

# Van Gogh: Starry Night

Sometimes we like to take inspiration from other Artists looking at their style - either making our own version of the work or taking elements from their work and making something completely new!

Tools and Materials:

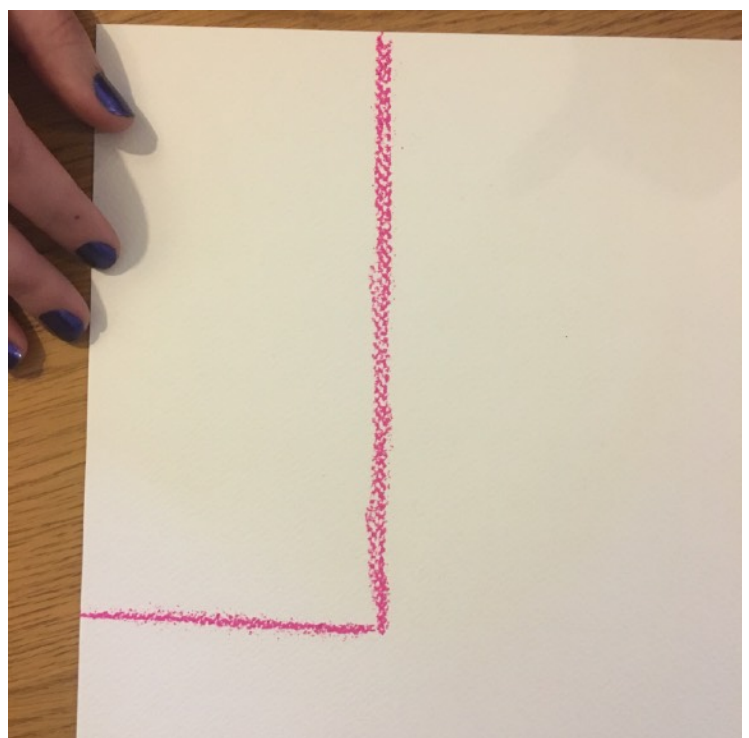

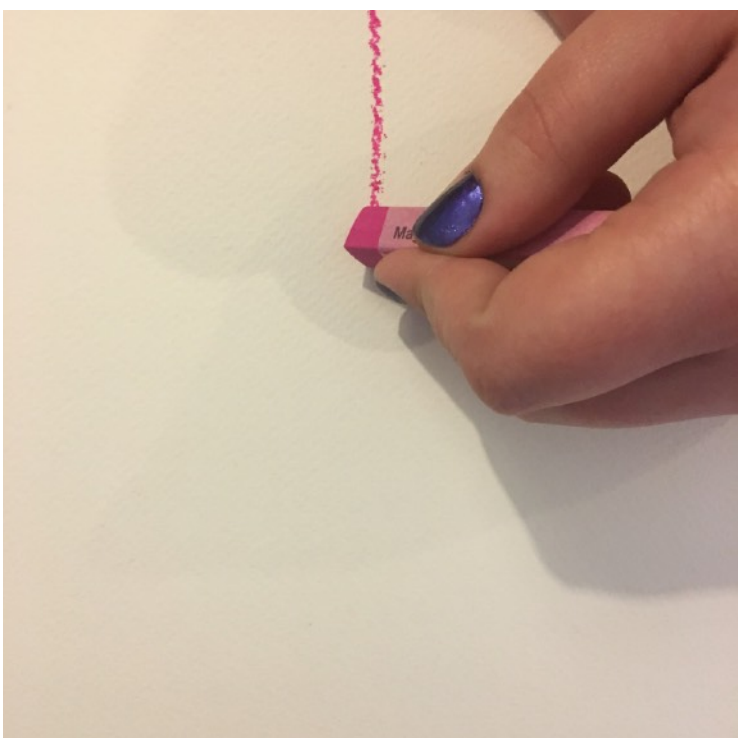

- Paper
- Chalk Pastels
- Hair Spray to fix it if you don't have fixative spray!

