## Upcycled Piggy Bank

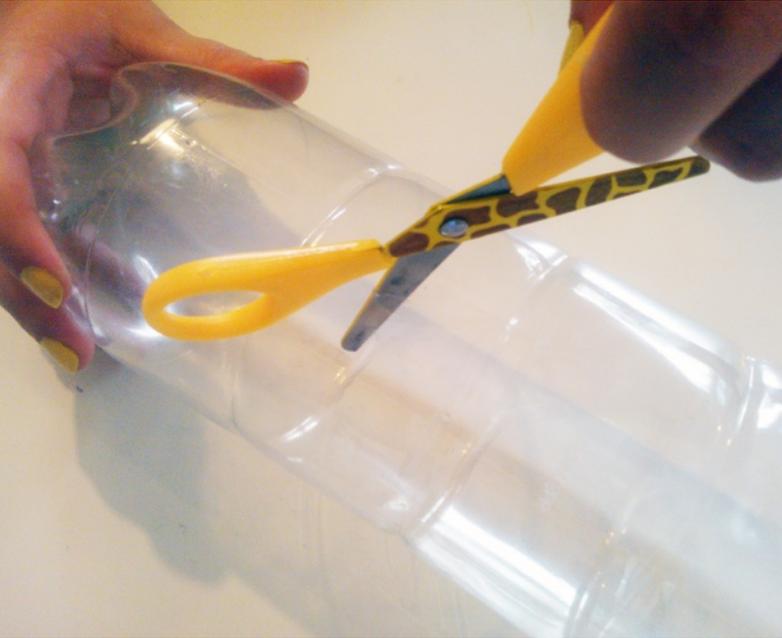

This is a really fun way to use old drinks bottles and you can save up all your pennies for a rainy day!

### Tools and Materials:

- Egg Carton
- Coloured Paper
- Scissors
- Pencil
- Googly Eyes
- Pipe Cleaner
- Drinks Bottle
- Double-sided Sticky Pads (you can get these inexpensively)

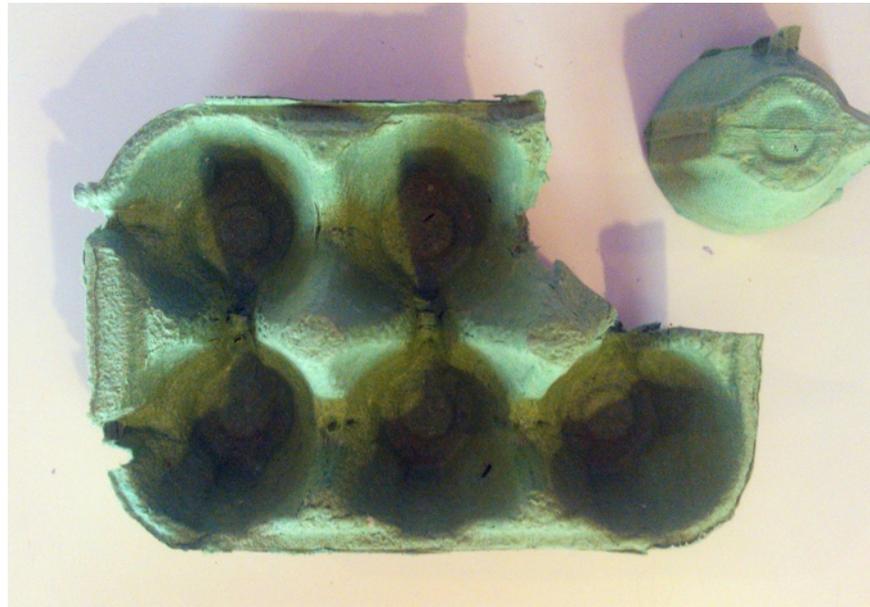

To start make a slit for the money to go in on the drinks bottle, you can push down with scissors or ask your parents to help using a kitchen knife, be careful when doing this!

Now can start to cut the legs out from the egg carton trim off the excess so you can get to the bits you would like to cut out!

