Peg Pals

Peg pals are great to put on the fridge to create make shift art galleries for your artworks or keep important things like letters from school about trips!

Tools and Materials:

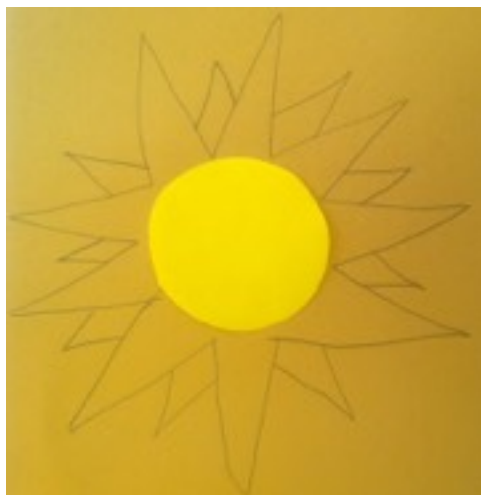

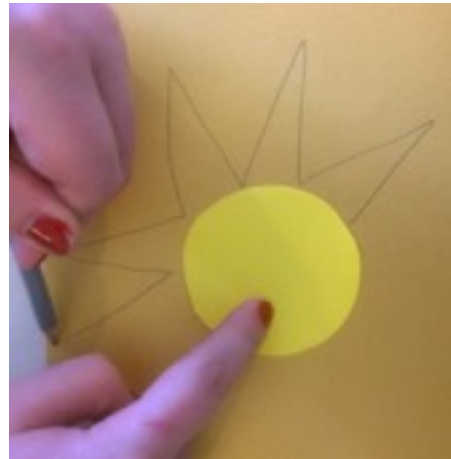

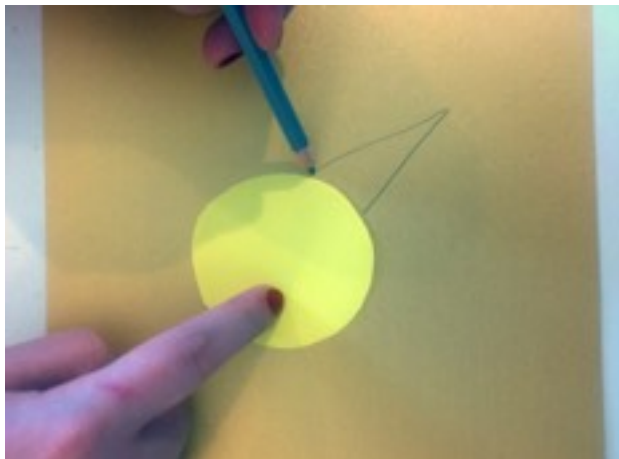

- Coloured Paper
- Scissors
- Pencil
- Sellotape
- Peg
- Felt Tip
- Stick-on Magnets

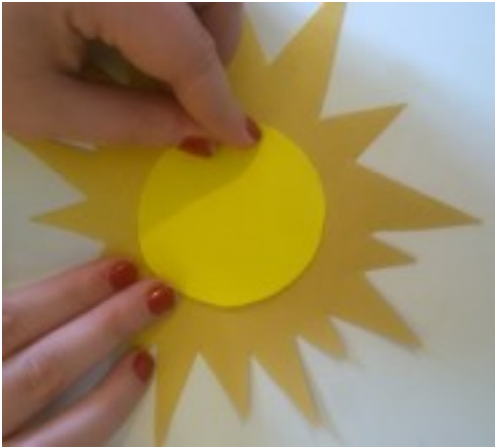

Most important thing to do is to come up with a character you want to be your peg pal - we chose a sunshine to brighten up the kitchen - start by drawing a circle for the face of your sun - cut it out when you are done

