

Wintery Textured Landscapes

Thinking about different textures why not create your own snow-scene with fluffy snow and glimmering ice - what else can you think of and what texture might it be?

Tools and Materials:

- Coloured Paper
- Pencil
- Glue Stick
- Scissors
- Cotton Wool Balls
- Foil

First of all to make your snowy landscape - take the cotton wool ball and pull it apart, one ball can go a lot further than you think there's a lot of cotton you can unravel to cover a larger area. It is easier if you put glue on the paper first so you don't get stuck to the fluff as much!

Then add more texture on top we thought it would be fun to create a frozen pond - cut the foil to the shape you want and then stick it to the fluffy snow

Now to create a character to skate on the lake - we thought a penguin would be fun, you can create whatever you would like! Start sketching out the shape of your character - we will add details on in other colours after so now you are creating the silhouette, then cut it out ready for the next bit

Using your penguin shape draw round the tummy, beak and head to create his tummy like so - cut it out and glue it on

Again using your penguin shape as a guide draw round the beak on some orange paper like so you can also create some legs from basic rectangles

You can also make some ice skates like so

Once you are happy with skates your penguin needs a face!
Cut out some eyes and beak and stick on

Once you have added facial features - why not create a scarf to keep them warm whilst skating, use your penguin to measure how big the scarf needs to be stick it on

Once you have stuck your penguin on too you can think about what else you would like in the background, we thought silhouettes of trees would be fun! If you fold your paper in half or thirds you can cut out more trees at once which is handy to save some time! Stick them on when done - you can overlap them and leave the branches free (only glue the middle) so it has more of a 3D feel

There you have it your own “Wintery Texture Landscape”
