

## 3D Pumpkin Faces

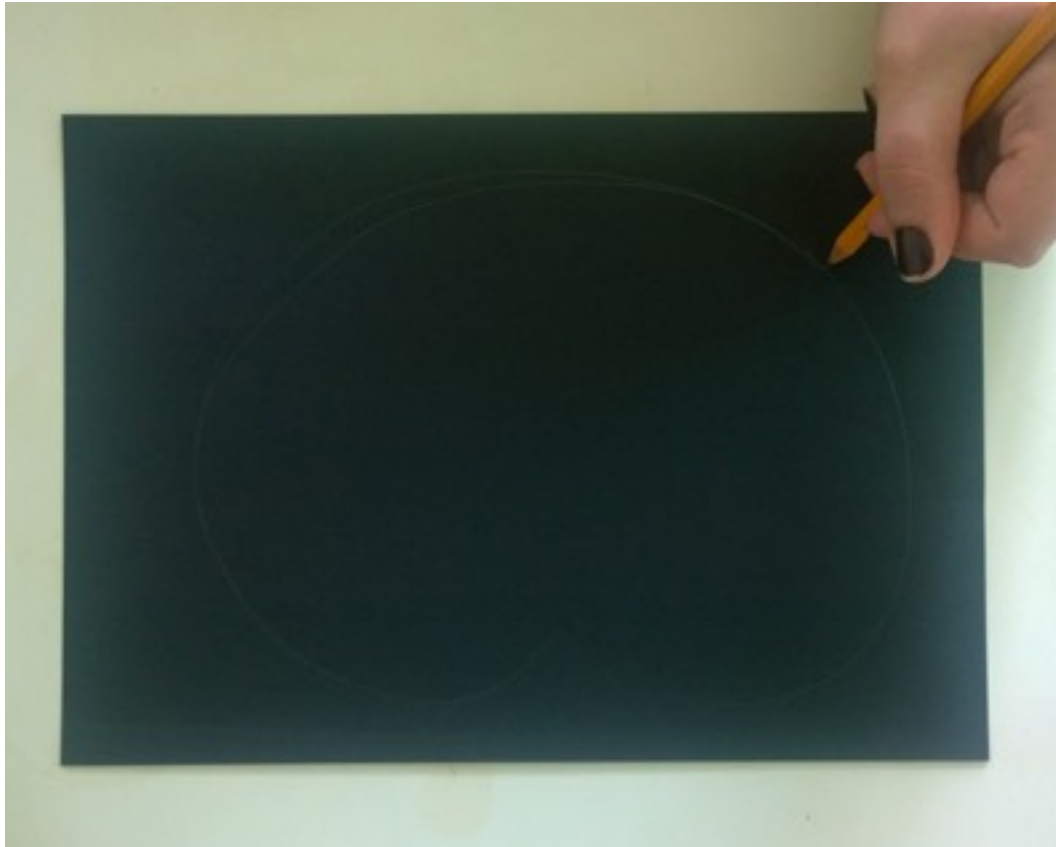

Less messy than pumpkin carving but just as fun - you can create a 3D pumpkin face for Halloween!

Tools and Materials:

