

Fan Decorations

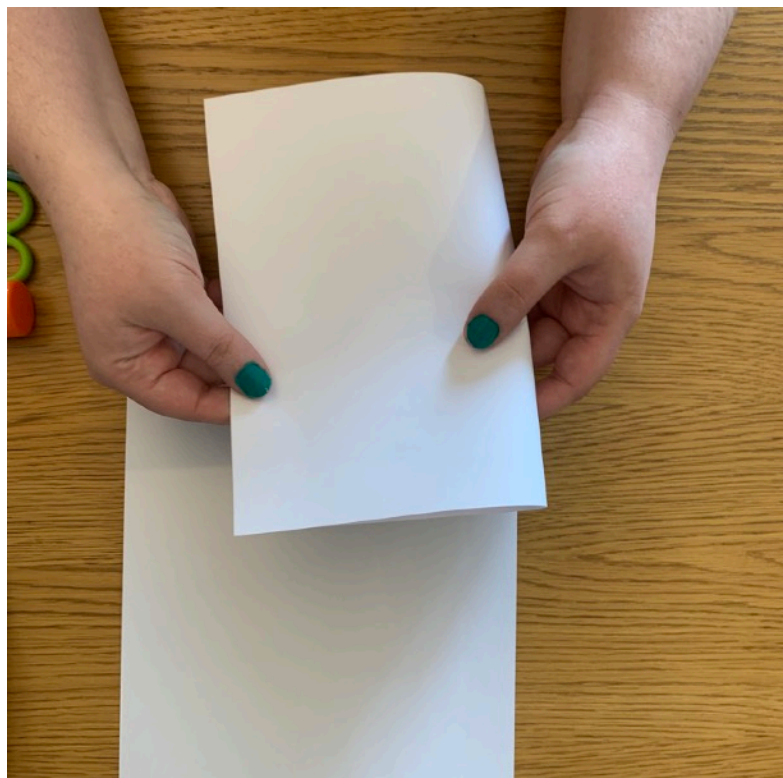

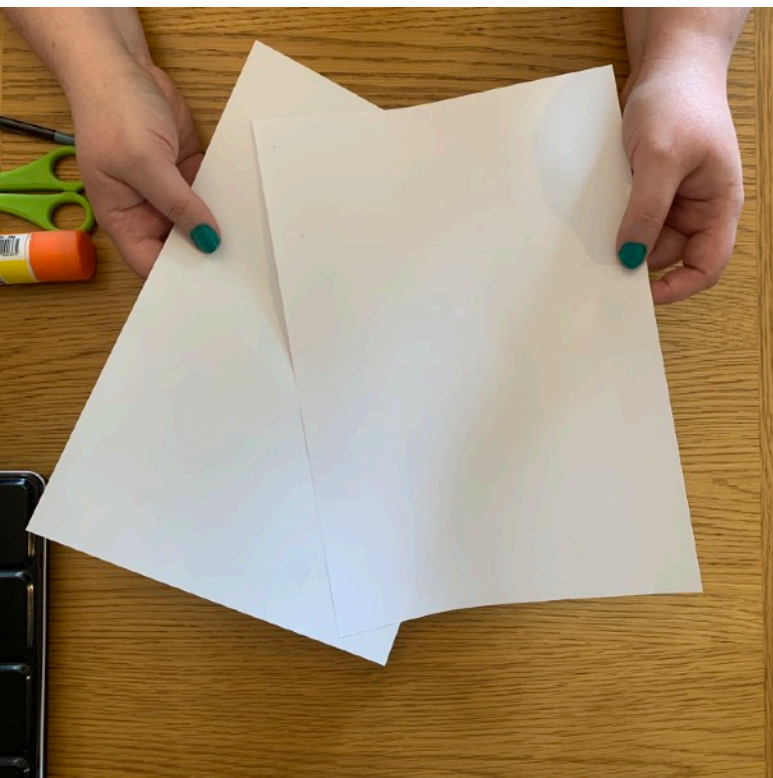

Thinking about Summer and tie-dye vibes why not create some fan decorations for inside or outside - great for parties or just to inject some colour!

Tools and Materials:

- 2 pieces of Paper
- Paintbrush
- Gluestick
- Scissors
- Watercolours
- Water

You need 2 pieces of paper which will be cut in half to create 4 smaller pieces of paper we fold and painted our before cutting but you could cut and then paint its up to you!

Take each of your 4 pieces of paper and start to fold them, alternating sides to create 6 strips with 5 folds like so

Fold them in half to look like a fan - do this with all 4 like so

Now to put it together - glue the inside of the paper much like the inside of a V - hold it together so they dry and hold

When you have done all 4 you need to then glue them to each other to create a circle- make sure you have them all facing the same way when you glue them together (paint side up)

There you have it your very own “Fan Decoration”

Here is another we made to inspire you!