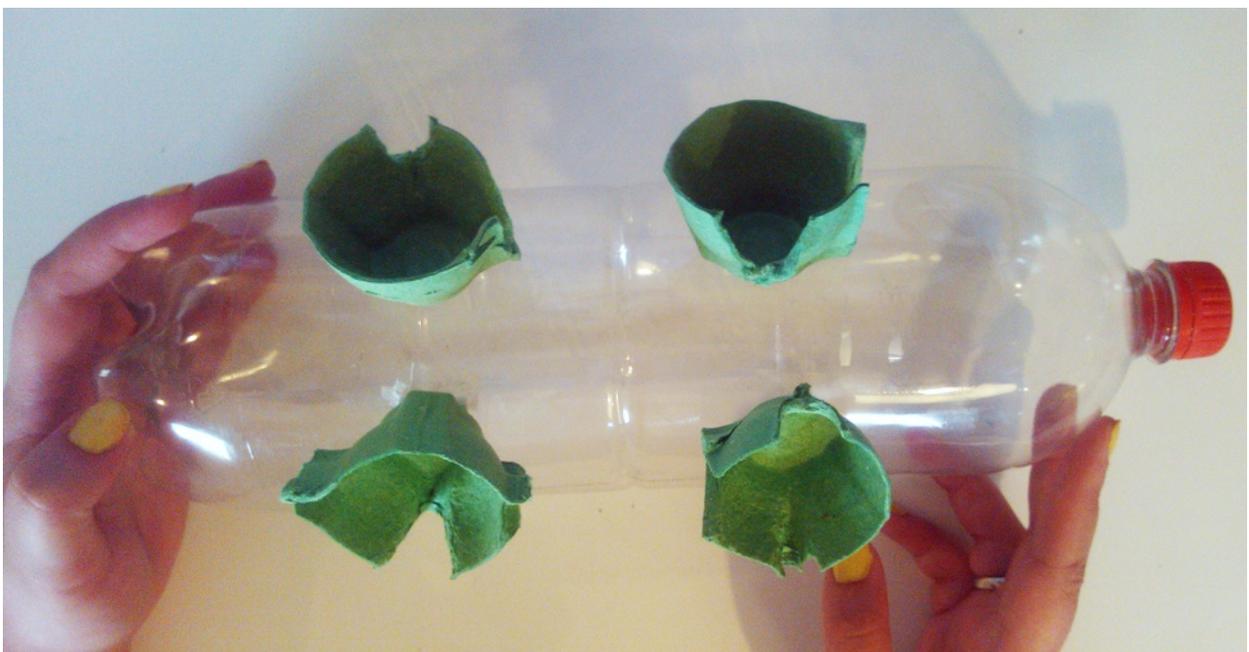

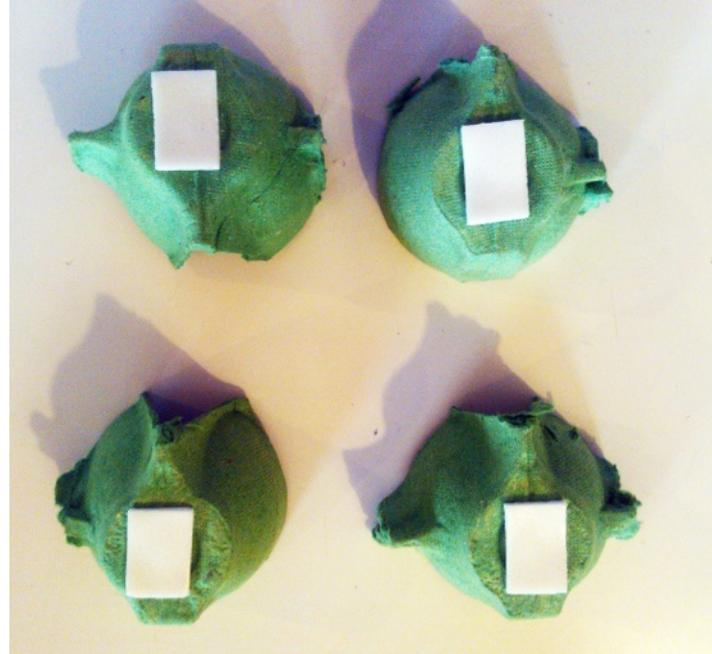

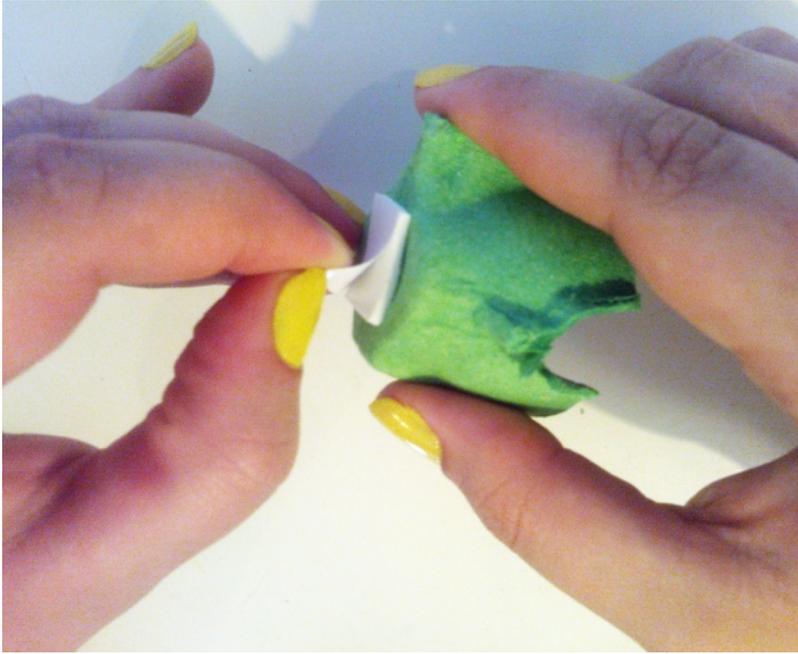

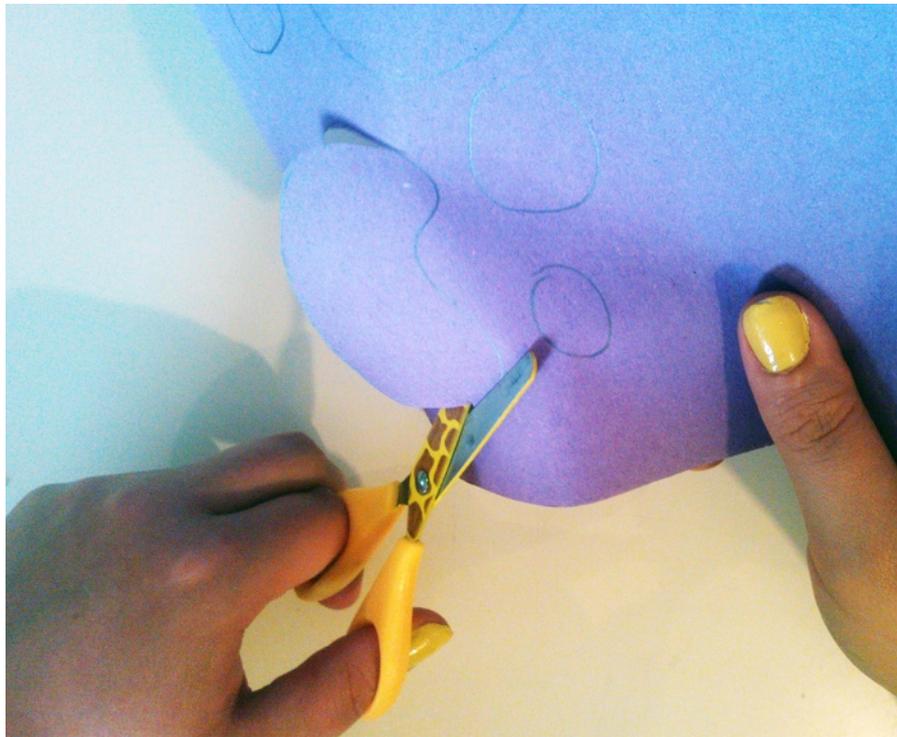

