Upcycled Tea Light Holder

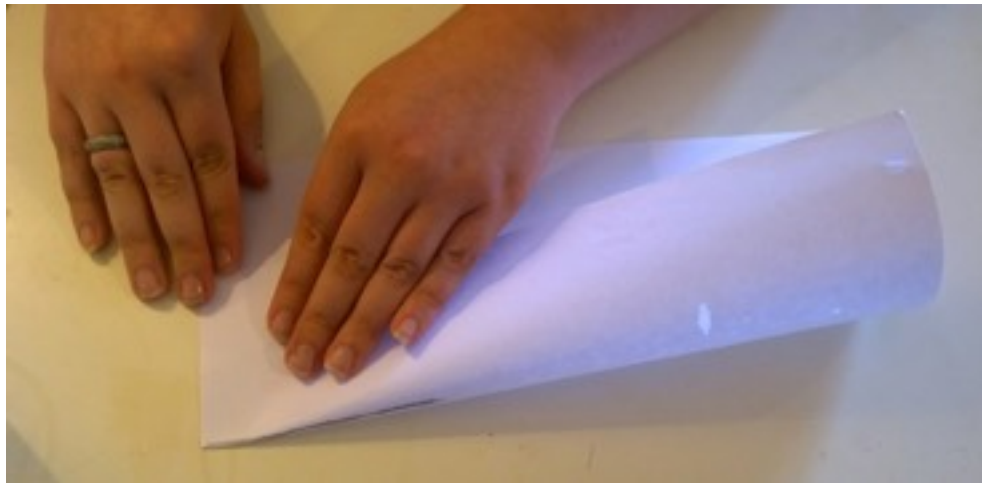

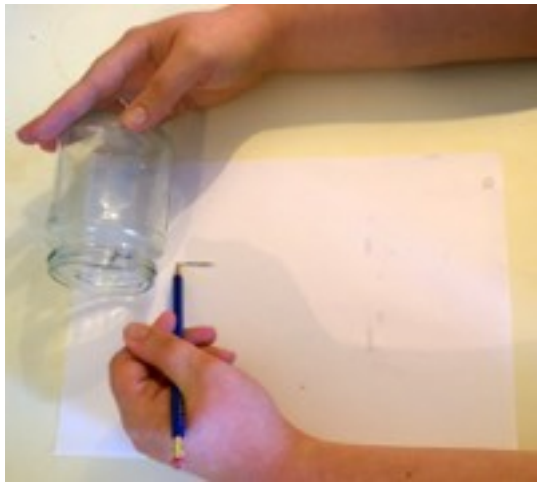

Based on your favourite stories of old or even your own narrative you can create characters and backgrounds to tell your story

Tools and Materials:

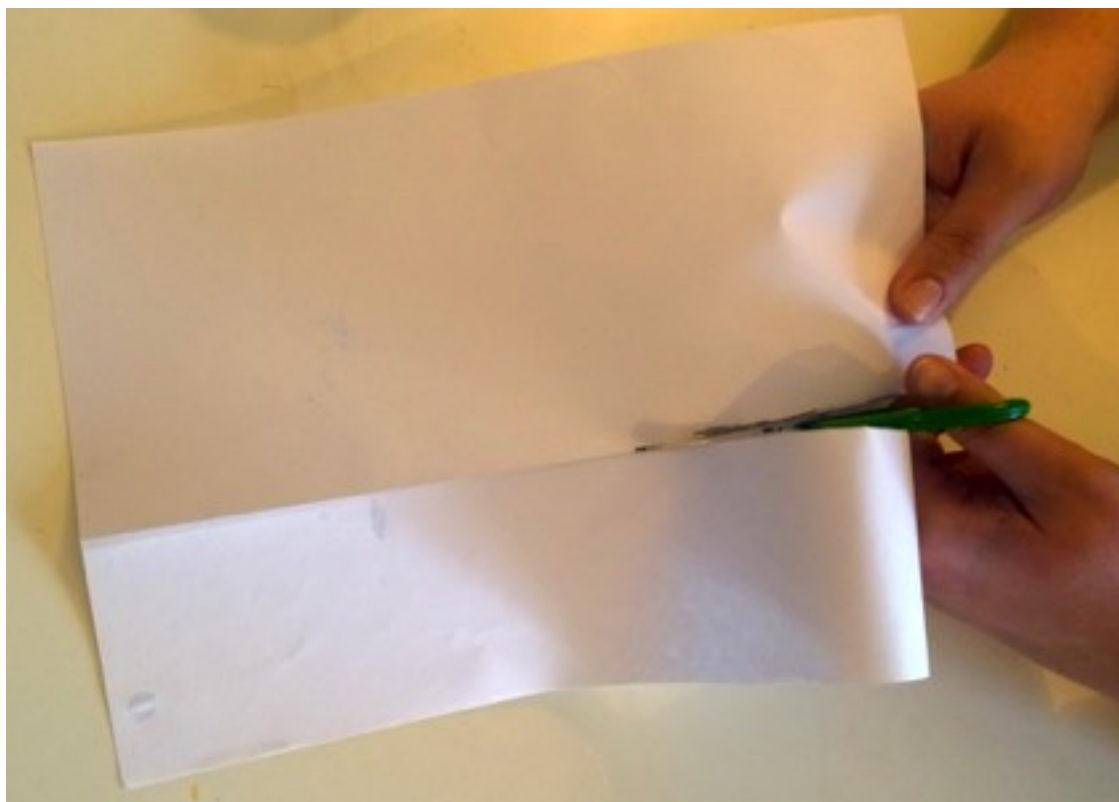

- Empty clean jar
- Scissors
- Paint
- PVA
- Paper
- Pencil
- Paintbrushes

First you need to measure your jar to create a template from your piece of paper

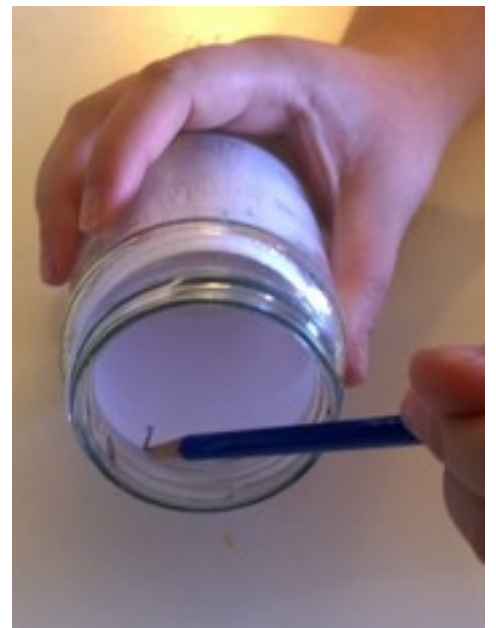

Once you have measured it fold the paper over to create a line to follow to cut to create your template

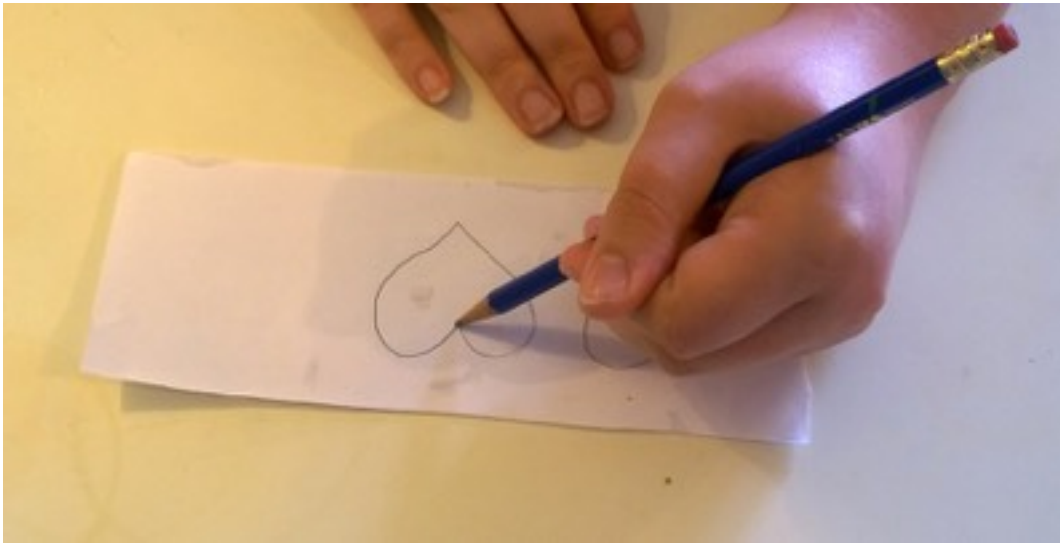

Measure the strip around your jar to leave a 5mm gap - fold over the excess and trim it off

Pop the paper strip inside and mark where it over laps so you can trim that excess off to have a template that fits

Now you can sketch out your design!

Once happy with it place it in your jar - like so

We already have PVA in our pot - so add some paint in to it and then mix it together - this helps the paints stick to the glass, otherwise it would just flake off!

Now you can get painting!

And there you have it your very own upcycled tea light holder - perfect for a summer evening!
