Egg Carton Puppet

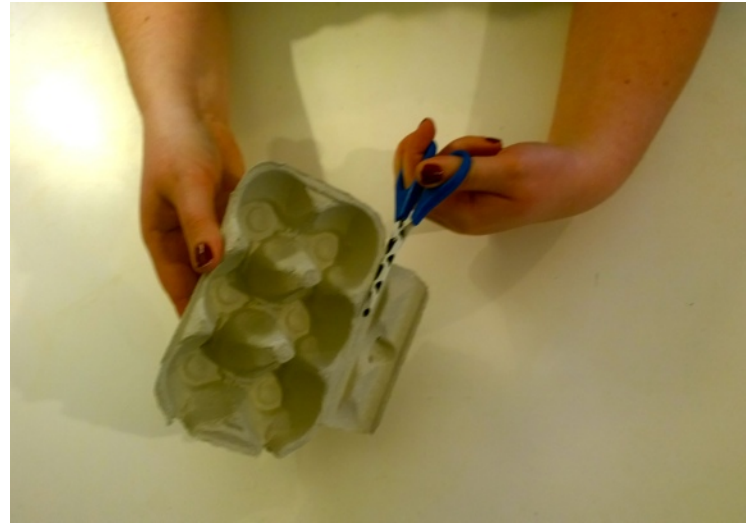

Tools and Materials:

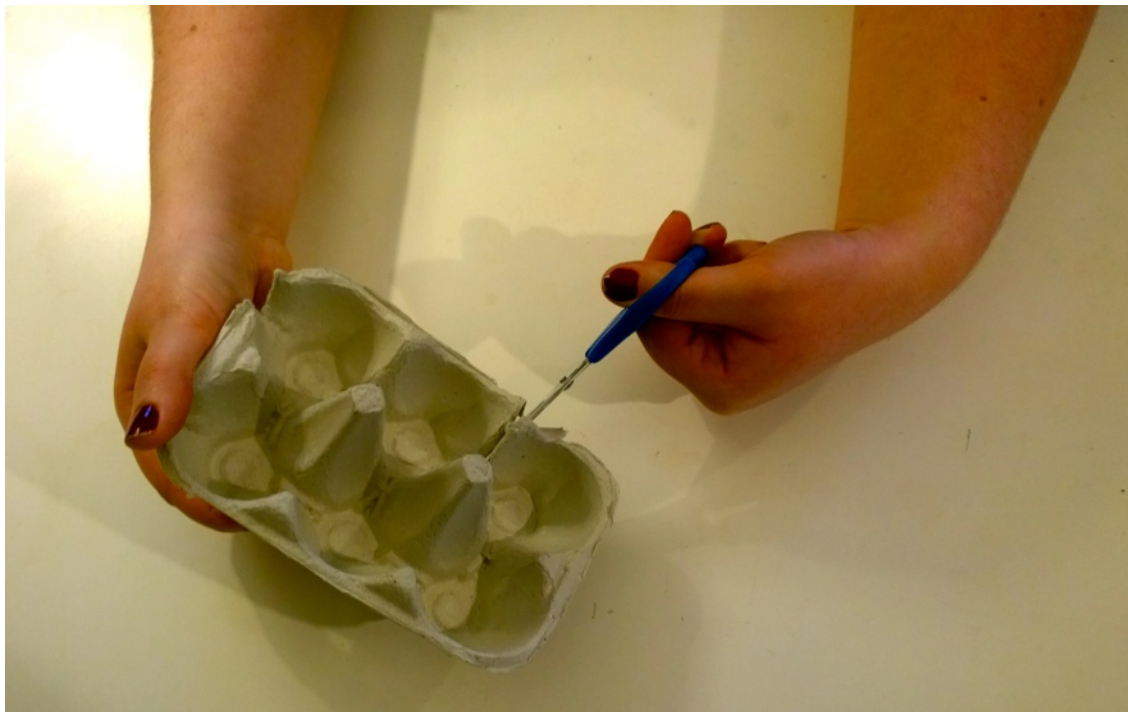

- Paintbrush
- Sellotape
- Scissors
- Egg Carton
- Paper
- Paint (plus plate to put it on)
- Water to wash your brush in

