

Paper Chains

Paper Chains originate from Victorian Times - they are a fun , simple but very effective way to brighten up a room so here is how to make them!

Tools and Materials:

- Coloured Paper (we chose 3 colours but you can have as many as you want!)
- Scissors
- Sellotape

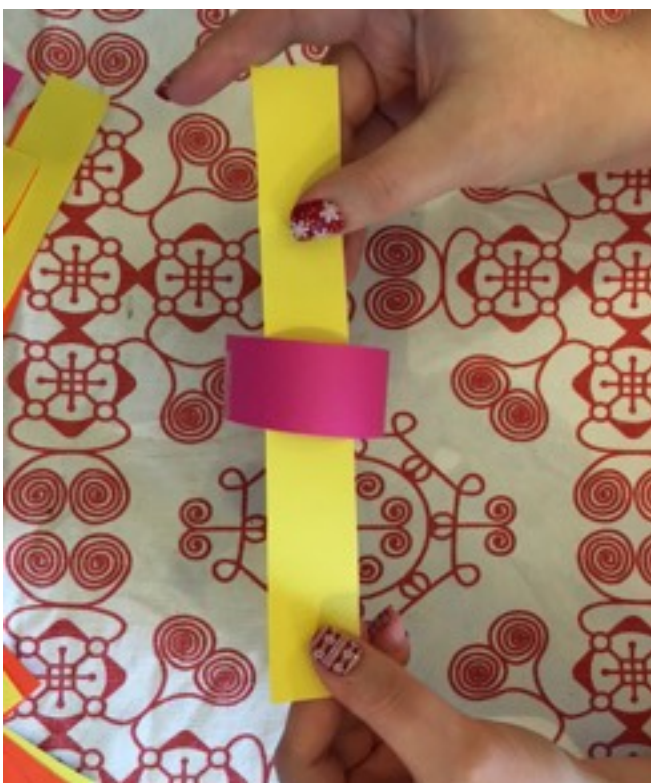

First you need to cut your paper into strips we have done ours about 3 cms wide - you can use a ruler if you really want but we find it just as easy to cut by eye!

Choose which colour you would like to start with and bend the end to meet each other like a ring - secure the ends with sellotape

Take another piece of your paper - put it through the middle of your first ring and then secure the ends of that piece of paper like so

Now you have 2 connected rings all you need to do is continue till you use them all up!

And there you have it your own “Paper Chain” - why not see how long you can make it!
