

Origami Heart

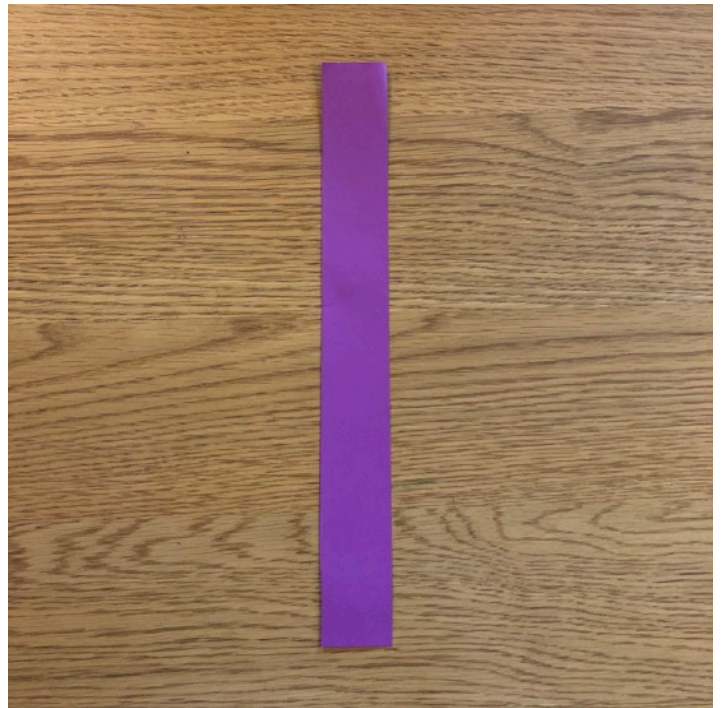

Origami Hearts are a fun way to learn basic origami and make little tokens to give friends and family - you could even write inside them!

Tools and Materials:

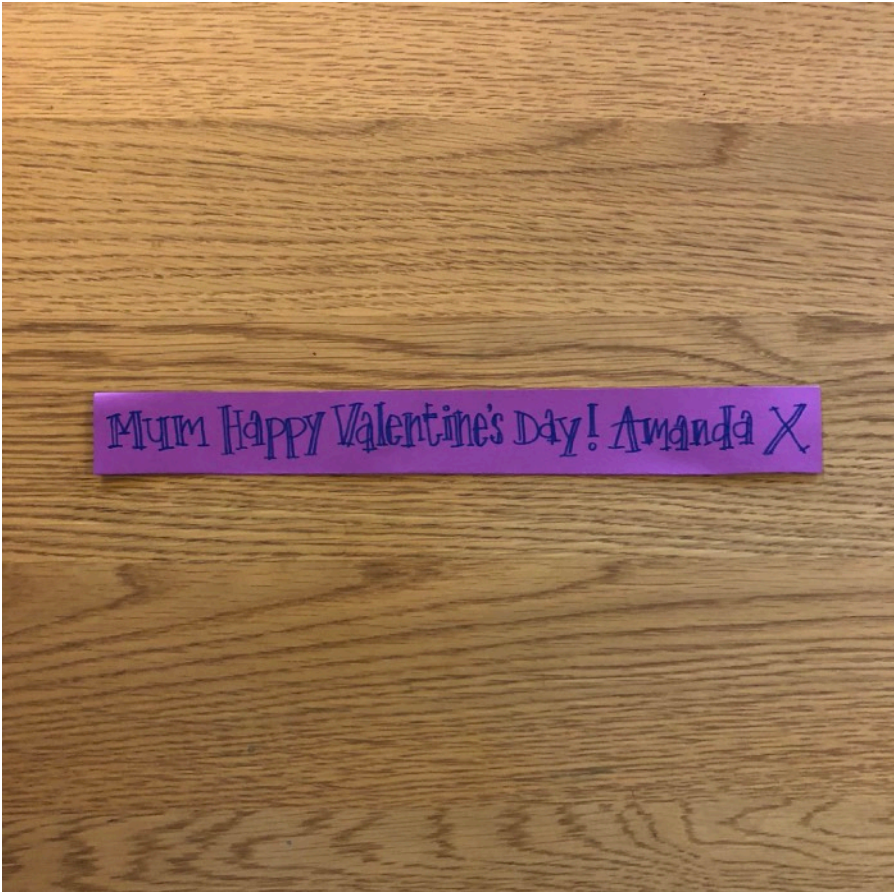

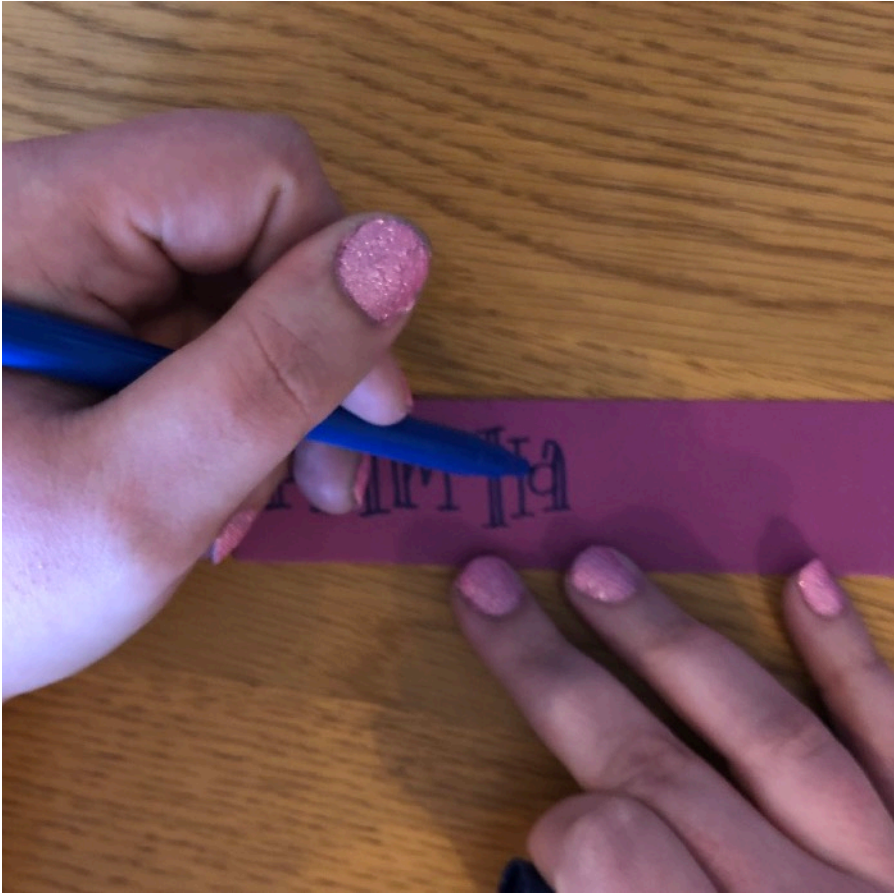

- Coloured Paper
- Felt Tip
- Scissors

First of all fold a strip along the long side of your paper roughly 1.5cm wide - then cut it off

