

Watercolour and Washi Tape

This is a fun way to create images - don't worry if you don't have Washi Tape - masking tape works just as well, Washi Tape is just a version of Masking Tape!

Tools and Materials:

- Marker Pen
- Washi Tape
- Paper (Watercolour paper if possible!)
- Watercolour
- Water
- Paintbrush

First of all figure out what you want to create - you start off with the background first. Mark out the areas you want to keep white and then pop on the colour!

When you are happy with the background let it dry - when it has dried peel off the washi tape

Then think about the image or word you want to put over the background and start to draw it out with the marker pen

There you have it your very own Watercolour and Washi image!