Use the circle as a template to draw rays around like so

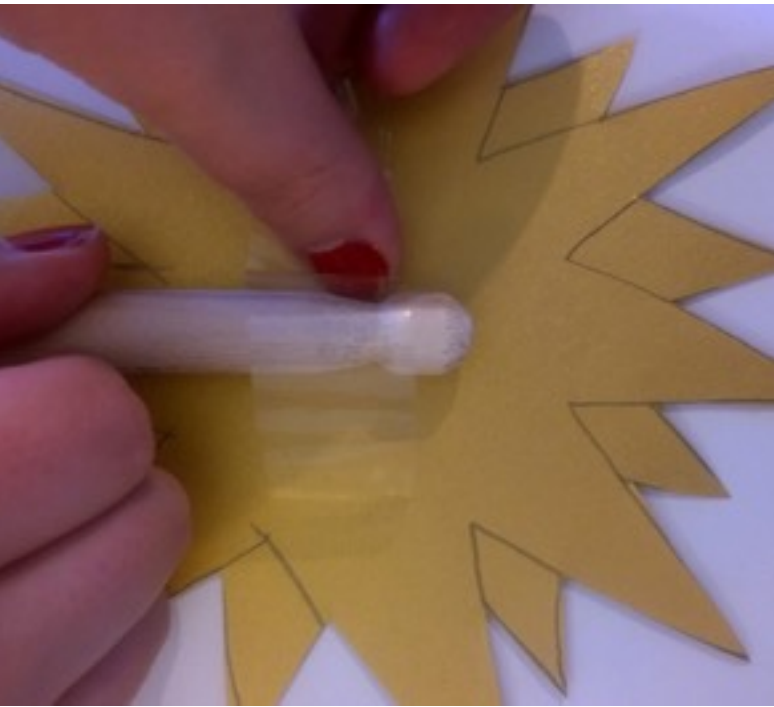

So you just need to attach the different bits together by folding over sellotape to stick the circle to the rays

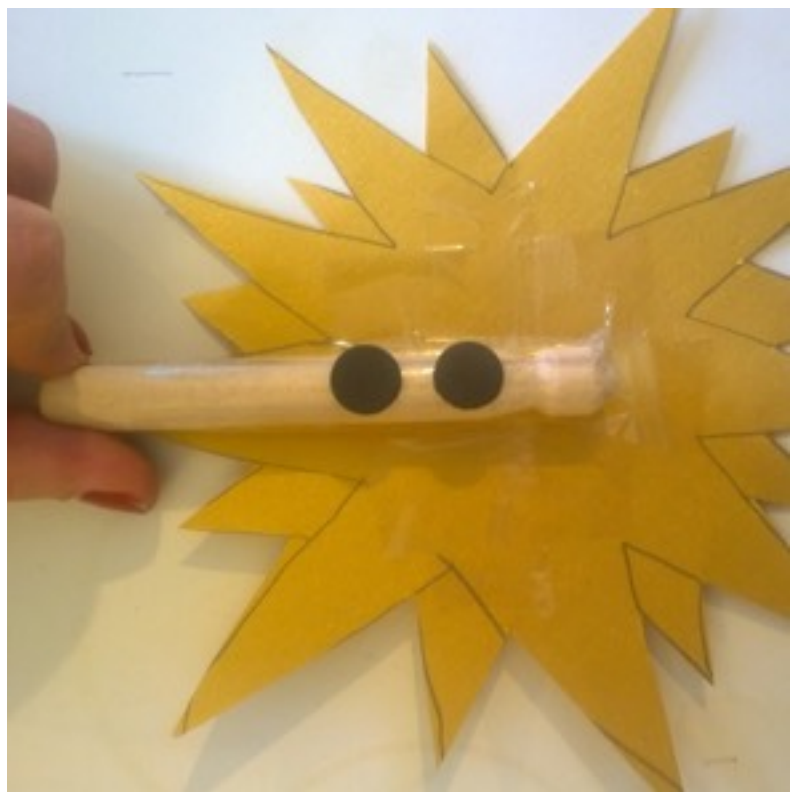

Once that's done then you can add the details

Now attach the peg to the back with some more sellotape

Now time to add the magnets - we found it worked better to stick the magnets on the sellotape as it held better

There you have it your own Peg Pal!

Here's another we made to inspire you
