

## Minecraft Makes

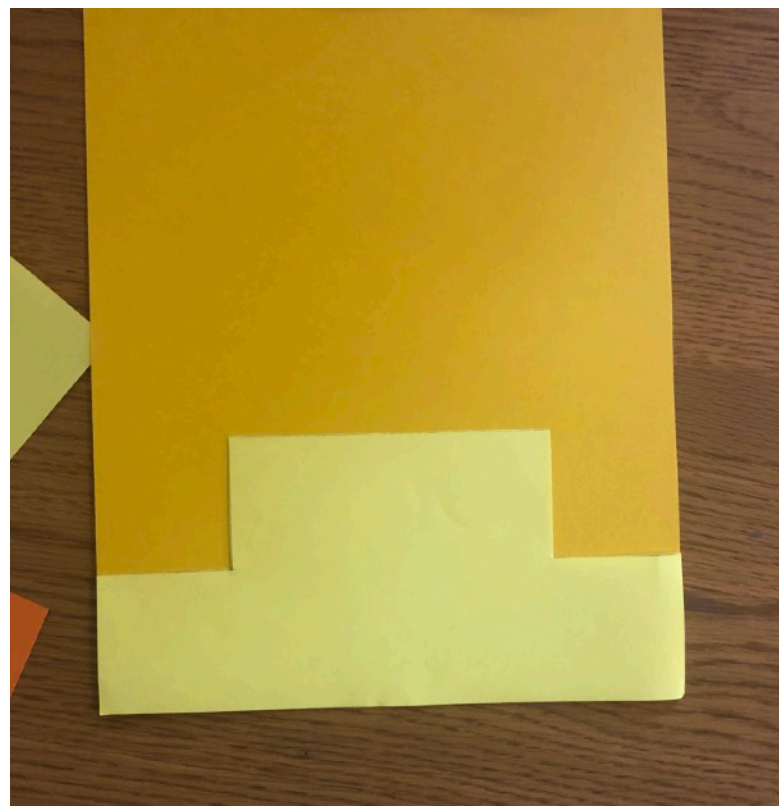

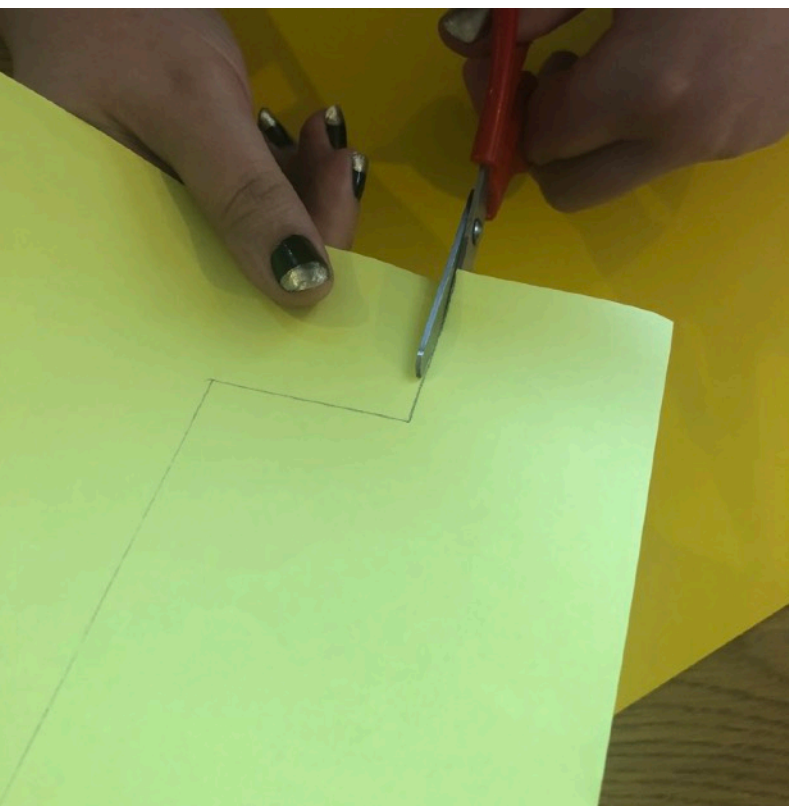

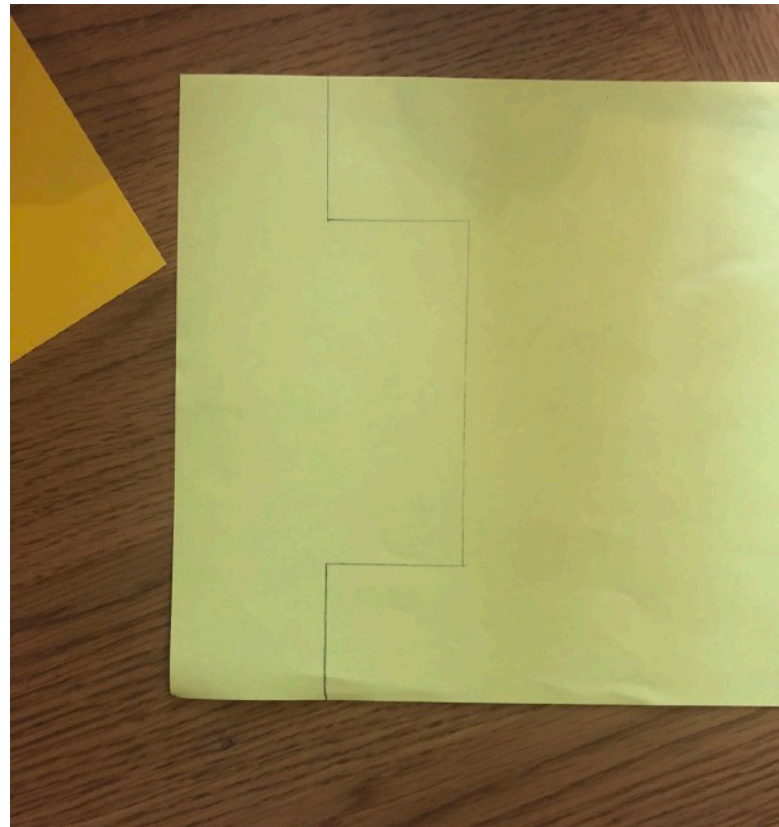

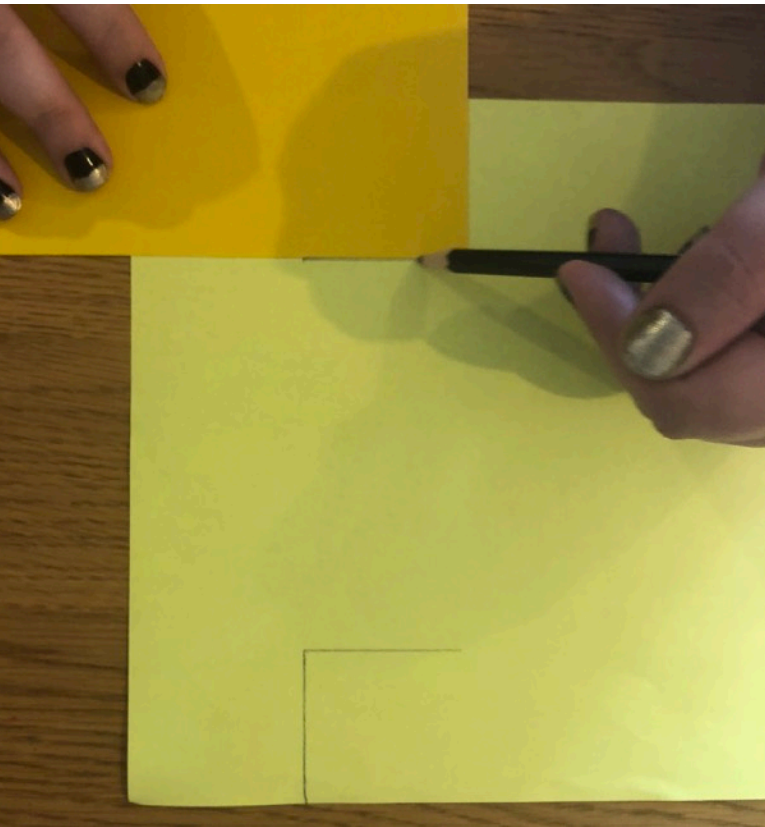

Taking inspiration from “Minecraft” which is a popular computer game where all the things in it looks very cube-like!

Tools and Materials:

- Coloured Paper
- Pencil
- Gluestick
- Scissors
- You might also want a Ruler - we didn't use one but you can!