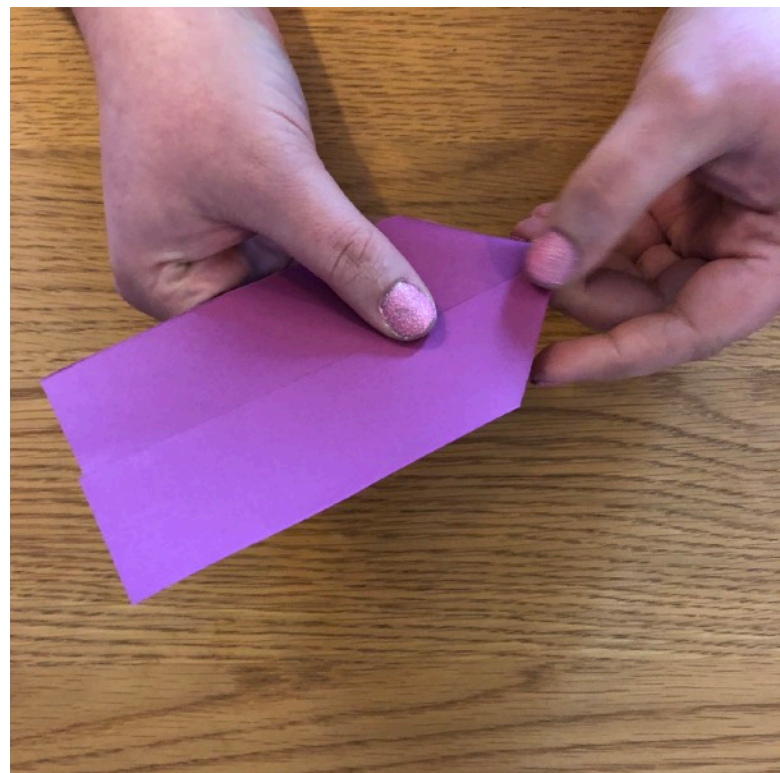

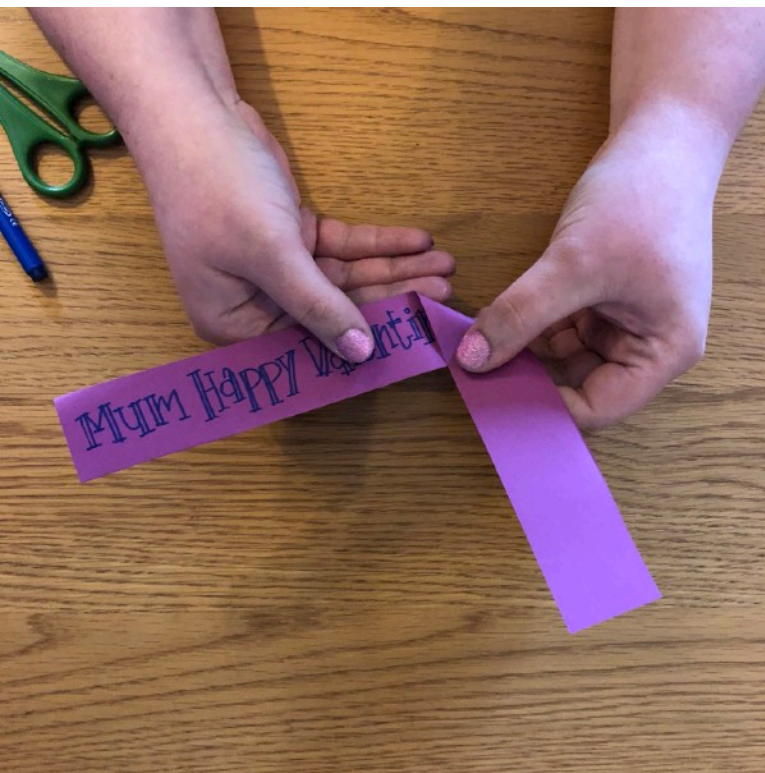

Now you can write your message for the person you want to give the heart to!

