## Hanging Mobiles

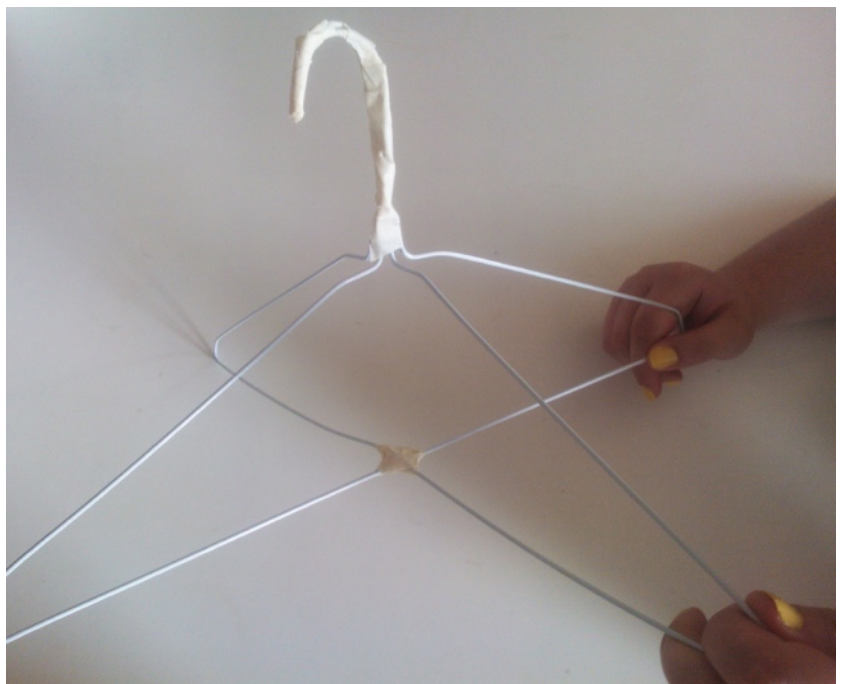

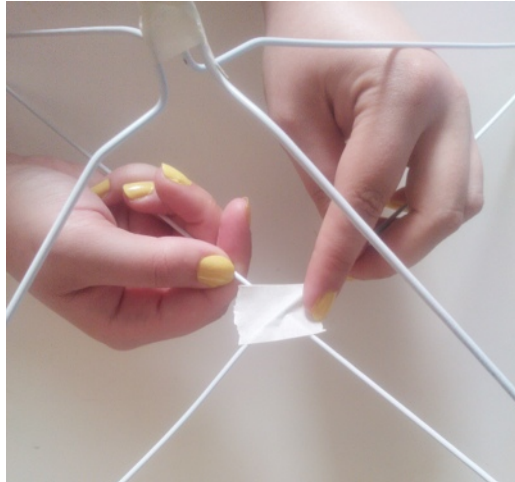

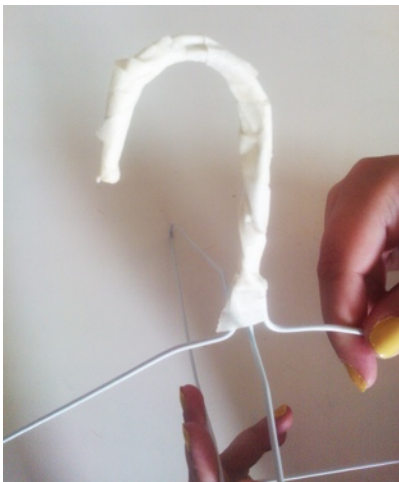

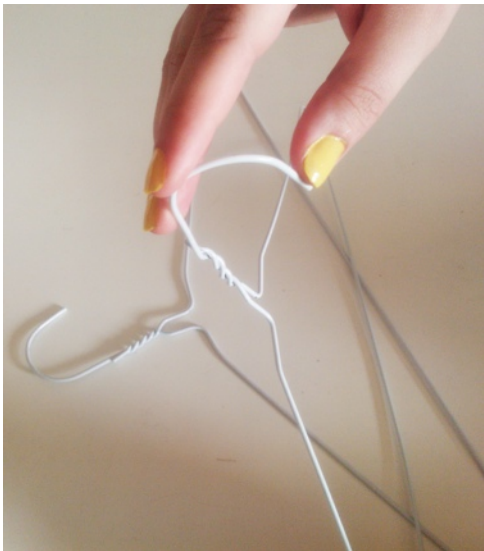

This is really simple way to make Hanging Mobiles to brighten up your room or anywhere else in the house!