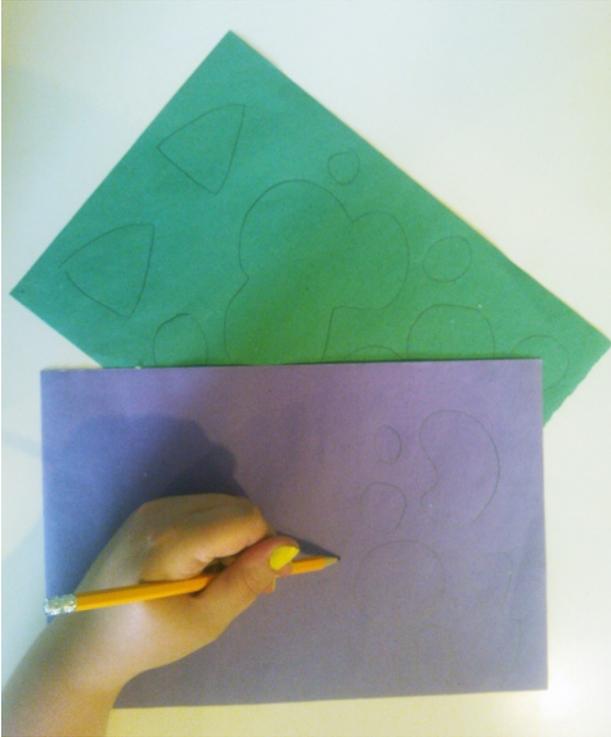

Now you should have 4 feet, trim any excess off to make sure the piggy bank will balance!

