Button Mosaics

This is a really fun way to do mosaics easily at home

Tools and Materials:

- Coloured Buttons
- PVA Glue
- Paint Brush
- Scrap Wood (we happened to have some chipboard but a cardboard box would work too!)

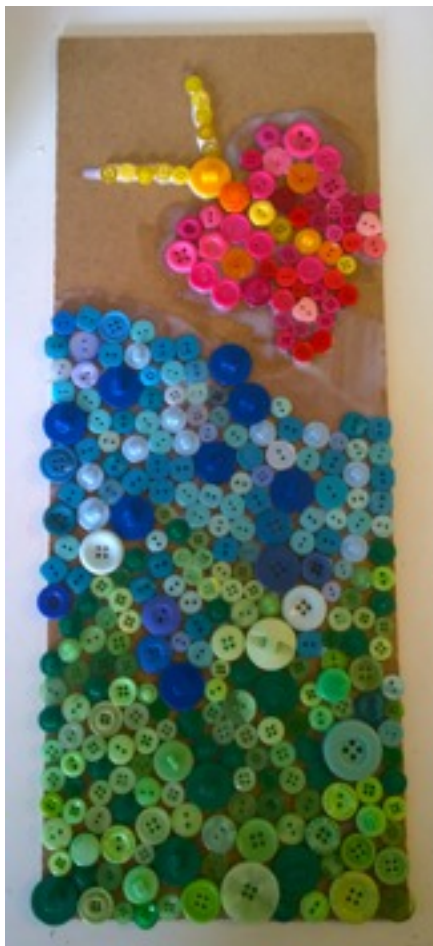

So what kind of design might you do? We created ours without forward planning as sometimes it is nice to just be inspired by the shape or colour of the buttons - but you can always do a plan on a piece of paper first if you would like! When you are ready to start the mosaic use the PVA to draw out shapes of colour and the start sticking your buttons on

We found it easier to do it in sections of colour like so

If you want to do a more detailed bit such as a butterfly in the sky it is best to do the butterfly first and then fit the rest of the sky in around it just so you can get all the detail in that you want

And there you have it your very own button mosaic

Here is another one we made to give you inspiration
