

## Father's Day Portraits

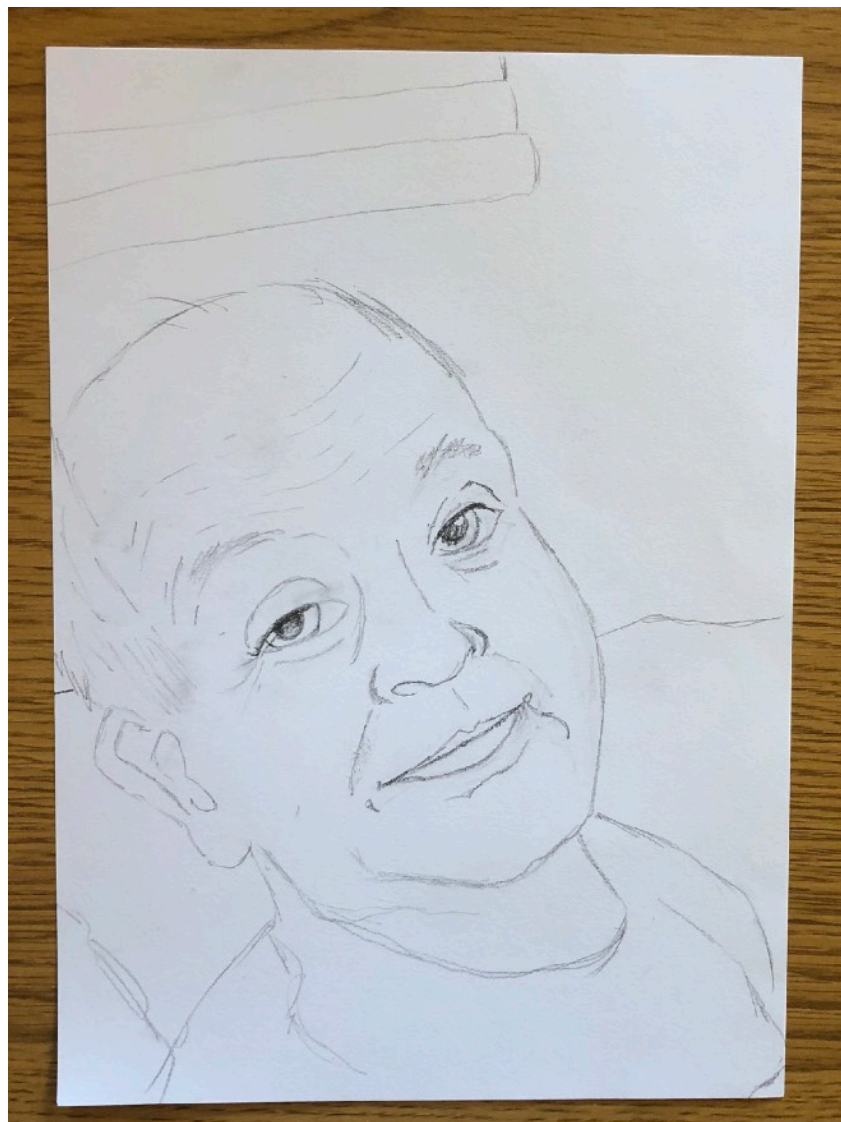

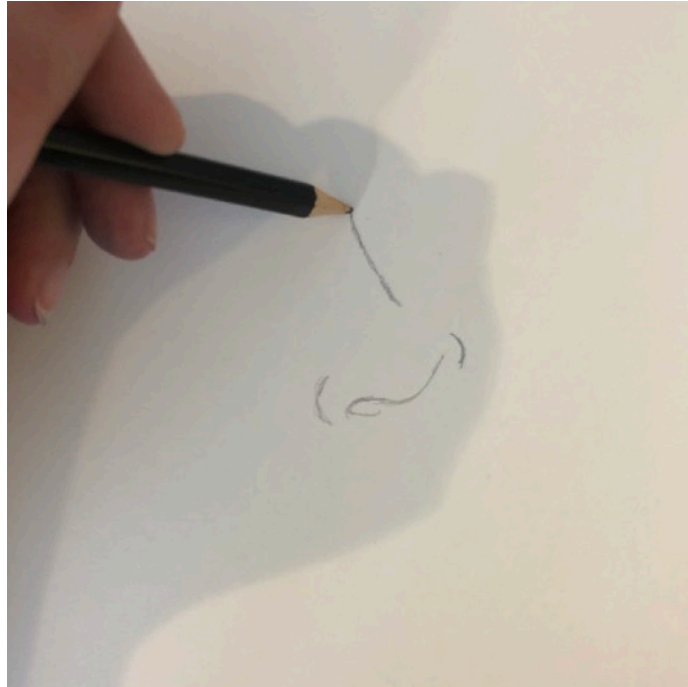

For Father's Day why not create a portrait as a gift! This can also work for Grandparents, Aunts & Uncles, or anyone important in your life!

Tools and Materials:

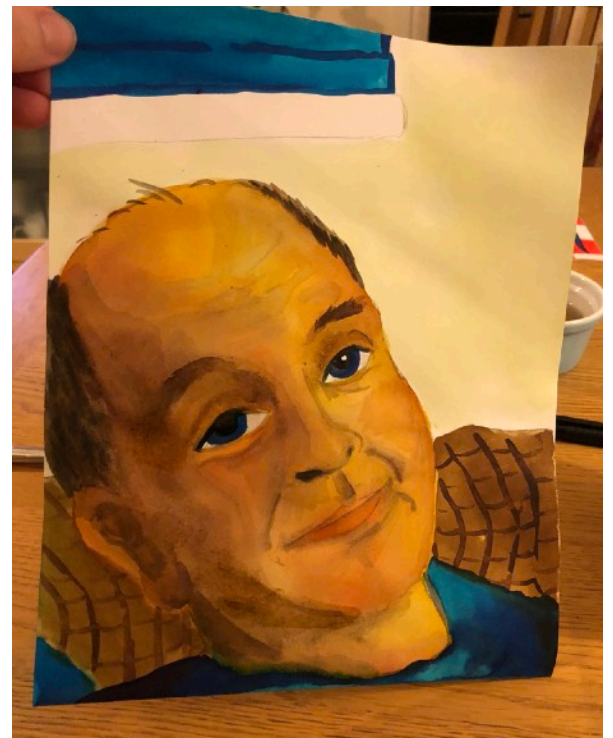

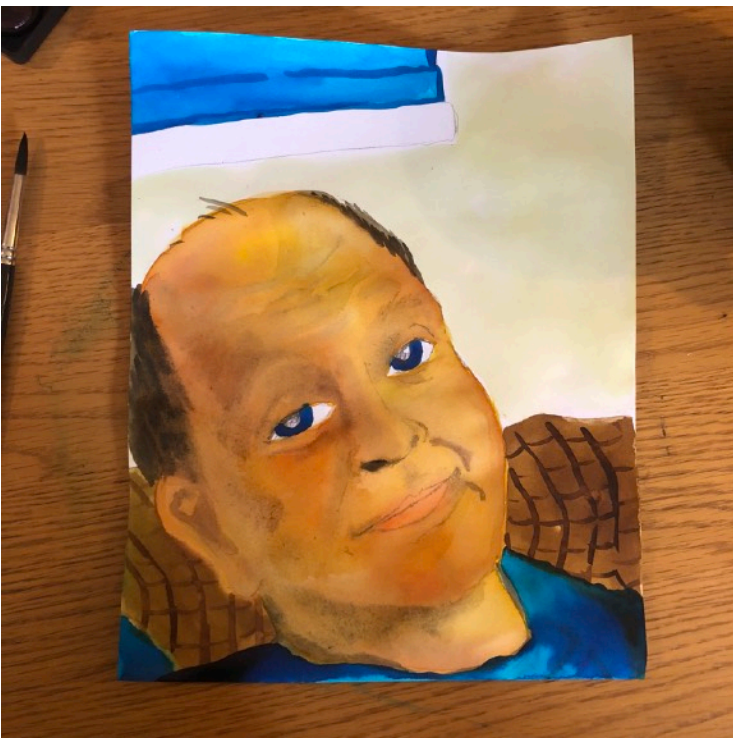

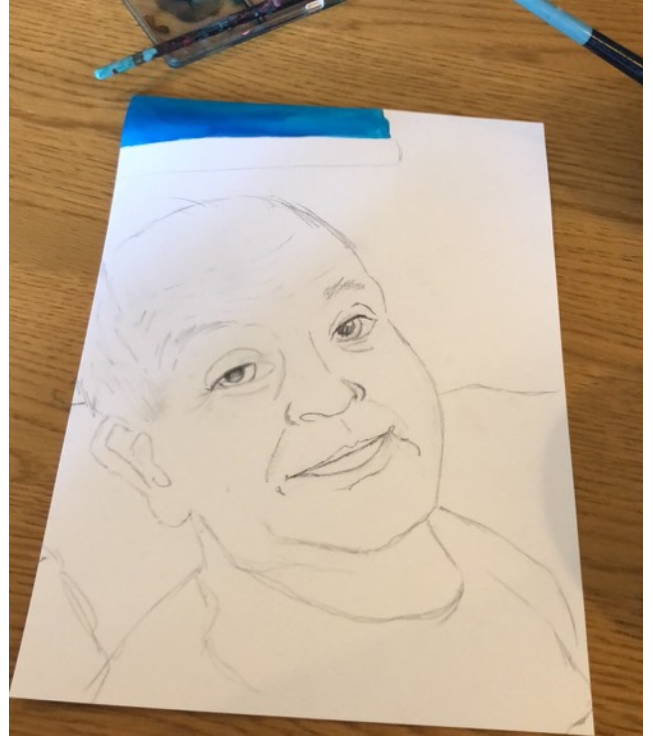

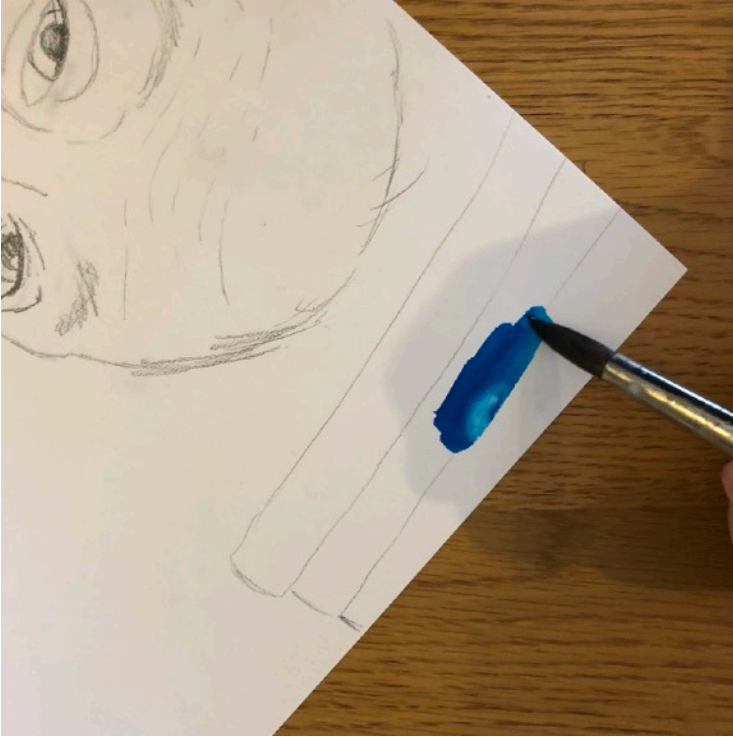

- Paper
- Pencil
- Watercolour
- Paintbrush
- Water
- Photograph if required (or you can do it from memory!)

First of all you want to sketch out the features and face, adding in details - not too many as pencil does show through watercolour.

Once you are happy with your sketch you can start adding colour - with watercolour it is great to build layers up - work from light to dark and you can use another piece of paper to test colours on first before you add to your work!

And there you have it you're very own Father's Day Portrait!