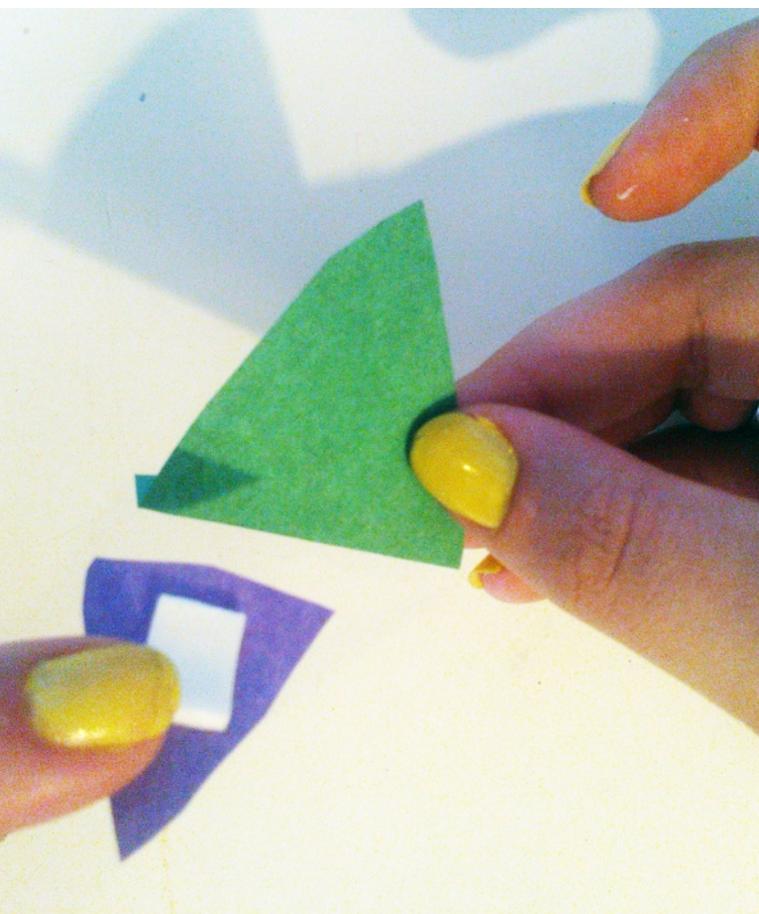

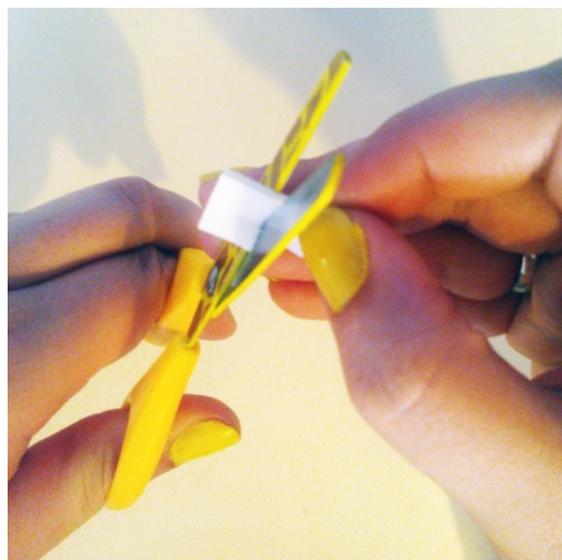

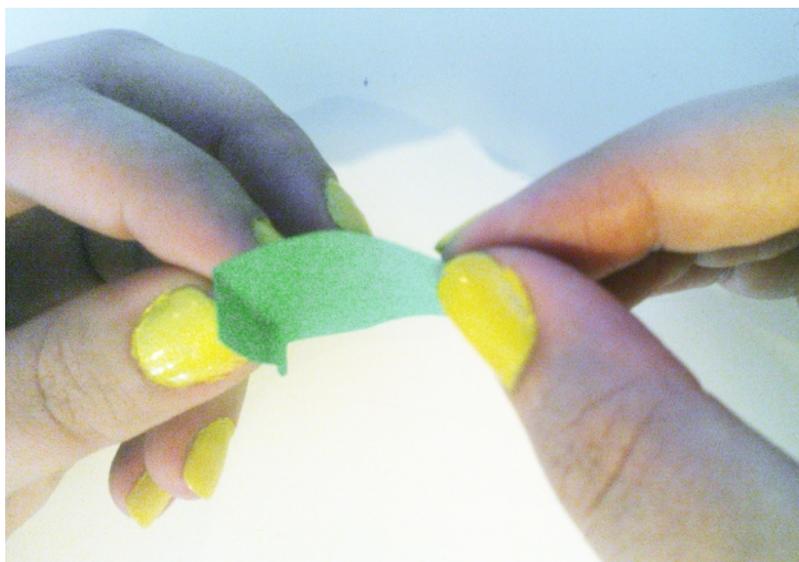

Now you have the legs all cut out place sticky pads in the middle ready to stick on!

Now the exciting bit of deciding how to decorate your Piggy Bank! Think what shapes you need to decorate him. Although we are making a pig you don't have to, you could make crocodile, horse or even dinosaur! The possibilities are endless!