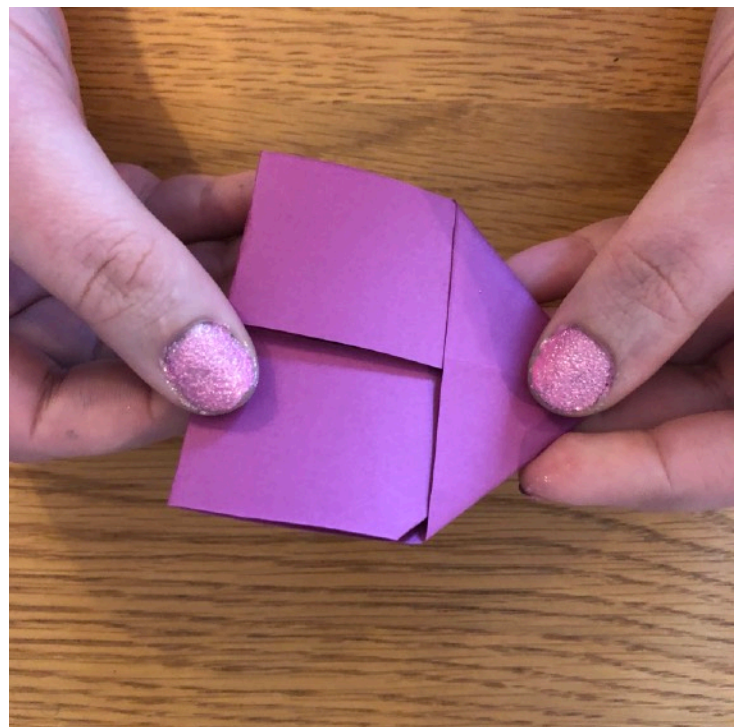

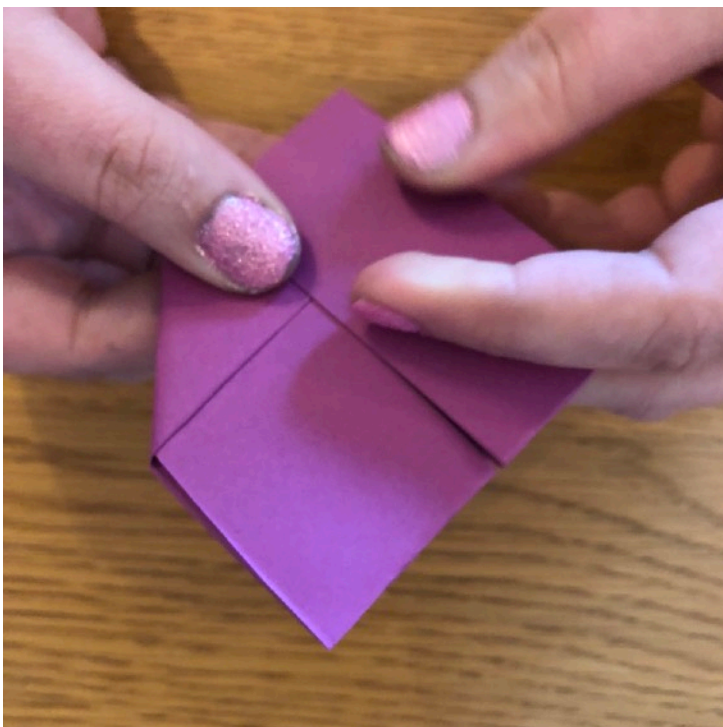

Now for the origami bit! Fold your strip of in half like so

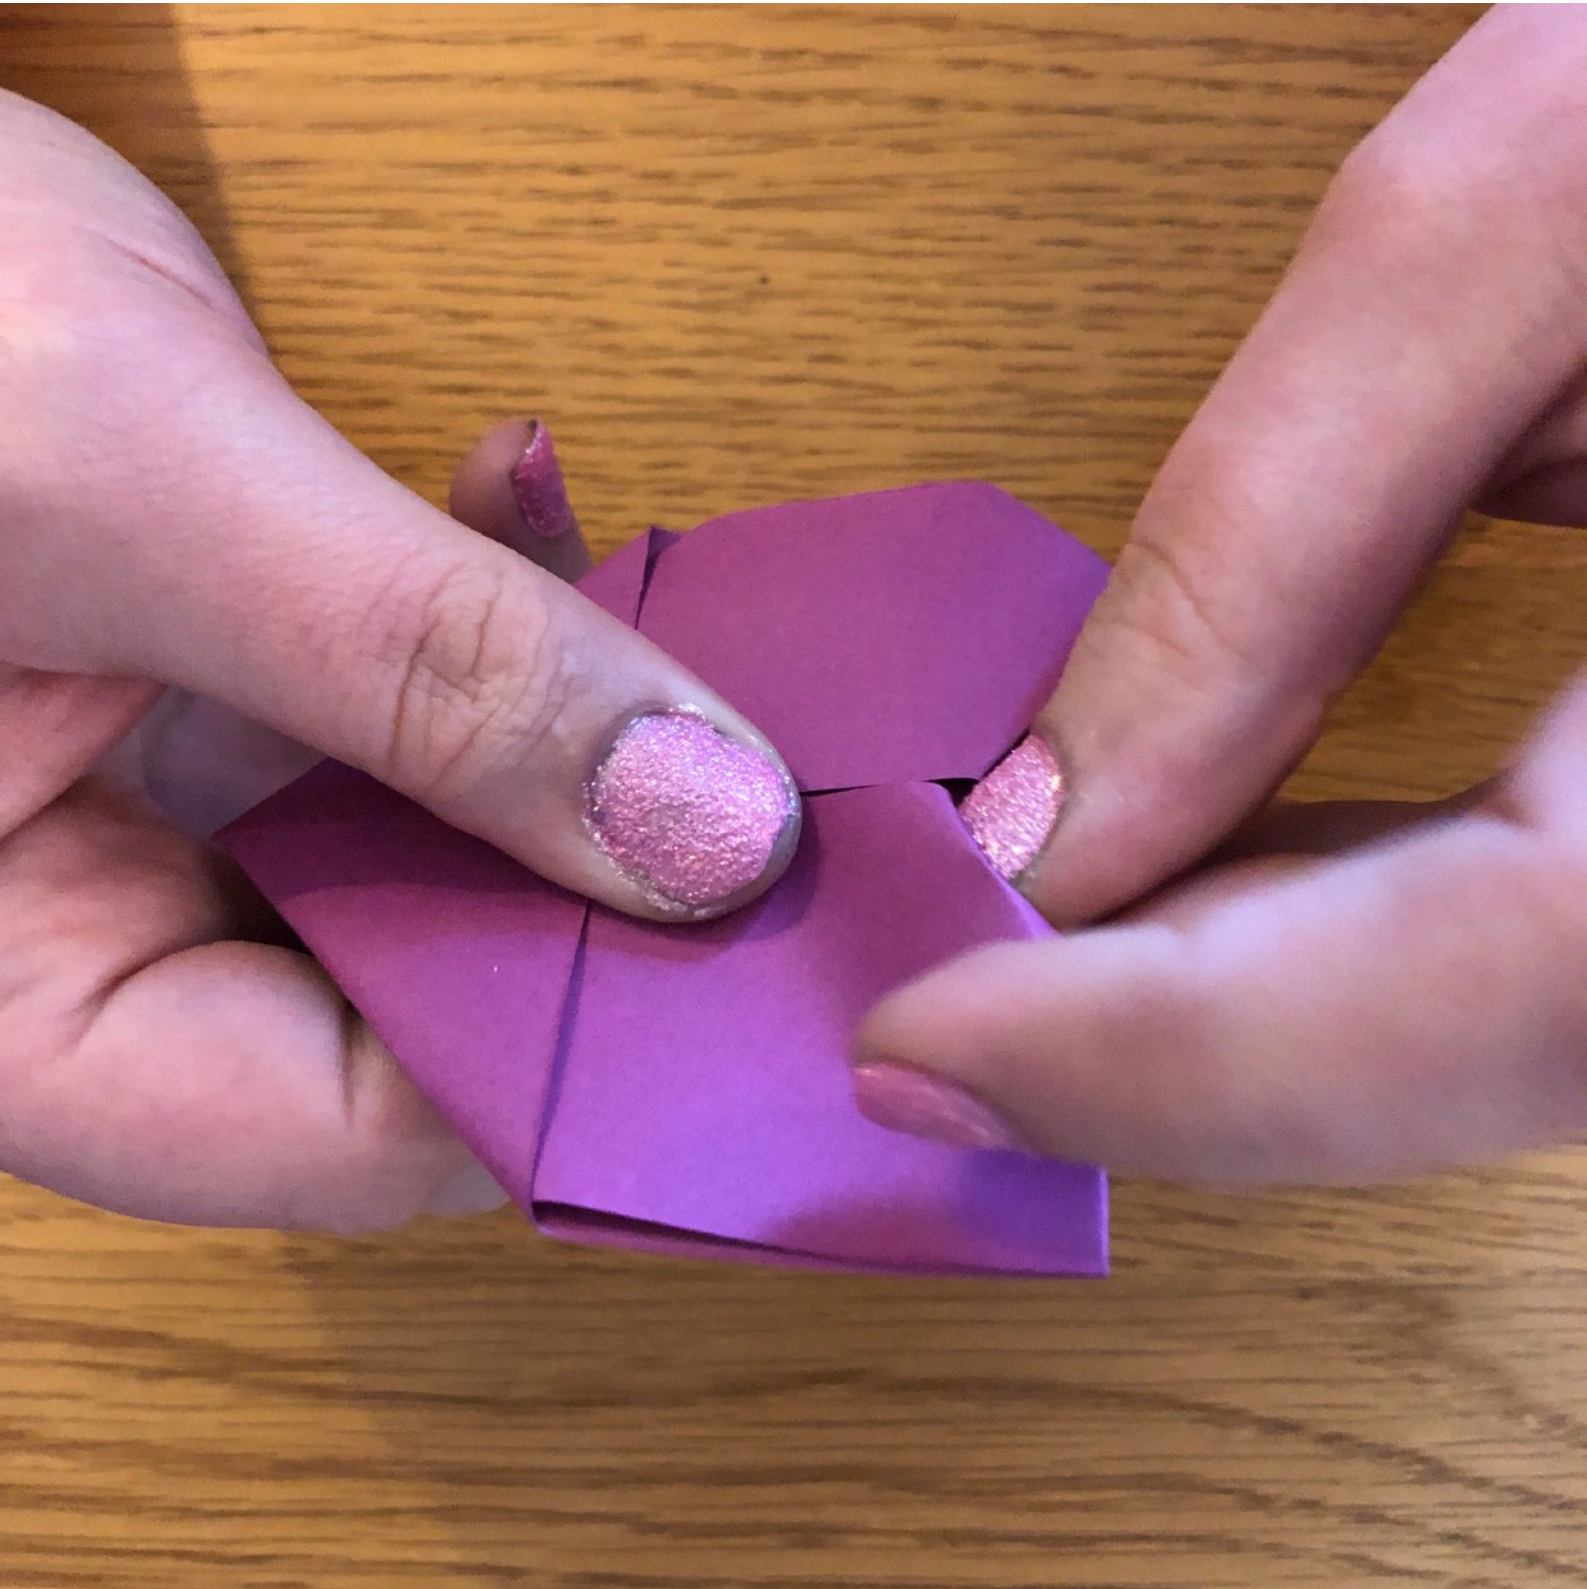

Unfold it as the fold is your guideline - you want to fold both sides up into a triangle to form a point at the bottom

Turning your heart over fold the top of the paper down towards the pointed end - when you have done that fold the bottom into a point so you can tuck it in like so

To make it more heart shaped push in the corners of the tops of each folded bit like so on all four edges

There you have it your very own "Origami Heart"!