Tools and Materials:

- 2 Wire Hangers
- String or Wool
- Scissors
- Pencil
- Paintbrush
- Paint and Water (we used watercolours but you can use any paint you happen to have)
- Masking Tape
- Paper

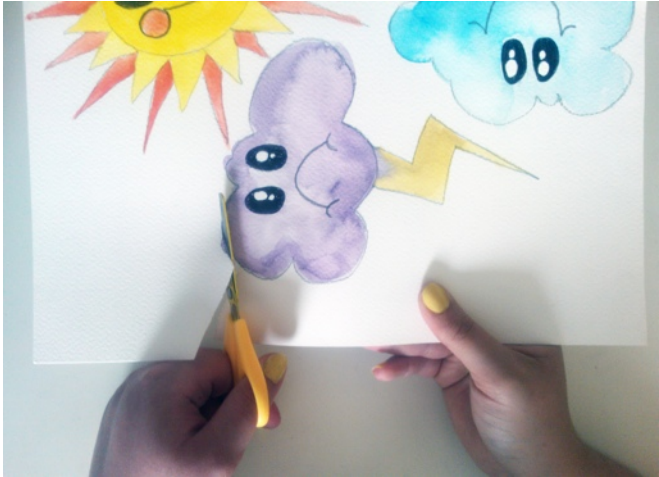

So to get started get one of the hangers and twist the hook part 90 degrees, you may want a parent to help with this, then line them up and start taping them together like so

Now you can start to draw out what you would like for your mobile, we went for a weather theme but you could do anything you like from aliens in solar systems to butterflies in gardens! Once drawn you can paint it.

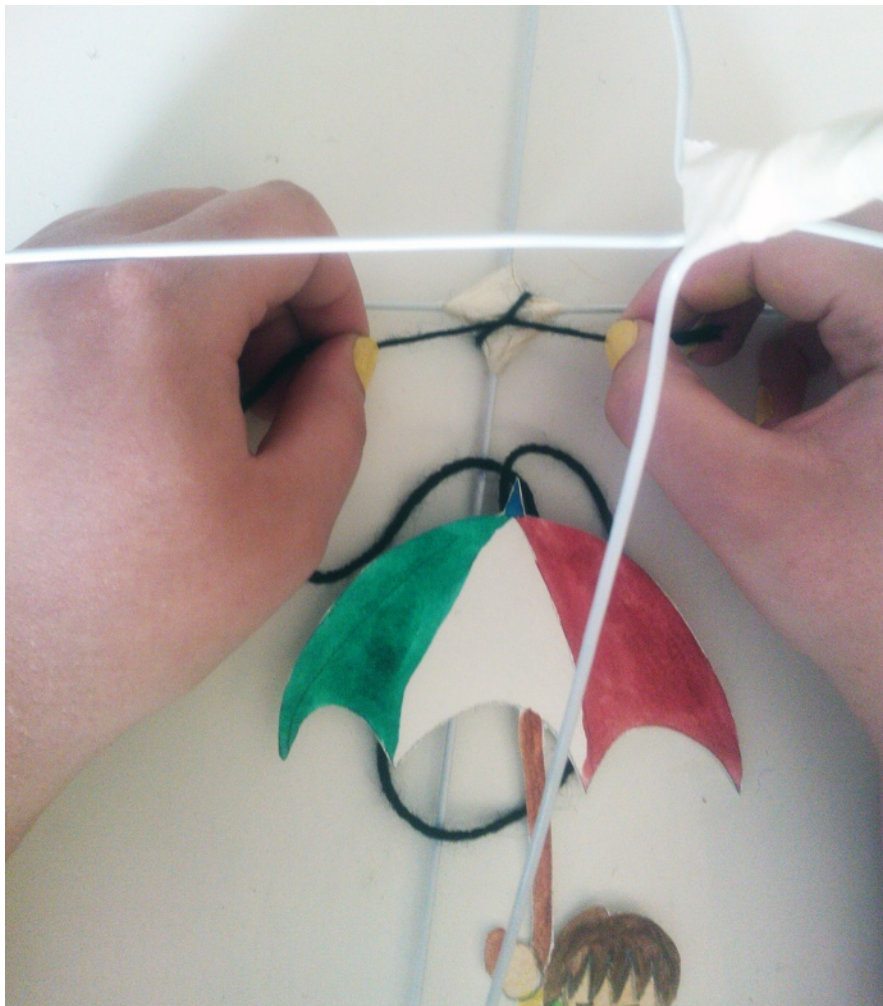

Once you are happy with your painting you can cut your drawings out

Now figure out how long you want the string to be for your mobile, maybe not too long in case you have a cat (they will love playing with it but it won't stay in one piece very long....!). Then tape the string to the back

Start tying your drawings to your mobile like so

Now you have your finished Hanging Mobile!

Here are some more Hanging Mobiles we have created to give you some ideas!