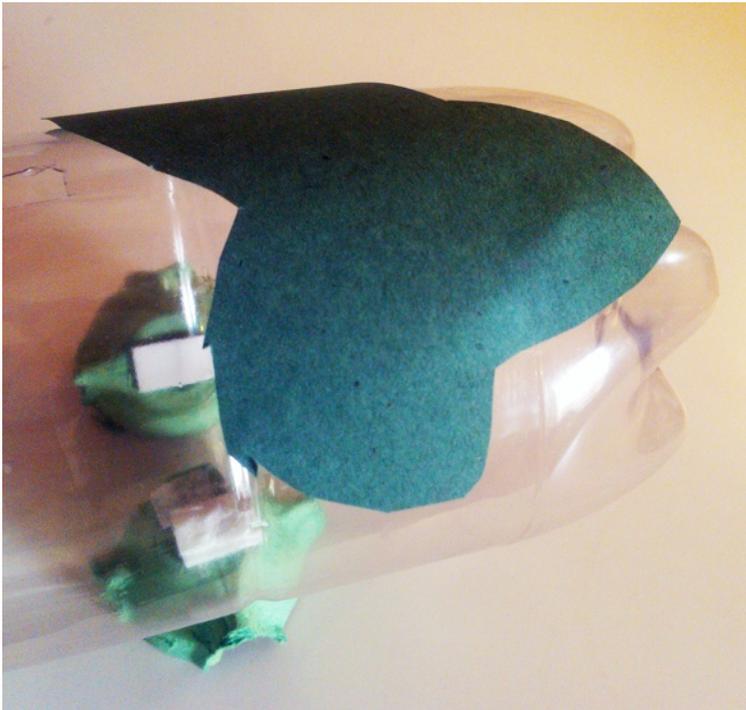

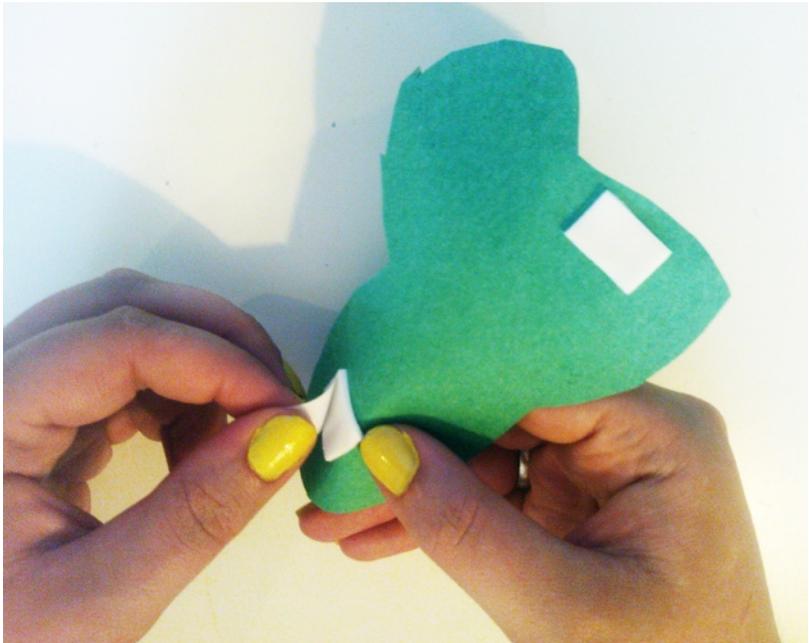

The triangles we cut out are for the ears, 2 larger triangles and 2 smaller ones for the insides. Fold a flap at the bottom of the ears to attach to the head then