## Bonfire Night Crafts

Bonfire night is such a fun time of year why not enjoy it by creating your own bonfire and firework scene to celebrate it!

### Tools and Materials:

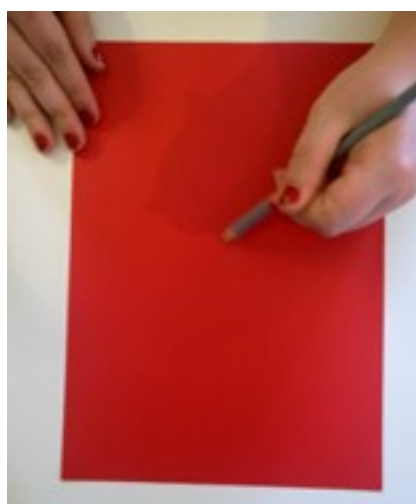

- Coloured Paper  
(red, yellow, gold and brown for bonfire, black and metallic for fireworks!)
- Scissors
- Pencil
- Glue Stick

First lets start with the bonfire - draw some log shapes on the brown paper like so, 3 or 4 should be enough

Now you can draw out your flames - starting with the biggest one like this - you can use it as a guide to cut out the smaller flames like so

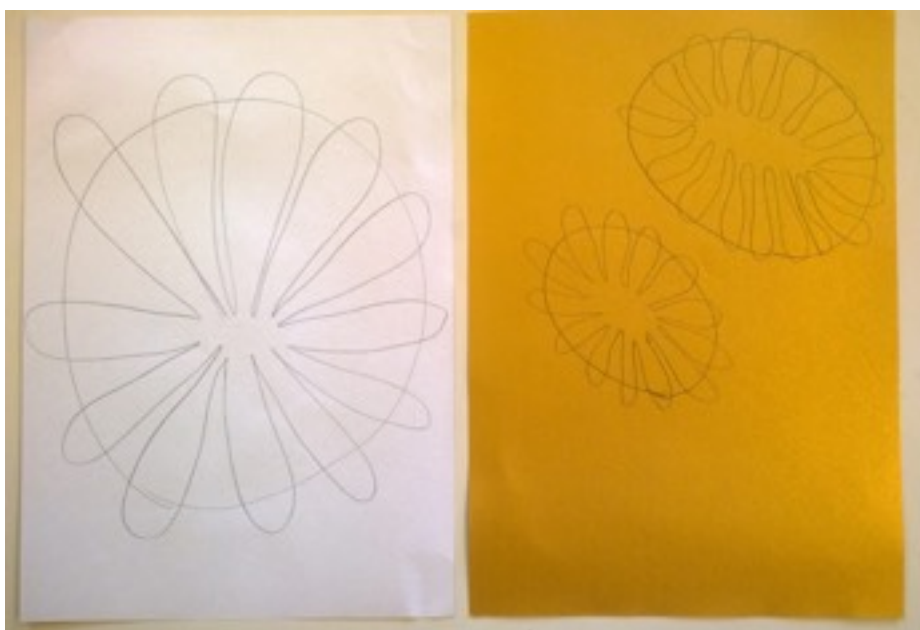