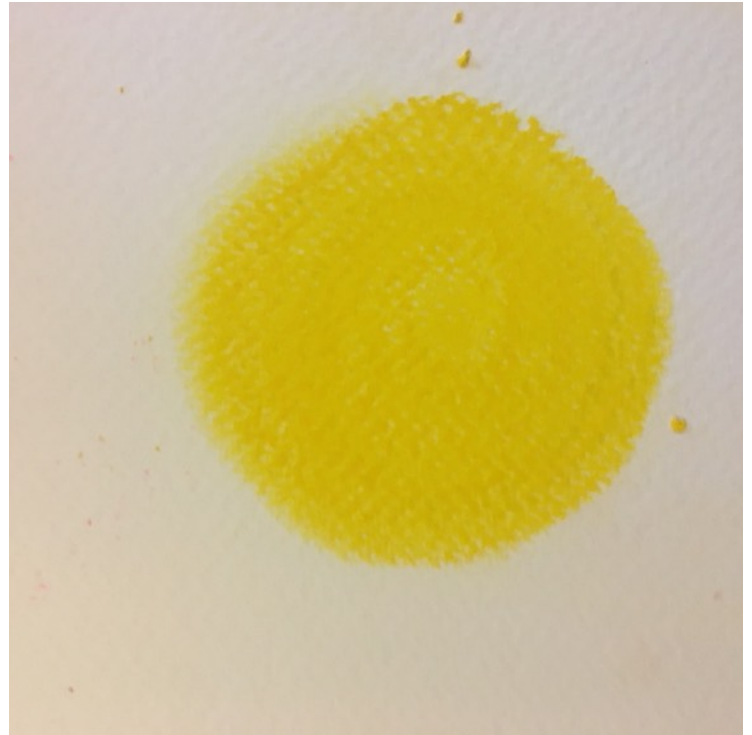

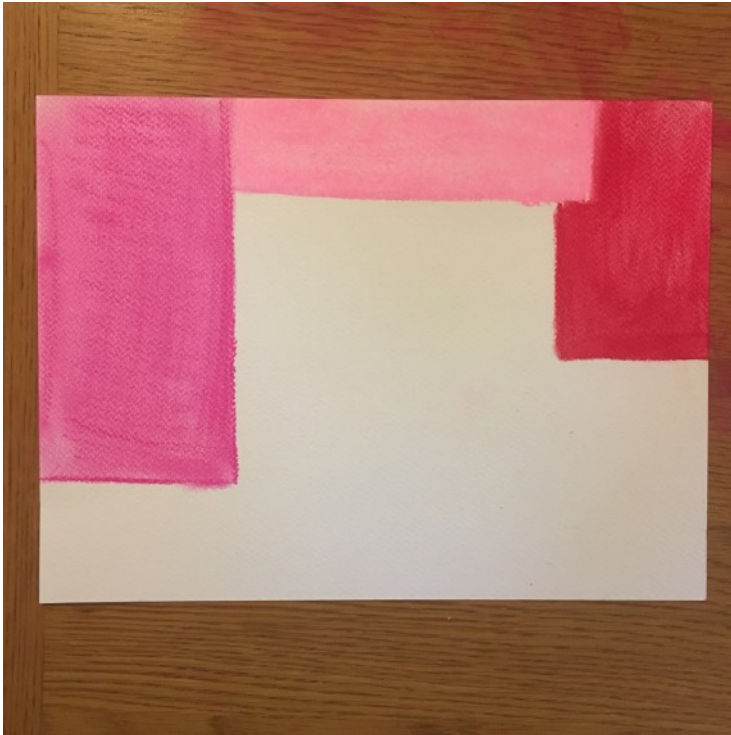

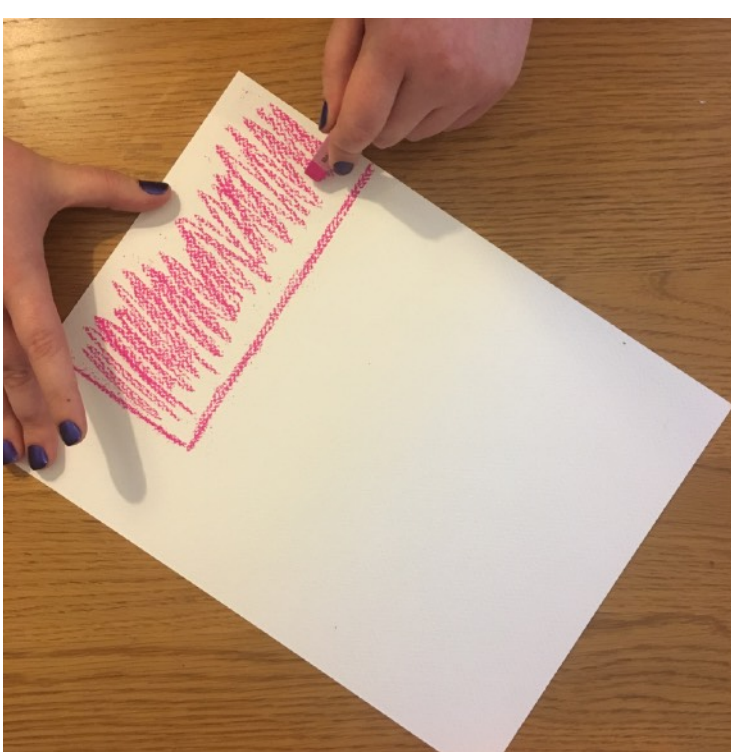

So this is Van Gogh's Starry Night - it is a very famous image you might have already seen it

So looking at this artwork think about what you would like to create! We thought it would be fun to create a modern cityscape with the starry night sky background like so

The great thing about using chalk pastels for this is the way you can blend them!

There you have it your own “Van Gogh: Starry Night” inspired work!

Here is another we created to inspire you!