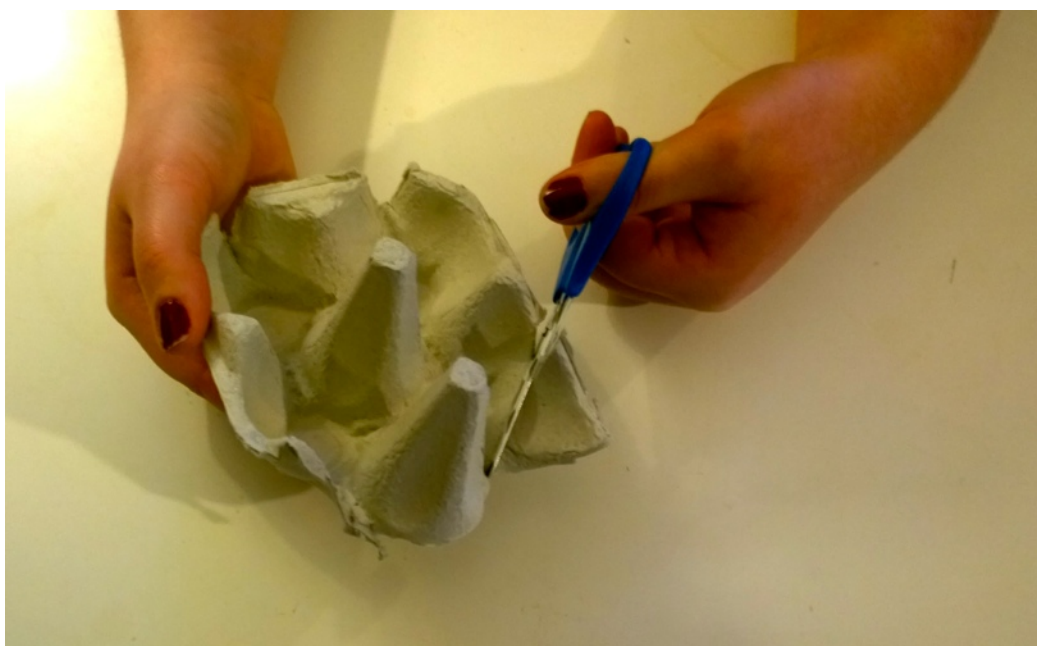

To create your puppet first cut off the flat lid side plus the flap like so

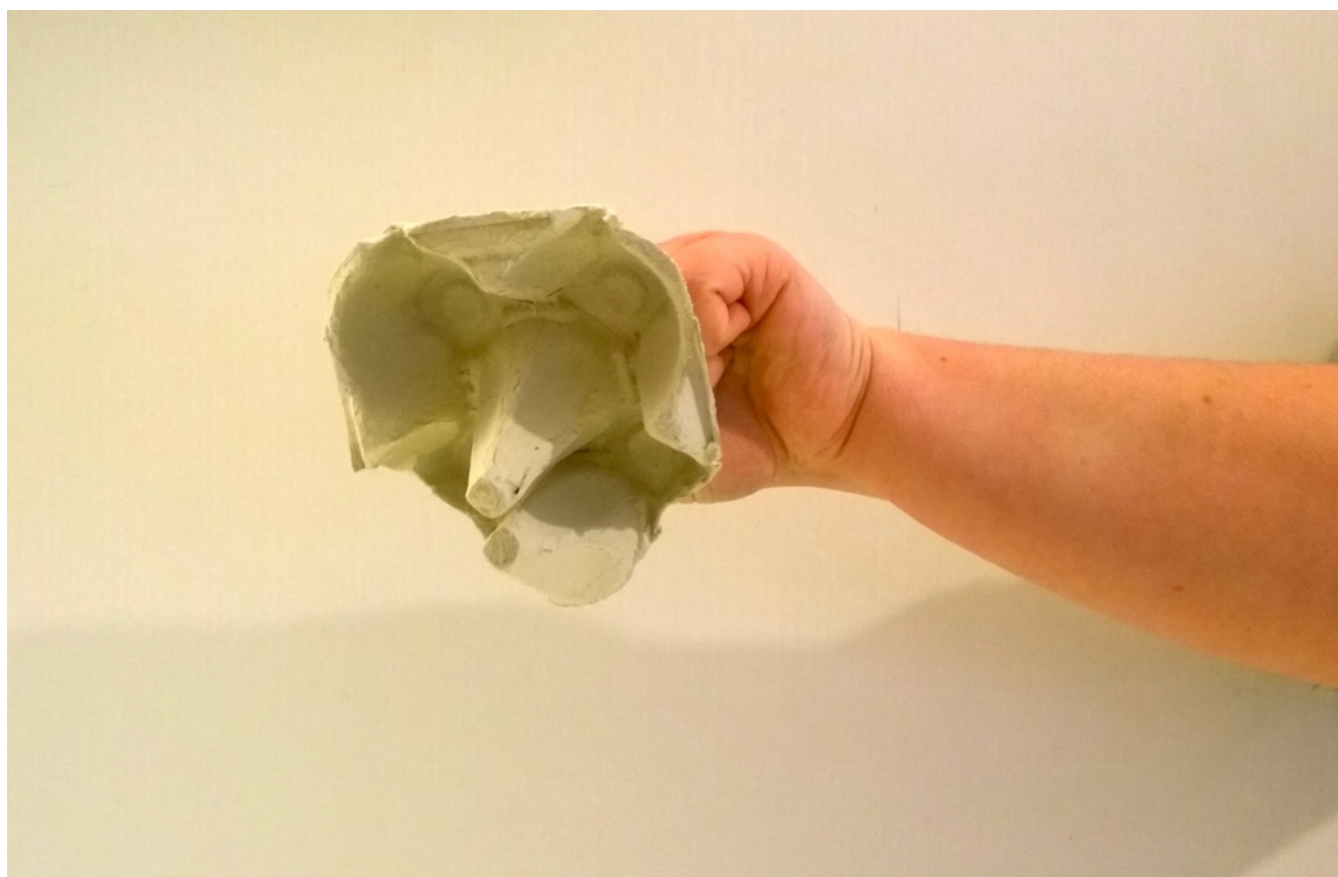

Now cut into the egg carton side, to make this puppet cut in the bottom egg holder and then go around the bottom of the highest point to create your beak

You can then cut more off at the bottom to shape the face

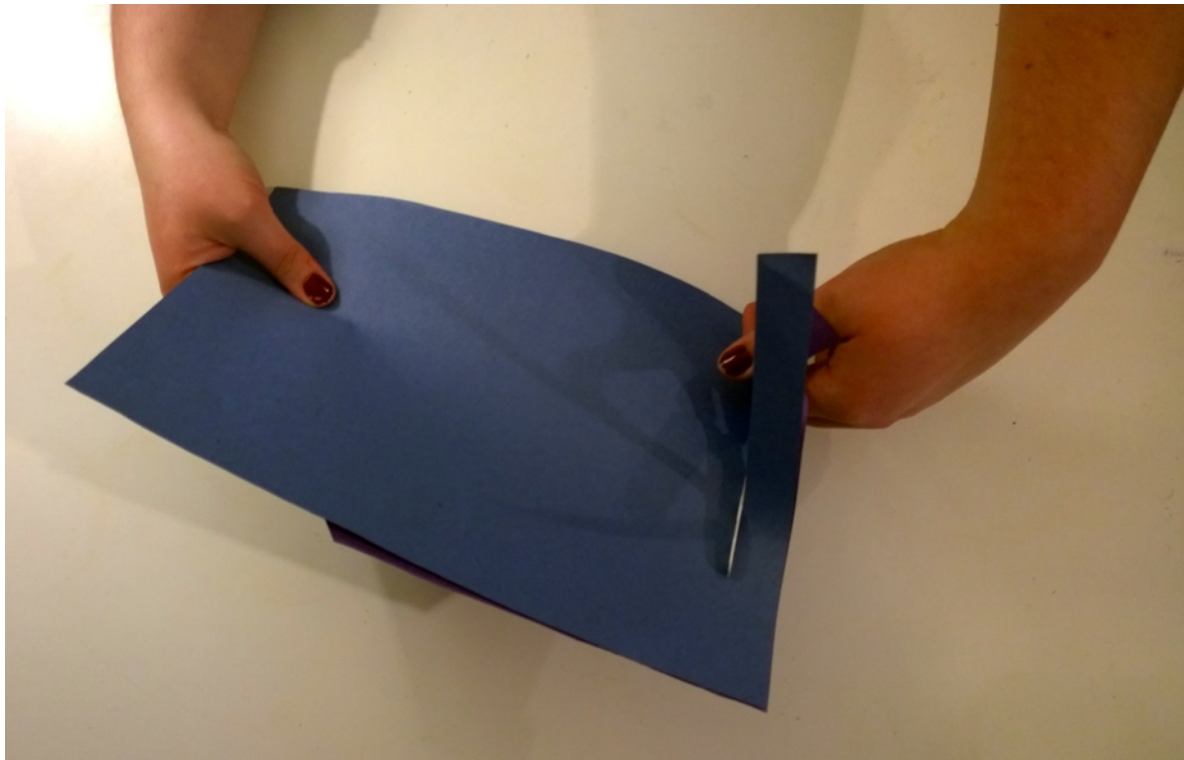

This gives you your basic puppet to then decorate!

Now you can paint your puppet, it is important to paint the puppet before sticking the paper embellishments on as you can't paint over sellotape!

Now you can create the hair, cut strips from the paper, roughly equal size would be good

Now you can curl them, pull the strip gently over the scissors towards you, not too hard otherwise they could rip!

Now you can start sticking them on to the back of the puppet, start from one edge and work your way round

And there you have your finished puppet! You could always add glitter or other fun things like feathers to add more texture!
