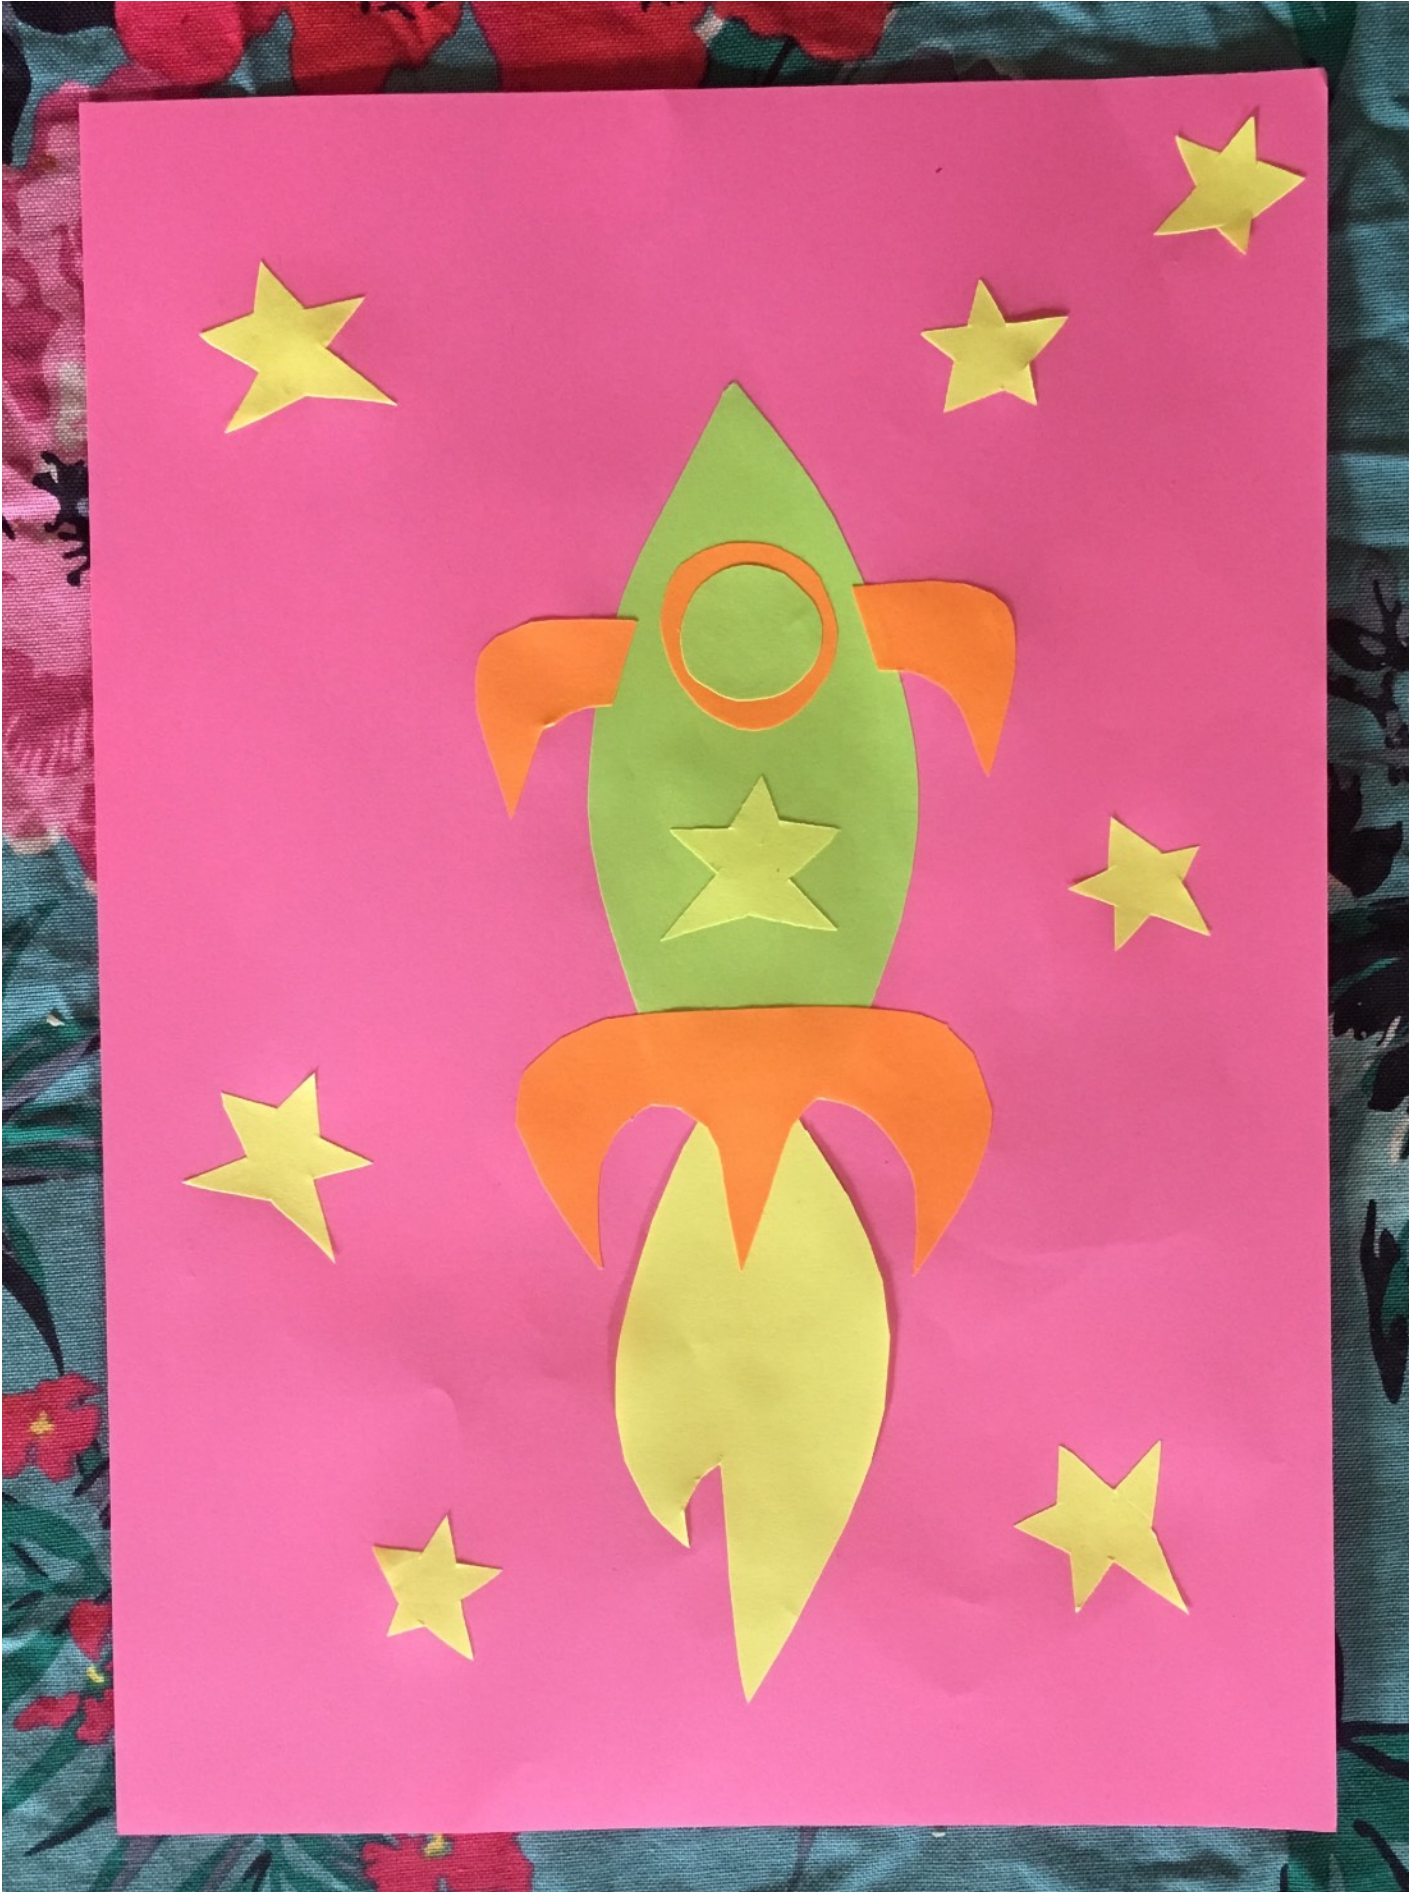

First of all think what you want to make - we are just using 4 colours which does make it a teeny bit trickier but not impossible. What inspires you in general plus what does neon make you think of? We got inspired by a rocket in space! To make it even trickier we didn't use a pencil so you have to visualise the shapes you want to cut out like so

Once you have all your shapes you can start to arrange them to be stuck down to create your image

There you have it your very own "All about Neon" Collage

Here is another we made to inspire you!
