

Handy Cards

Using your hand shape - you can create a whole variety of different cards, especially Christmas themed!

Tools and Materials:

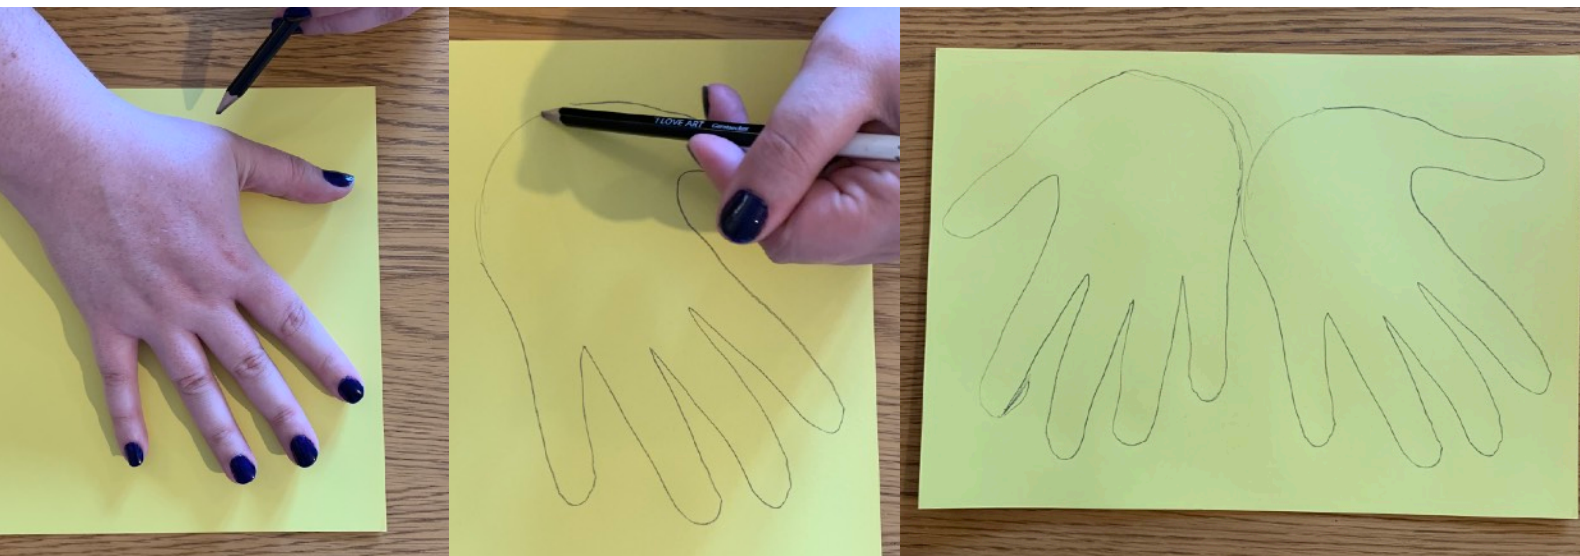

- Coloured Paper
- Large White Paper A3
- Pencil
- Scissors
- Sellotape

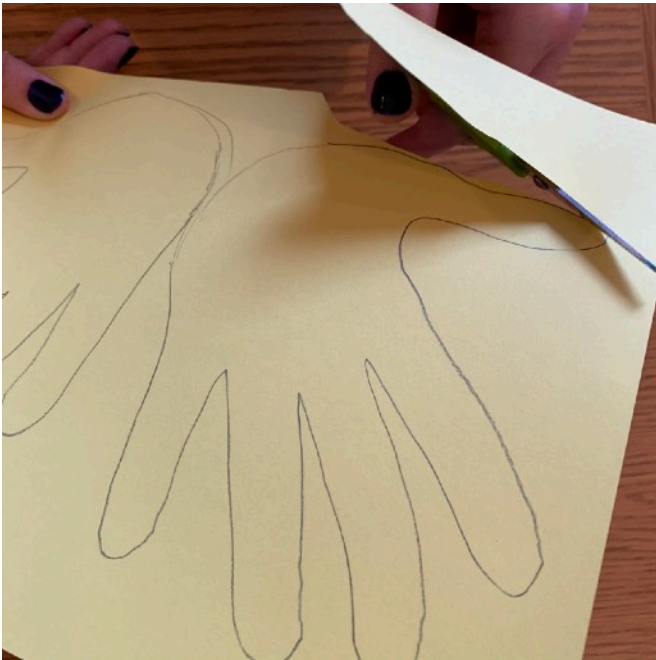

First of all take your large white paper and fold it in half - we used this size because our hands would fill up the whole card if we used A4 - see what size you need!

