“Graffiti Walls”

Taking inspiration from Street Art and Graffiti you can create your own name or tag on top of a wall/street scene

Tools and Materials:

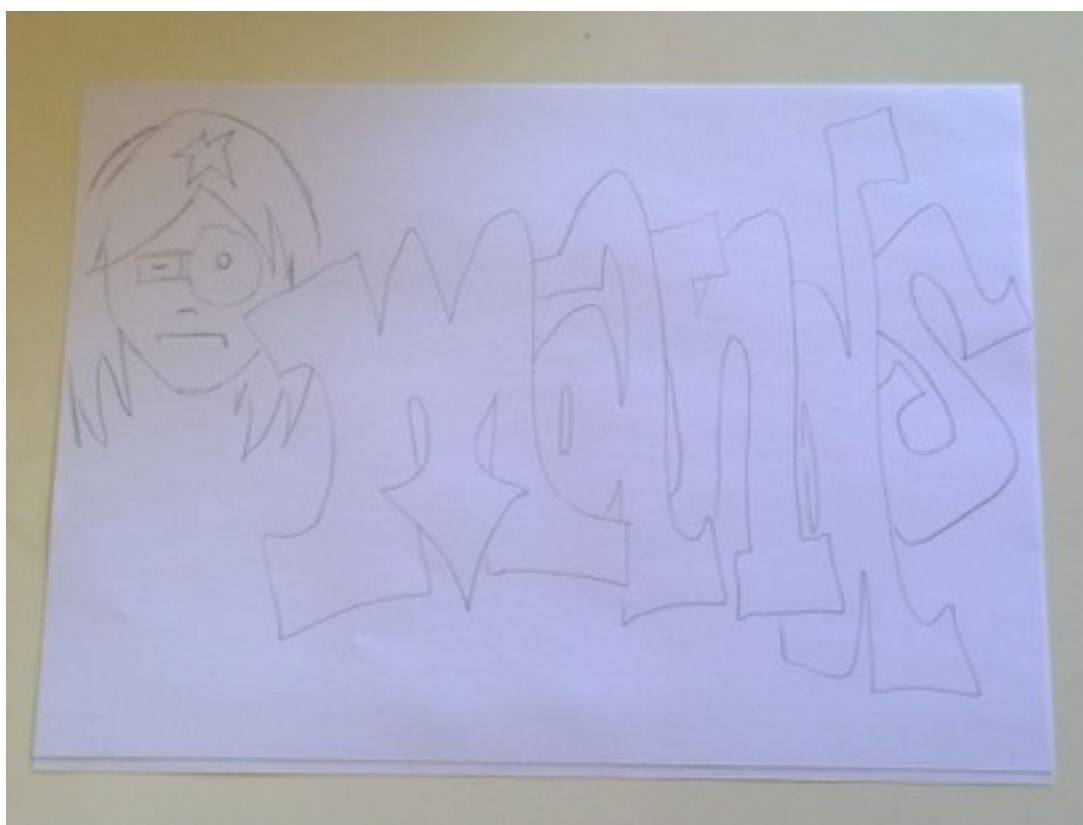

- Felt Tips
- Paper
- Pencil

First of all start sketching out how you want your name to look - like so

You can also add in an image if you would like

Now start to add in the bricks of the wall by drawing in rectangles, when adding the next row, move them slightly over to the side to imitate brick work

Once you have finished it should look similar to this

Now you can start to colour in your image, we have chosen to do the graffiti in colour and the brick work in monochrome grey to make the colour pop more!

And there you have your very own "Graffiti Wall"

Here is another one we have made to inspire you!