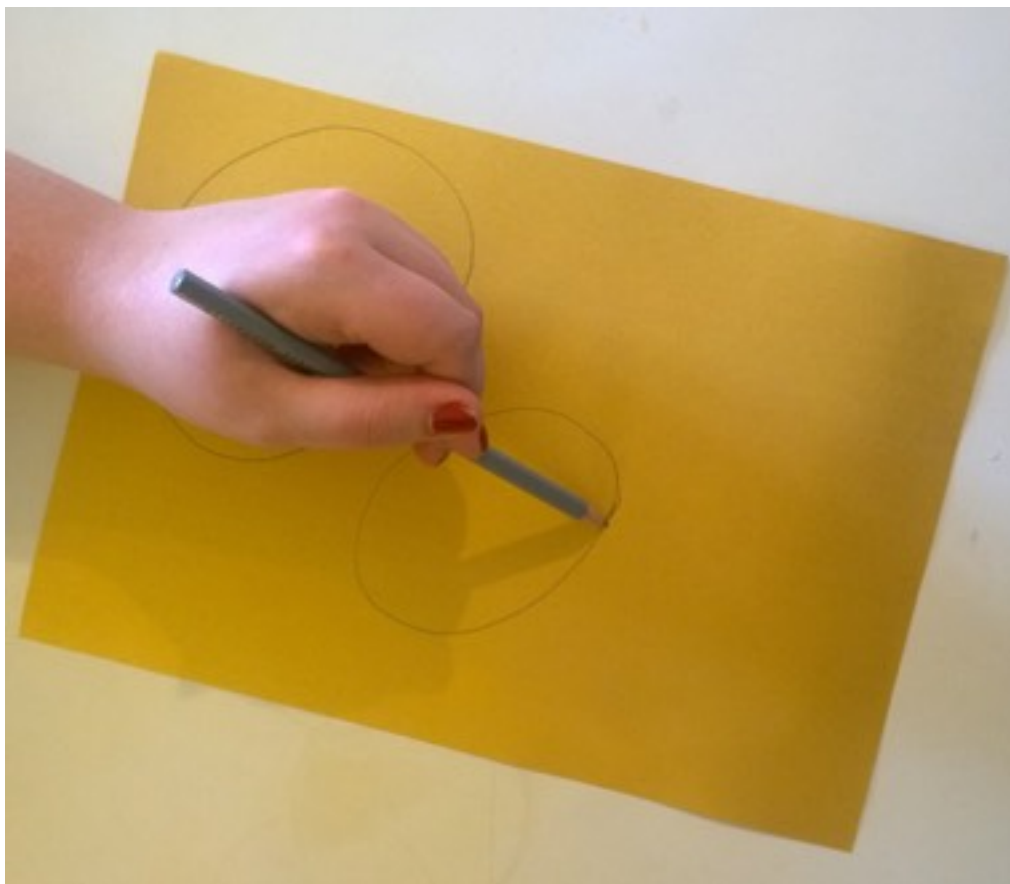

Then you can glue them together when you are happy with the position of the flames

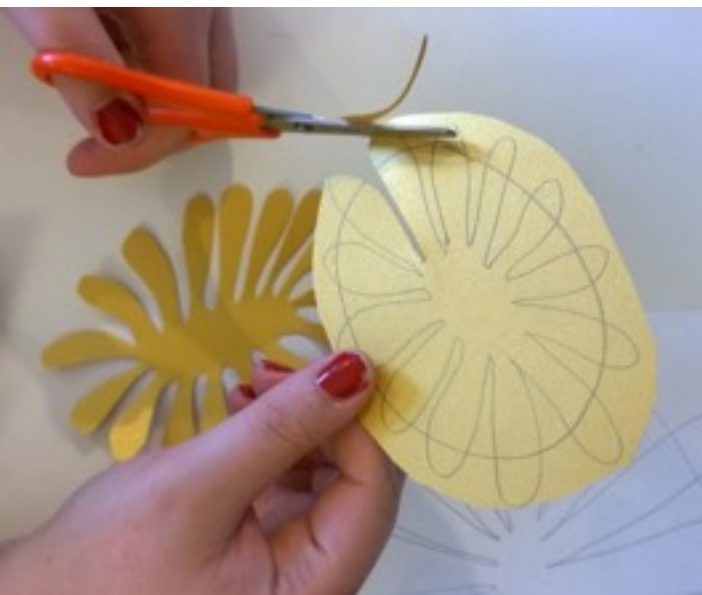

Then you can layout out the logs till you are happy with them - once happy glue them to each other and then the flame

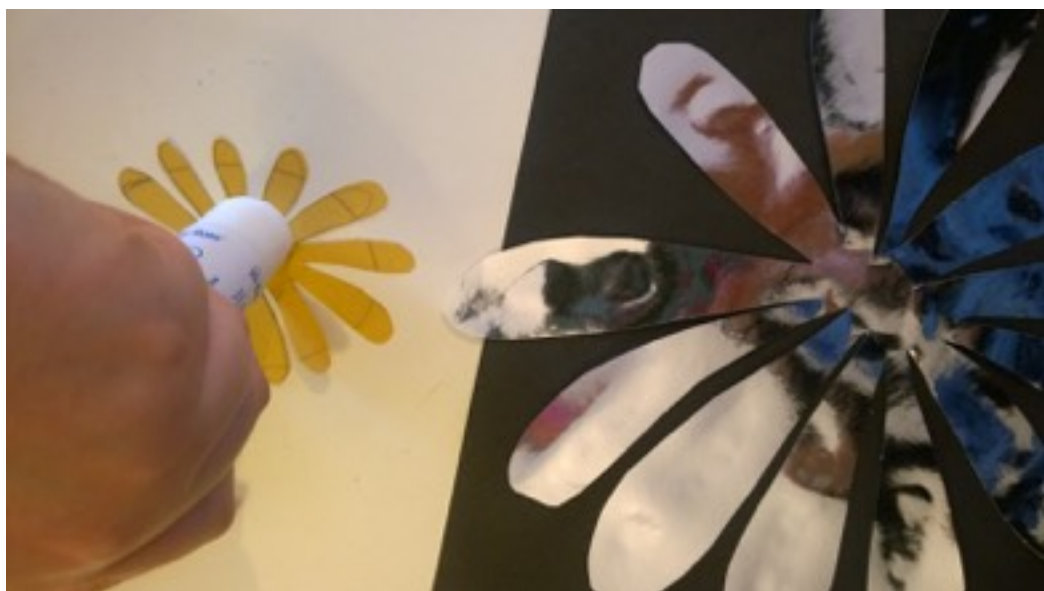

Now we can create the fireworks! Draw an oval (egg) shape on your firework paper and then do a flower like shape inside it to create the firework explosion

Cut them out - being careful not to chop any of the “legs” off by mistake

Then start sticking them down to look like a firework full sky

And there you have it your own bonfire night crafts!