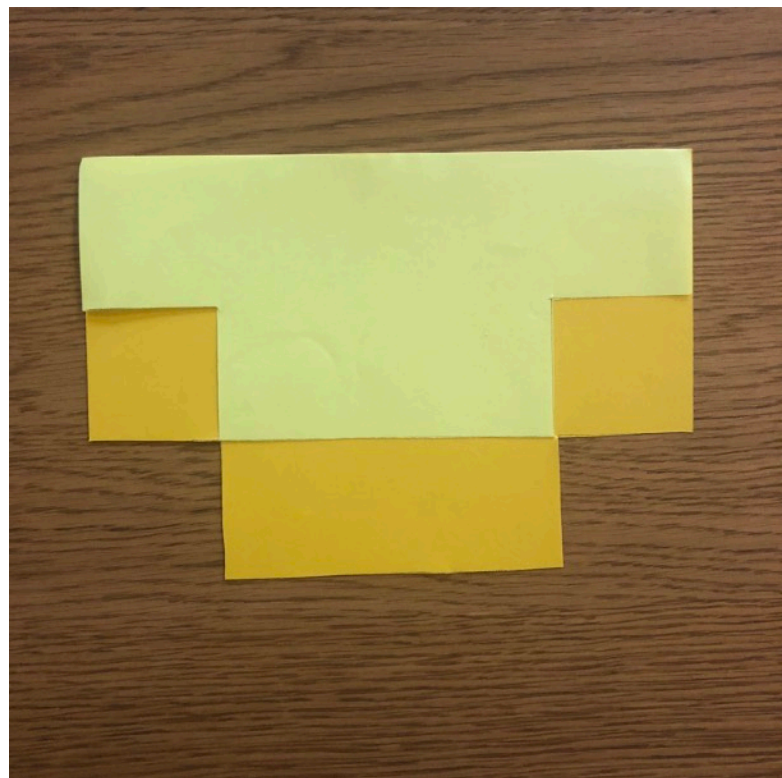

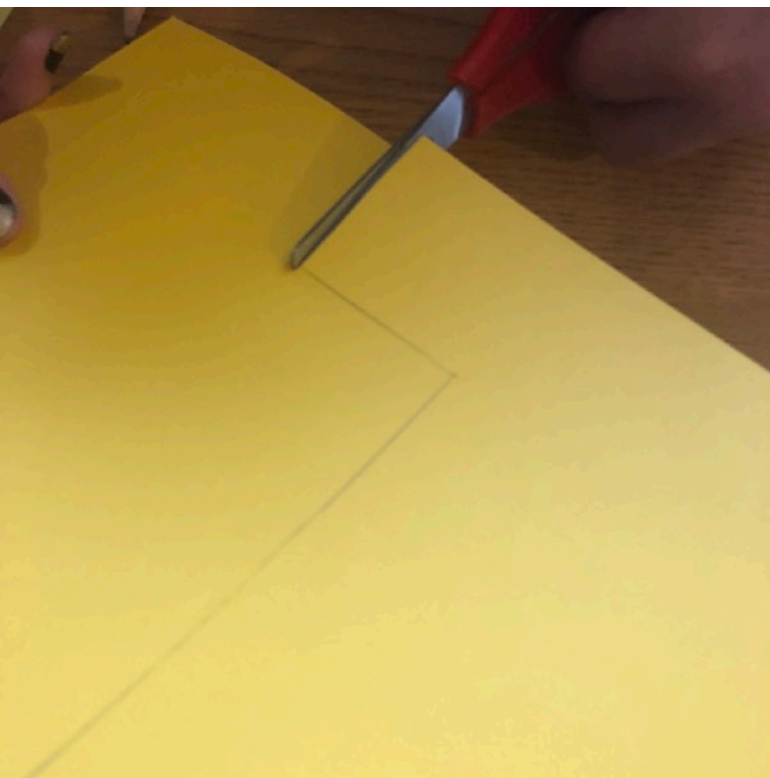

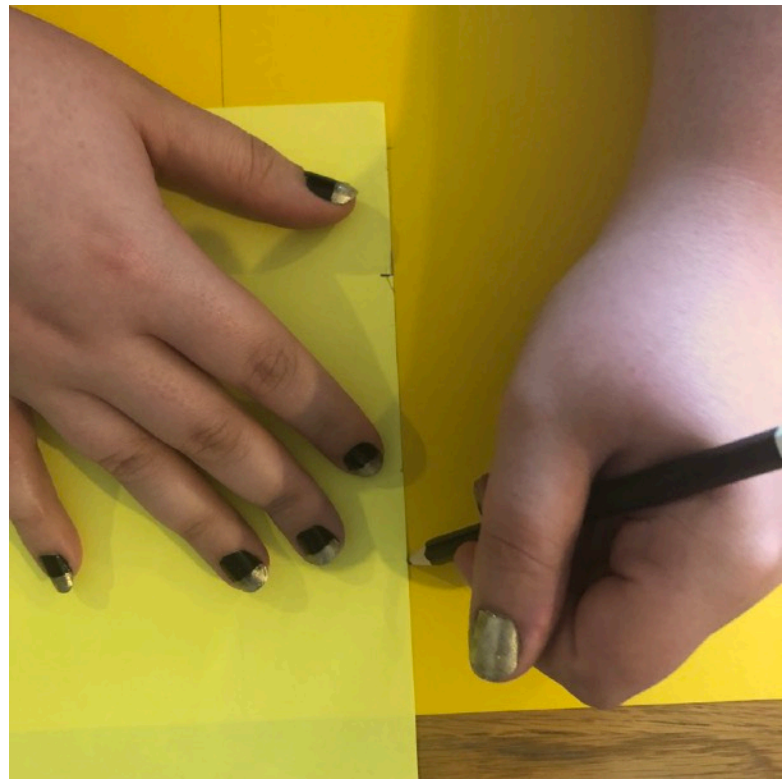

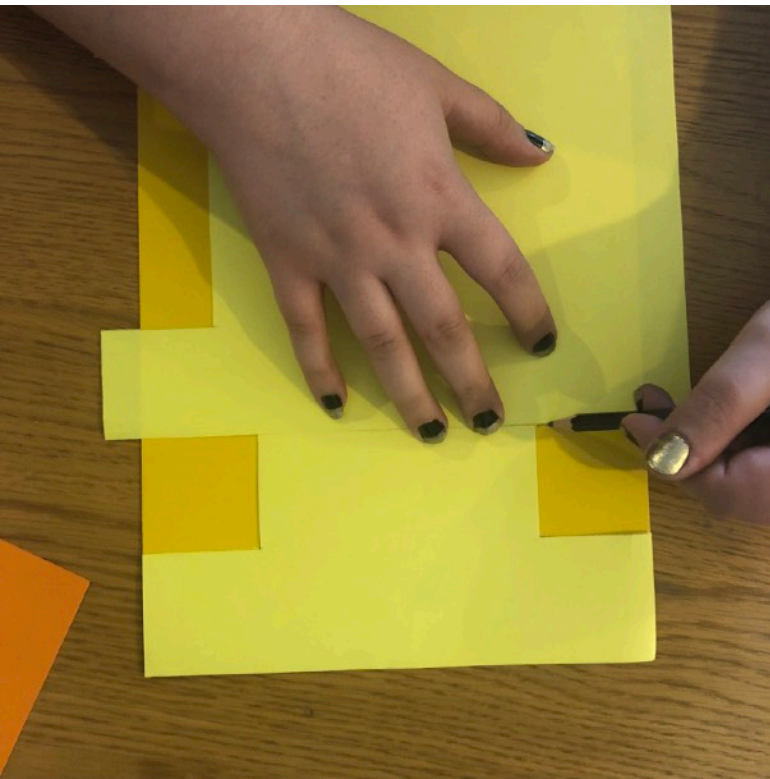

So what do you want to make - try and think about simple shapes like hearts, flowers, trees, or even a flame like we are making! So as mentioned you can use a ruler but we find it just as easy to use the edge of the paper to give us a straight line. We are starting off with the inner bit of the flame and using it as a guide to create the 2 other layers of it. Cut it out when you are happy with it