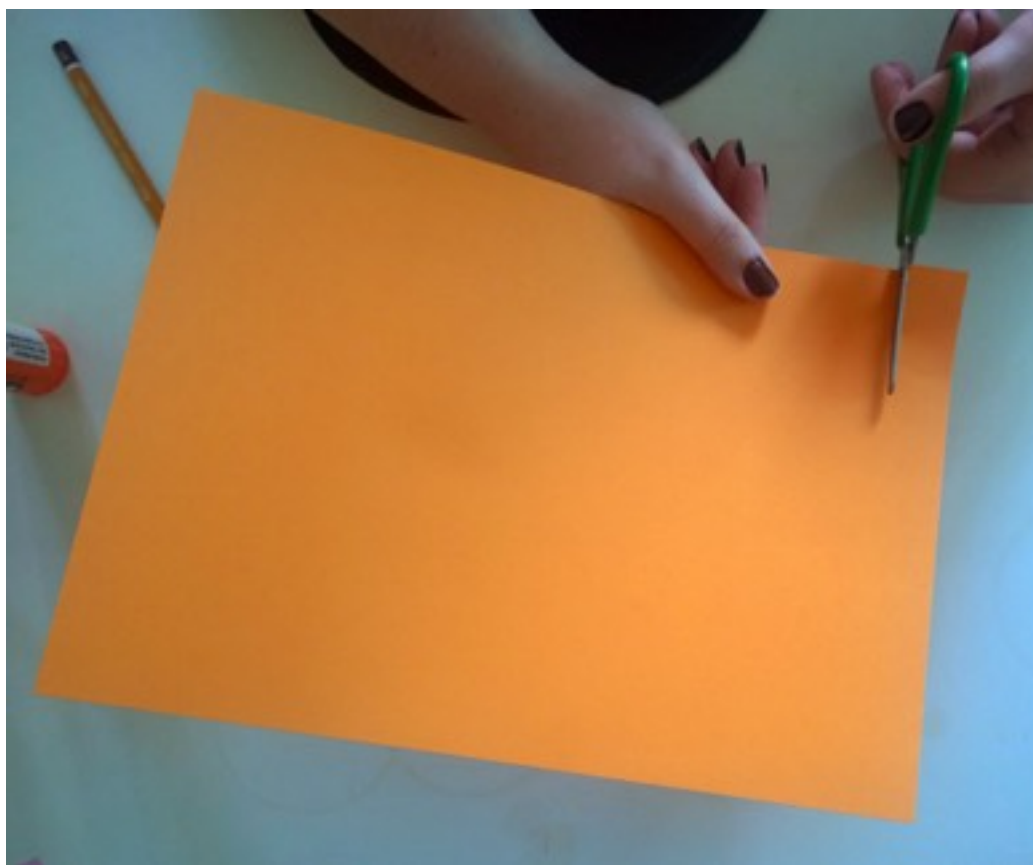

- Coloured Paper
- Scissors
- Pencil
- Glue Stick

Use your black paper to create a background for your pumpkin - the shape to draw is much like an apple or kidney bean like so - once you are happy you can cut it out

Take your orange paper and cut it into strips to create the 3D aspect of the pumpkin

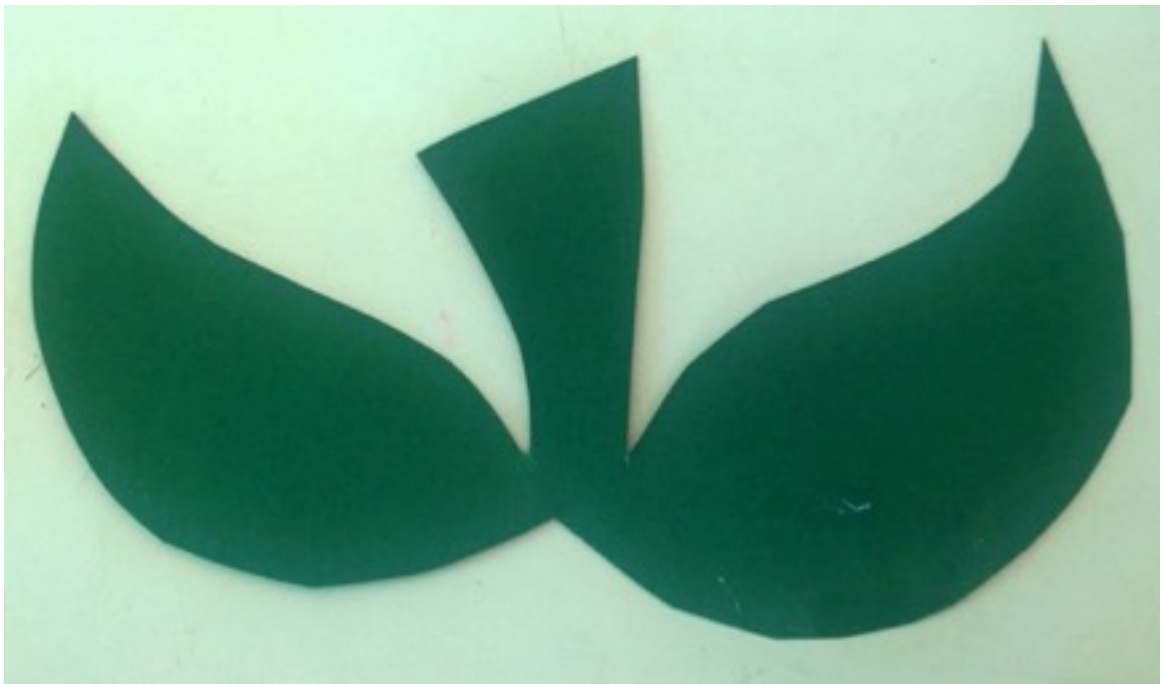

Glue one end of the strip to the black card and bend the other in on itself to glue it - it should end up looking like this

Continue till you have filled the whole of the pumpkin face

Now you can create detailing - like leaves and a stalk

Once you have done the stalk and leaves you can work on creating the face and then glue it on

And there you have it your own 3D pumpkin face!

Here is another we made to inspire you