attach the smaller triangle on, you can cut the sticky pads in half to make them smaller so you can't see them

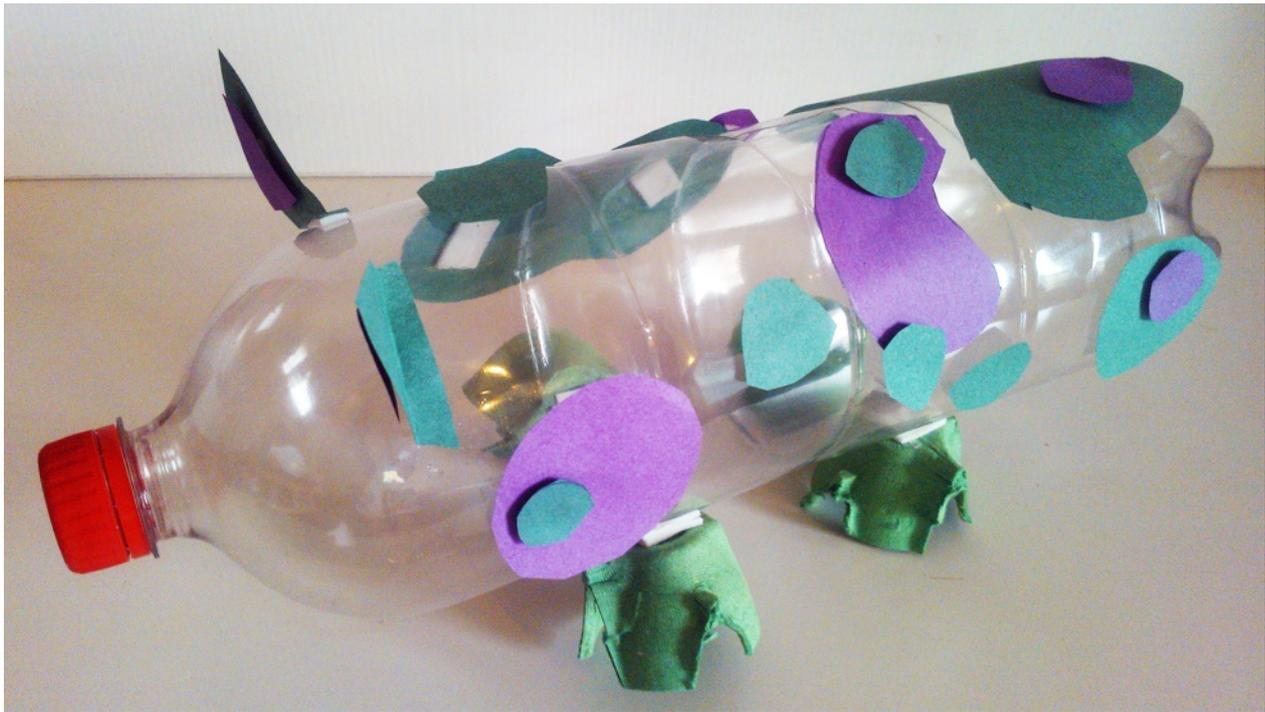

Now you can attach them to your pig's head, you can cut the sticky pads even smaller to be hidden