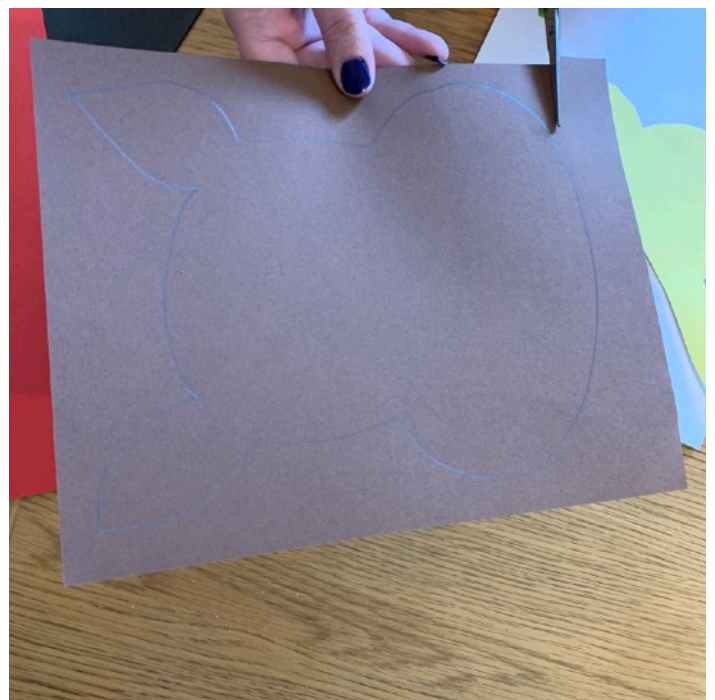

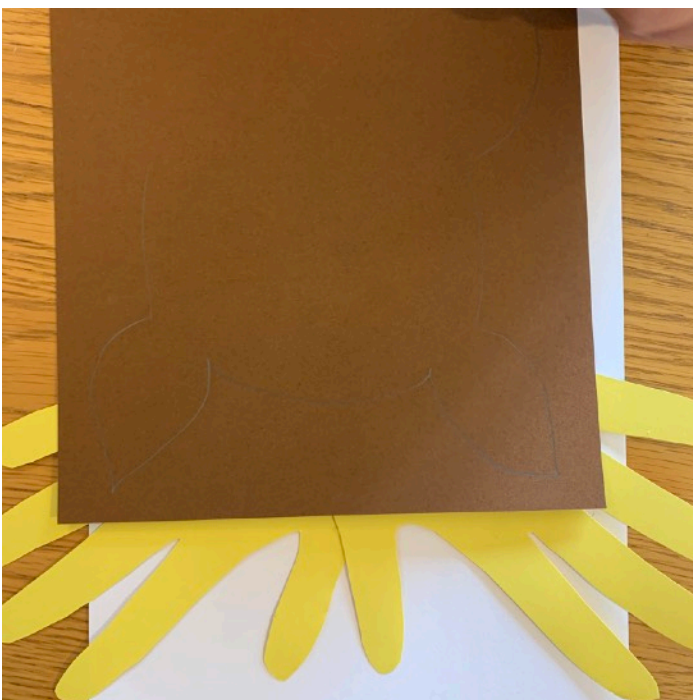

Once you have the base of your card think about what you want to make - we thought a reindeer would be fun using our hand shape for the antlers - draw round your hands like so

Cut them out and place on your card - we used sellotape folded around in a circle inside out to fix them so we can move them if we need to

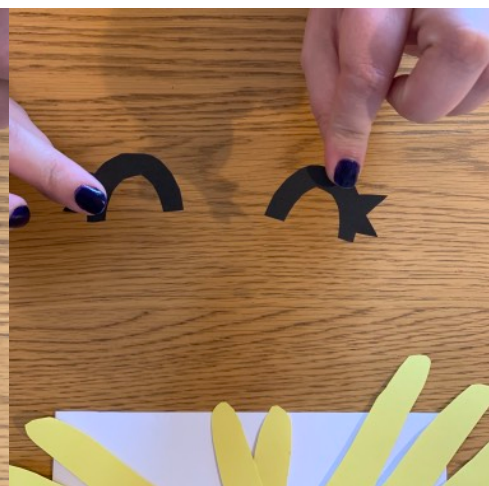

Now to create the face - using where the antlers will be as a guide we placed the brown paper on top to draw the face - making sure it's in proportion to the antlers and fits on the page - cut it out when you are happy with it

Move the hand antlers to where you want them to be and stick them down - make more sellotape loops for the reindeer face and stick that on top

Now to create the facial features - a red nose for Rudolph plus some eyes - stick them on with more sellotape when you are happy with them!

There you have it your very own “Handy Card”

Here is another we made to inspire you!
