Design your own Crest

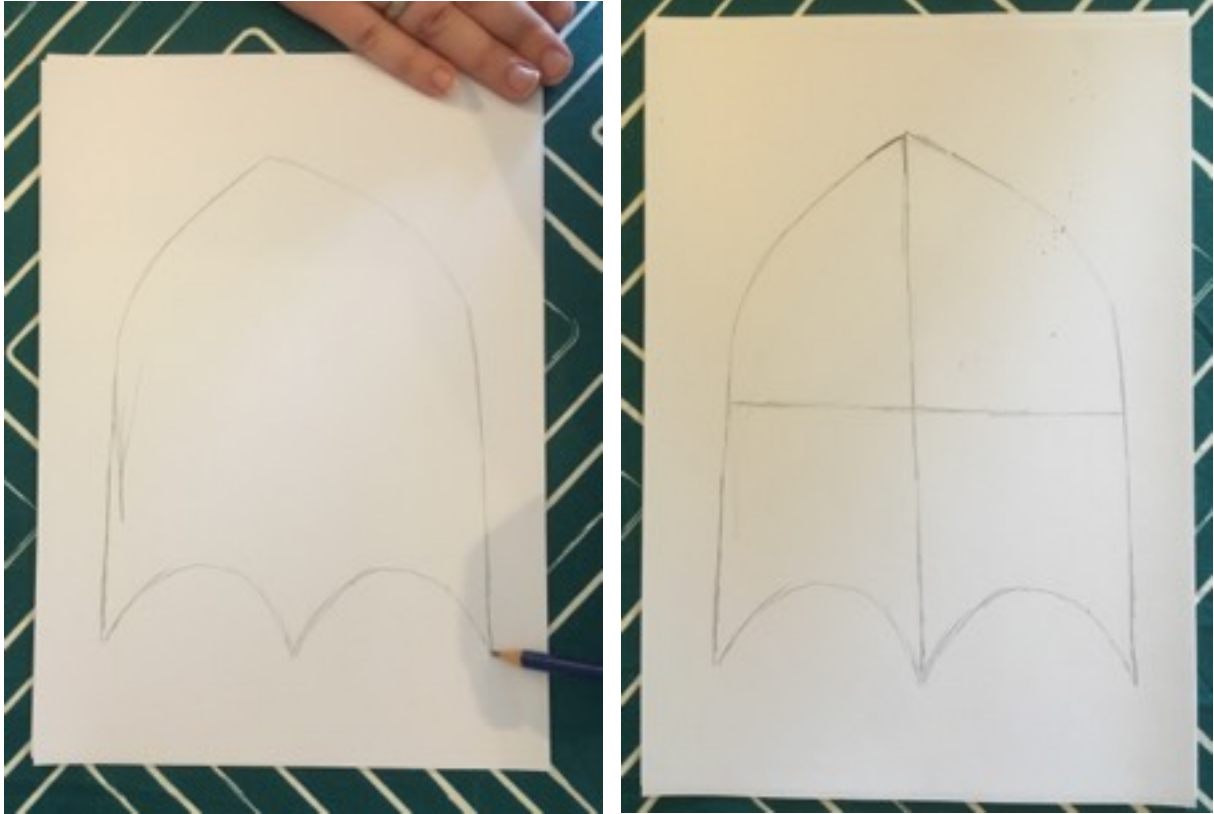

Taking inspiration from heraldic shields of old why not design your own crest to represent different elements of your character or things you like

Tools and Materials:

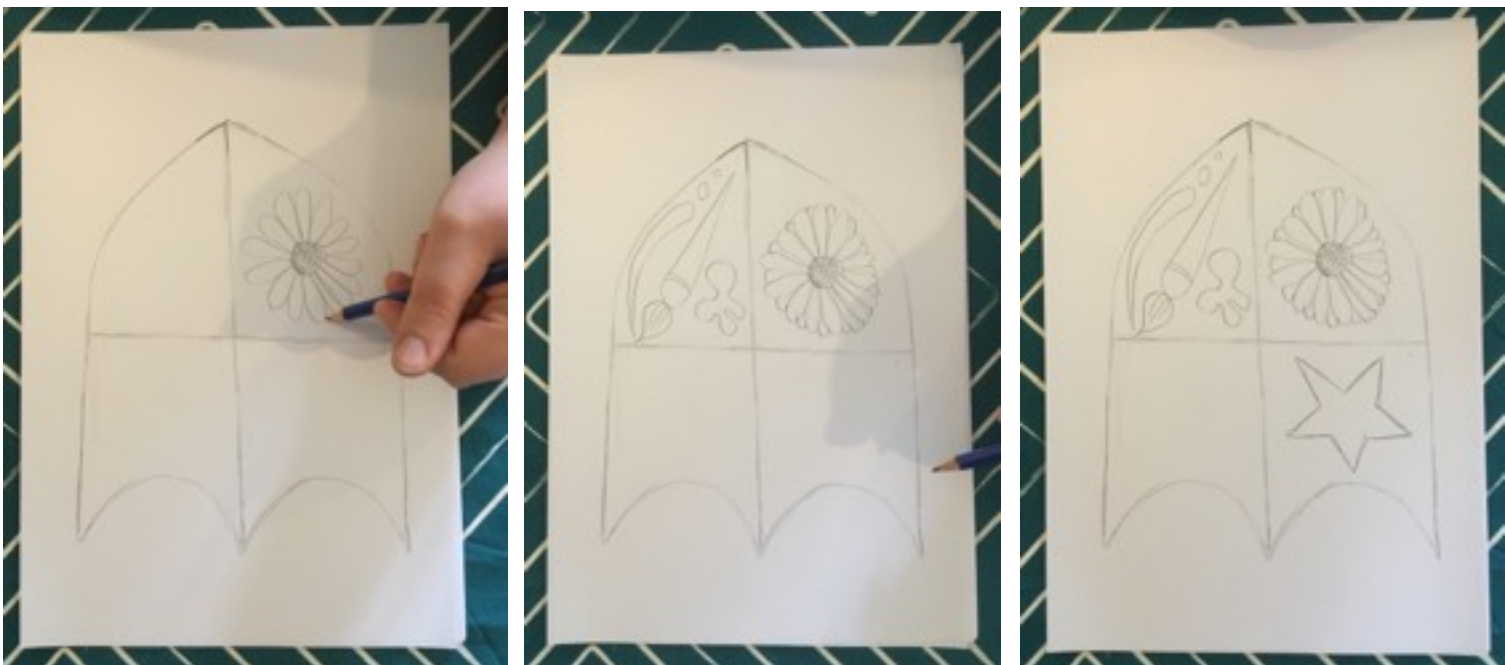

- Paper
- Pencil
- Felt tips
- Ruler if you want straight lines, we just like to draw by sight

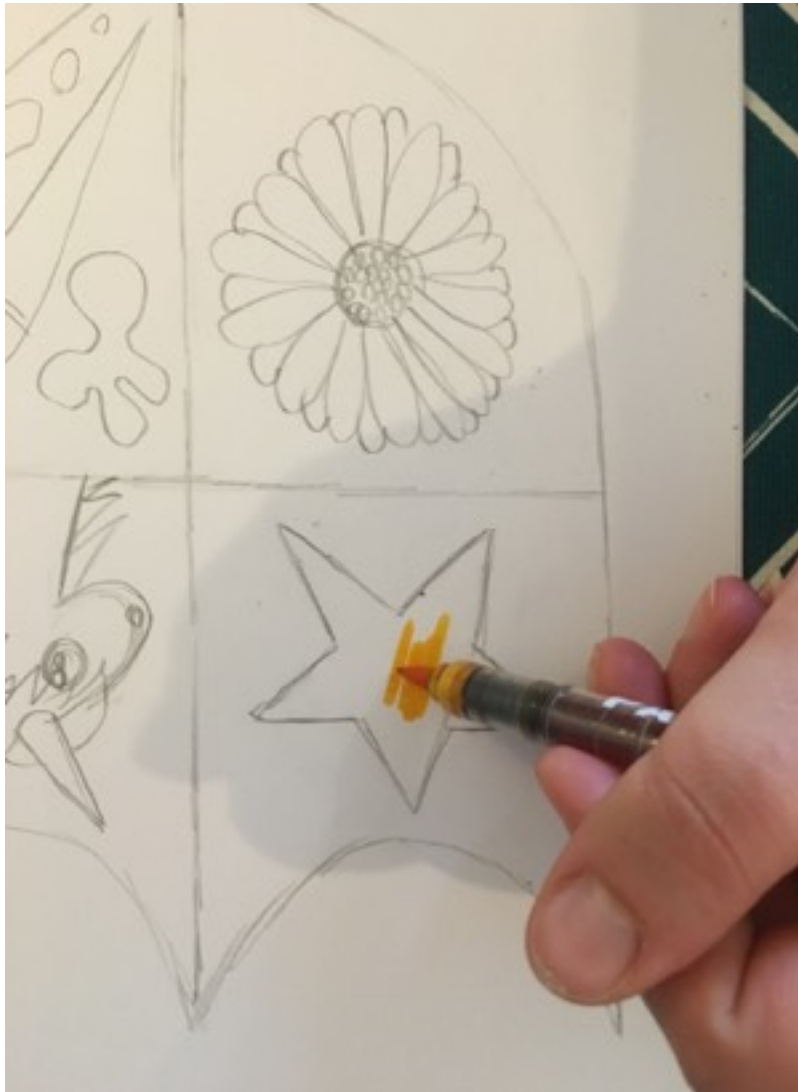

First of all what shape shield would you like? What shape shields have you seen? We are going for one with almost a crown at it's top but you can do whichever you like! Also how many sections would you like we went for 4

Now what are you going to put on your shield? What things do you like? What hobbies do you have? Do you have nicknames you could draw?

Once you are happy with your drawing you can colour it in!

And there you have it - your own Crest!

Here is another we created to inspire you