Use the sticky pads to attach the rest of your decorations like so

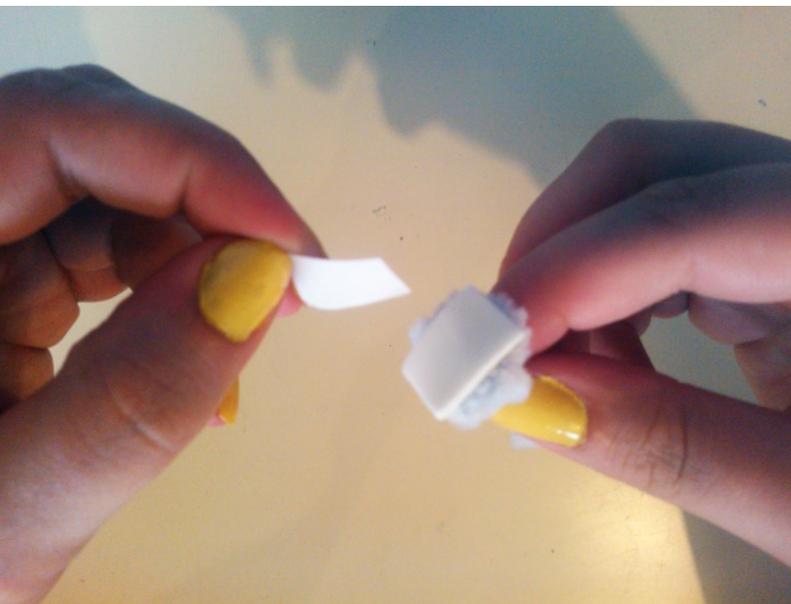

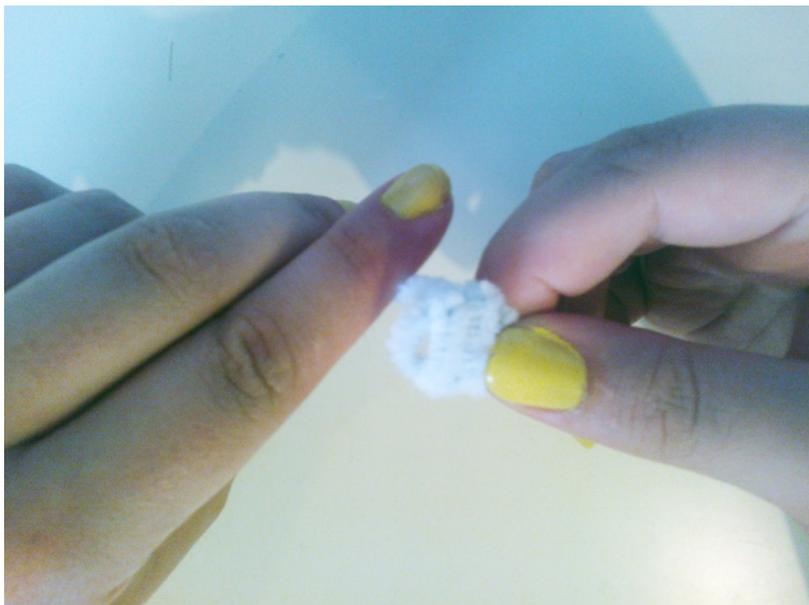

So now your pig should look a lot more colourful!

