

Polarised Pics

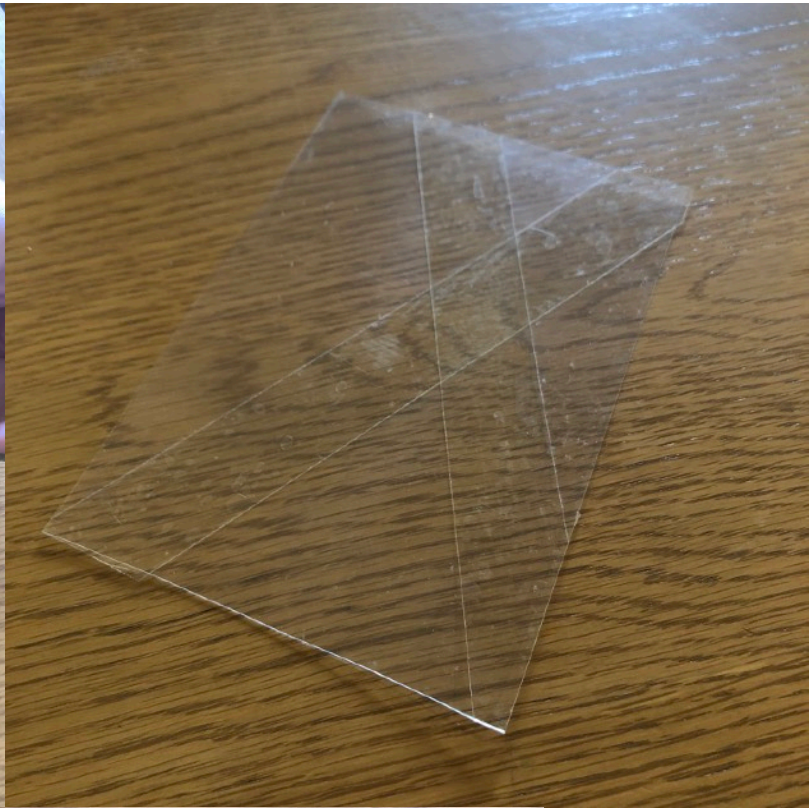

Using sellotape and 3D glasses (polarised lens) layering tape in different ways creates a whole range of colours that you can discover when viewing through the glasses!

Tools and Materials:

- 3D Glasses (polarised lens)
- Sellotape
- Acetate
- Scissors

Using the acetate as a base starting creating your shape from sellotape using a mix of small and large bits layering in all different directions to create pockets of colour

There you have it your very own polarised pic!

Here are some others we made to inspire you