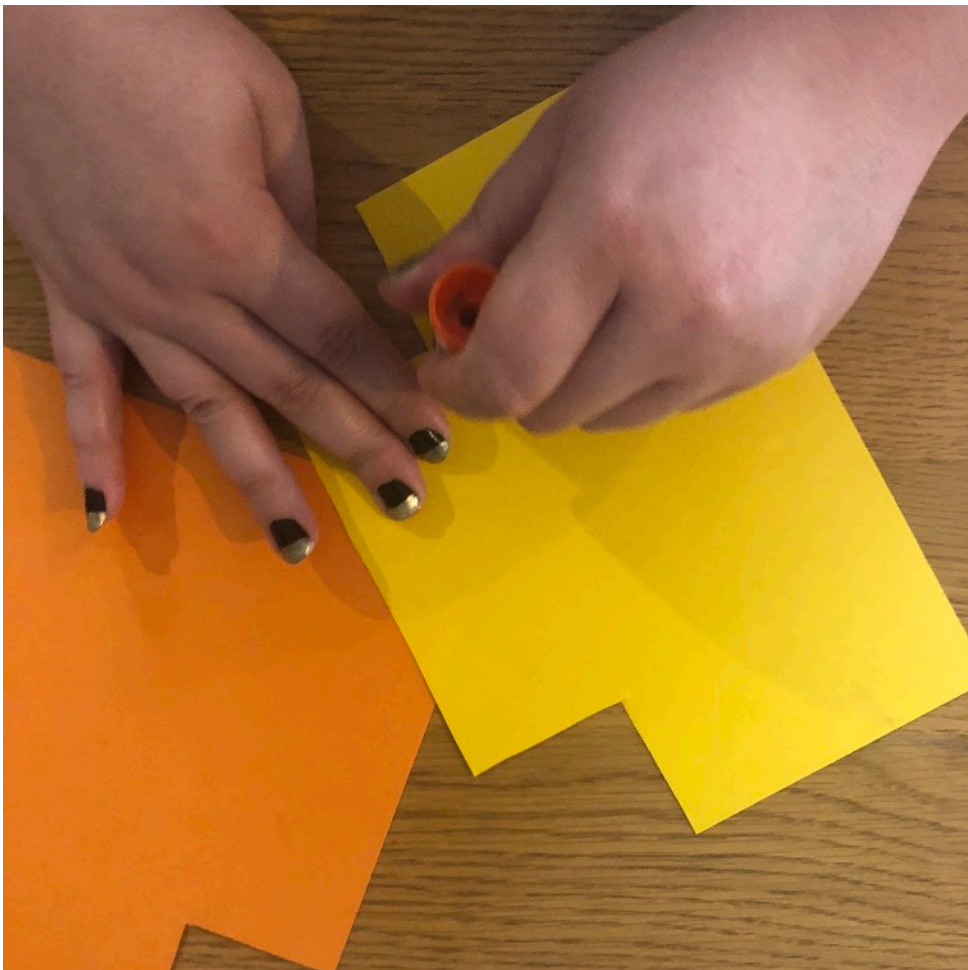

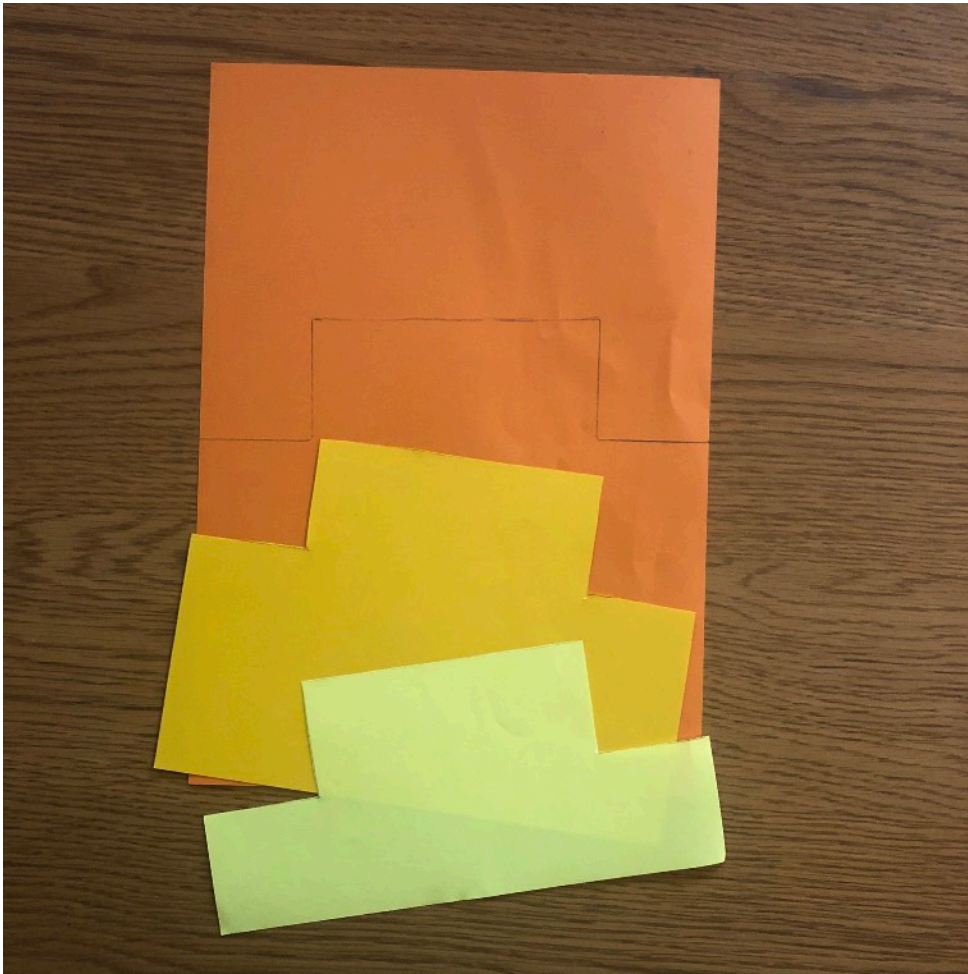

Repeat with your next colour imagining 1 square higher all round

Repeat with you last colour and then stick them all together

There you have it your very own "Minecraft Make"!