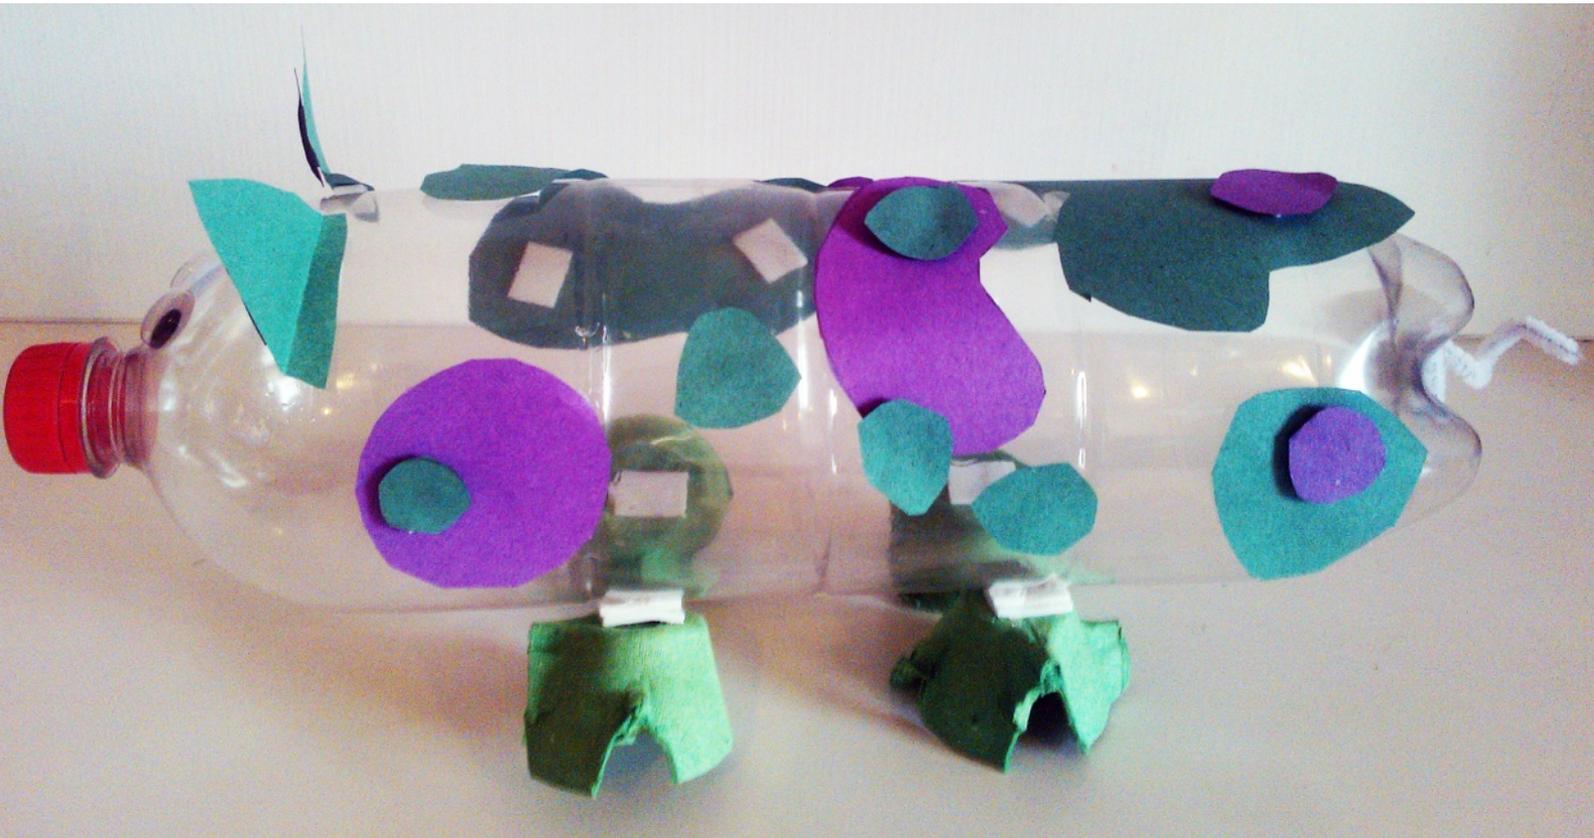

So now it is time for googly eyes!! We have self adhesive ones but if you don't just use the sticky pads

Last thing to make your pig complete is a tail, to make a better surface to stick it on with we wrapped the pipe cleaner round itself to make a circle before curling the rest

Now you have your finished Upcycled Piggy Bank!!

Here are some more Upcycled Piggy Banks we have made to give you inspiration!
